Diese Sammlung von Schriften aus der Zeit von 1970 bis 1990 des brasilianischen Pädagogen Paulo Freire (1921-1997) gibt einen Einblick in die Grundlagen und Prinzipien seiner Bildungsarbeit auf der Basis der Pädagogik der Befreiung. In den ausgewählten Texten werden nicht nur pädagogische Probleme und inhaltlich-methodische Fragen der Bildungsarbeit thematisiert. Sie enthalten ebenso Analysen und Bewertungen von Politik, Kultur, Religion, Ethik

und Veränderungsmöglichkeiten von Gesellschaft - eine Erweiterung, die sich gegen eine Vorstellung wendet, Pädagogik sei von Gesellschaft und Politik losgelöst zu behandeln. Scharfsinnig hat Freire u.a. die verheerenden Folgen des Neoliberalismus für Individuum und Gesellschaft analysiert und zum widerständigen Denken und Handeln ermuntert. Eine Auswahl repräsentativer alter und neuer Texte von Paulo Freire: Wer sie zur Hand nimmt, entdeckt rasch, dass uns dieser brasilianische Pädagoge nicht nur für die Theorie und Praxis unserer Erziehungsarbeit, sondern für unser Überleben Entscheidendes zu sagen hat. Prof. Dr. Ulrich Becker, Universität Hannover

Niemand konnte ahnen, wie zerbrechlich unsere Welt ist. Ein Wimpernschlag, und sie ging unter. Doch selbst jetzt, während das Licht der letzten Tage langsam schwindet, geben die Überlebenden nicht auf. Sie haben nicht vergessen, wie wunderschön die Welt war. Sie vermissen all das, was einst so wundervoll und selbstverständlich war, und sie weigern sich zu akzeptieren, dass alles für immer verloren sein soll. Auf ihrem Weg werden sie von Hoffnung geleitet – und Zuversicht. Denn selbst das schwächste Licht erhellt die Dunkelheit. Immer.

The purpose of this study was to determine what the effects of virtual patient simulation instruction are on the learning outcomes of students in an Associate of

Science medical-surgical nursing education course. Using a causal-comparative design, this study fills a gap in the literature and adds to the body of knowledge of this instructional strategy to bridge theory to practice in the classroom. Data were acquired from the HESI Exit Examination™, which is administered the last semester of the nursing program. Data were collected for the Summer 2014 through Spring 2016 academic semesters. Additionally, data were acquired from the HESI Mid-Curricular Exam™ during the Summer 2014 through Spring 2015 academic semesters prior to entering the 2nd year of nursing. A post-course "satisfaction with current learning" subsection of the Student Satisfaction and Self-Confidence in Learning survey was administered to assess student satisfaction with the virtual patient simulation. Participants were undergraduate 2nd-year medical-surgical nursing students at one rural public community college. Test scores were collected for students for the 6 semesters from Summer 2014 to Spring 2016. Students who took the course during Fall 2015 and Spring 2016 also completed the satisfaction survey. To be included in the study, students had a grade point average (GPA) of 2.0 or greater in nursing coursework, and had not failed out of the nursing program or the medical-surgical nursing course. Findings revealed no differences between students who received traditional instruction and virtual patient simulation instruction. Satisfaction with the virtual patient

simulation instruction was mixed, with the Fall 2015 group being undecided and the Spring 2016 group being satisfied based upon the 5-point Likert-type survey. These results support the hypothesis that virtual patient simulation is comparable to traditional instruction. This study provides evidence that virtual patient simulation is as good as traditional clinical instruction in achieving the student learning outcomes in an associate of science in medical-surgical nursing course.

“Nursing school did not adequately prepare me for this role” and “Why didn’t anyone tell me about this when I was a student?” are commonly heard complaints from new nurses during their first two “rite of passage” years following graduation. But this transition to professional practice—fraught with challenges, anxiety, triumphs, and tears—does not have to be so difficult. The Nurse Professional helps novices prepare for their transition into a “real world” role from being a student through graduation, NCLEX success, job search, first job, and beyond. It is the only book to cover all of the steps that new nurses must take to ensure a smooth transition into the professional role. The author is a

nurse educator and mentor with extensive experience in recruiting and orienting nurses. Dr. Hunt is also co-founder of the Nurse Advocacy Forum, providing advocacy, support, networking, professional development, leadership, and mentoring to students and new graduate nurses. She offers sound advice regarding the most current issues facing new nurses and practical strategies for obtaining a job of one's choice, describes steps to take well before graduation to ensure a smooth transition to professional practice, and addresses the various indicators of academic achievement that are required for employment at some nursing facilities. She also discusses the benefits of externships, internships, professional development, and networking, how to develop a winning portfolio, and how to successfully transition into professional practice. This book provides information on workplace bullying and how to deal with it; the importance of self-care, self-advocacy, and networking; writing a résumé; interview skills; and much more. "Top 10 Tips" in each chapter concisely highlight important topics. Samples of useful forms and documents are available in chapter appendices. A PowerPoint presentation and templates for role play/simulation scenarios for faculty use are also available. Key Features:
