With gas prices rising (always), alternative fuels look like an answer. Hybrids sound good, but what about the batteries? And fuel cells still seem to be pie-in-the-sky. Which leaves us with good old diesel. This book shows how to get the most out of the diesel engine, at a time when its fuel efficiency is almost as important as its massive torque.

Although most diesel truck owners probably aren't planning to break any land speed records, advances in diesel technology, such as ultra-low-sulfur fuel, high-pressure common-rail fuel injection, electronic fuel management and variable geometry turbocharging, are bringing diesel engines into the performance arena. And this book is the ideal guide for making your diesel engine perform--adapting intake and exhaust, torque converters, engine electronics, turbochargers, and much more.

Dunya a courageous seventeen-year-old Shia Muslim teen girl is traveling with her devoted family to Qatar from London when the plane makes an emergency landing in Beirut, Lebanon. The Islamic State of Iraq and the Levant (I. S. I. L.) breaks into the airport in a spectacular fashion and kills the passengers after a collapse of Lebanon. Dunya manages to escape with the help of a delightful teen girl. Her friend finds out that the Islamic State of Iraq and the Levant (I. S. I. L.) is holding some hostages from the airport in Damascus, Syria. Now Dunya and her new friends must go to Damascus to find out if her brother Hakeem is a hostage in Syria. Dunya meets a lonely fighter who wants to leave the Islamic State of Iraq and the Levant (I. S. I. L.) after a disappointing few loathsome years. He offers to help Dunya on her quest. Dunya and her friends debate whether trusting the Islamic State of Iraq and the Levant (I. S. I. L.) member is a good idea. Dunya will take a few risks in search of her brother Hakeem. A new problem leads to a change in her plans. (Word Count 69, 854)

In Women in Psychiatry, 21 accomplished women psychiatrists in private practice, teaching institutions, hospitals, public health treatment programs, and leadership positions reveal both the challenges and rewards of being in a wide array of professional positions. The stories are heartfelt and personal as well as professional accounts of obstacles overcome and milestones achieved. In a field once completely dominated by men, nearly one-third of physicians who identified themselves as practicing psychiatry in the U.S. were women, and the diversity of their approaches to the practice of psychiatry is encouragingly illustrated in this book. Women in Psychiatry clearly demonstrates where an interest in science or medicine can lead when combined with determination, guidance, experience, mentoring, perseverance, and organizational support. The featured women represent diverse backgrounds, ethnicities, positions, career pathways, and accomplishments. All the authors share lessons learned and provide recommendations on what they found helpful in achieving their goals of personal and professional fulfillment. These chapters present many common themes among women professionals both within and outside of psychiatry, including handling pregnancy and motherhood while building a career, the potential strain between women and men in the field, and some of the income and leadership role inequities that still exist. Features and benefits of Women in Psychiatry include: Insights into career paths through descriptions of pivotal events and decisions that shaped their careers as scientists. Perspectives and advice on how to balance personal and professional responsibilities, both in training and in practice. Illustrations of the role

played by cultural and linguistic background, race, ethnicity, sexual orientation, religion, marital status, subspecialty, place of employment, and work setting. The importance of mentorship throughout the process, first as a recipient and ultimately as a mentor to other women entering the field. Strategies these authors used to accomplish goals and the various styles of leadership that helped them reach those goals. The historical context for understanding that until recent decades, despite irrefutable evidence that women in the biomedical professions are capable, there were few in most fields with the exception of nursing, dental hygiene, and elementary science teaching. *Women in Psychiatry* is the ideal book for women who are considering a career in psychiatry or other areas of medicine. It is also a book for partners and spouses of women in medicine and psychiatry. It is an inspirational and educational document that women and men, whether in medicine or other, nonrelated careers, can value and appreciate through the recounting of personal and professional experiences that made a difference.

Inventory Management Vol. 2 updates some topics in Pete Kornafel's Inventory Management and Purchasing book published in 2004. The original book is still in print, and much of it is still "best practice" for forecasting and purchasing inventory for hard goods distributors. This Vol. 2 book includes new material on SKU level forecasting with the addition of external data, a big new section on store assortment planning, some "best practice" techniques for managing special situations such as multiple sources, hub-spoke store networks, promotions, category management and supply chain collaboration. All the content is of my own design with what I feel is "best practice" in each of these areas. And this Vol. 2 has some observations about the future of the automotive aftermarket in the U.S. This includes the impact of the Covid-19 pandemic in the (hopefully) short term, and some longer-term factors that will, over time, profoundly change the aftermarket.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
