If you found maths lessons at school irrelevant and boring, that's because you didn't have a teacher like Bobby Seagull. \*\*\*As seen on Monkman & Seagull's Genius Guide to Britain\*\*\* Long before his rise to cult fandom on University Challenge, Bobby Seagull was obsessed with numbers. They were the keys that unlocked the randomness of football results, the beauty of art and the best way to get things done. In his absorbing book, Bobby tells the story of his life through numbers and shows the incredible ways maths can make sense of the world around us. From magic shows to rap lyrics, from hobbies to outer space, from fitness to food – Bobby's infectious enthusiasm for numbers will change how you think about almost everything. Told through fascinating stories and insights from Bobby's life, and with head-scratching puzzles in every chapter, you'll never look at numbers the same way again.

This book studies the cultural framework of the connections between homeownership and social stability in Hong Kong. In the post-war period, homeownership became the most preferable housing choice in developed societies, such as Australia, Britain, Japan, Spain, and the United States. In the financialization era, its proliferation aggregated enormous wealth and debt in the housing and mortgage markets, affecting social stability by creating inequality and housing unaffordability. Hong Kong is the most extreme example of this among developed societies – in recent years, the city has made international headlines both for its housing problem and its social instability. By studying the history of homeownership in Hong Kong over a period of four decades, Chung-kin Tsang proposes that homeownership is inseparable from the social imagination of the future, conceptualizing this framework as "hope mechanism". This perspective helps trace the connections between 'House Buying' as a hope mechanism – one which is central to subject formation, life goals, and temporal mapping for socially shared life planning – and social stability. Given its unique approach, specifically its use of "hope" as an analytical category, this book will prove to be a useful resource for scholars in economic culture and financialization, and Asian Studies, especially those working on the cultural, sociopolitical, and economic history of Hong Kong.

Notions of Neutralities examines the concept of neutrality at the international level over the last millennium. The eleven contributors approach the topic from multiple disciplinary perspectives and examine neutrality in several regions and time periods. They demonstrate that neutrality always was and still is an active and essential part of the international system.

"Dear Brother," Jane Manning James wrote to Joseph F. Smith in 1903, "I take this opportunity of writing to ask you if I can get my endowments and also finish the work I have begun for my dead.... Your sister in the Gospel, Jane E. James." A faithful Latter-day Saint since her conversion sixty years earlier, James had made this request several times before, to no avail, and this time she would be just as unsuccessful, even though most Latter-day Saints were allowed to participate in the endowment ritual in the temple as a matter of course. James, unlike most Mormons, was black. For that reason, she was barred from performing the temple rituals that Latter-day Saints believe are necessary to reach the highest degrees of glory after death. A free black woman from Connecticut, James positioned herself at the center of LDS history with uncanny precision. After her conversion, she traveled with her family and other converts from the region to Nauvoo, Illinois, where the LDS church was then based. There, she took a job as a servant in the home of Joseph Smith, the founder and first prophet of the LDS church. When Smith was killed in 1844, Jane found employment as a servant in Brigham Young's home. These positions placed Jane in proximity to Mormonism's most powerful figures, but did not protect her from the church's racially discriminatory policies. Nevertheless, she remained a faithful member until her death in 1908. *Your Sister in the Gospel* is the first scholarly biography of Jane Manning James or, for that matter, any black Mormon. Quincy D. Newell chronicles the life of this remarkable yet largely unknown figure and reveals why James's story changes our understanding of American history.

The American dream of equal opportunity is in peril. America's economic inequality is shocking, poverty threatens to become a heritable condition, and our healthcare system is crumbling despite ever increasing costs. In this thought-provoking book, Edward D. Kleinbard demonstrates how the failure to acknowledge the force of brute luck in our material lives exacerbates these crises leading to warped policy choices that impede genuine equality of opportunity for many Americans. *What's Luck Got to Do with It?* combines insights from economics, philosophy, and social psychology to argue for government's proper role in addressing the inequity of brute luck. Kleinbard shows how well-designed public investment can blunt the worst effects of existential bad luck that private insurance cannot reach and mitigate inequality by sharing the costs across the entire risk pool, which is to say, all of us. The benefits, as Kleinbard shares in a wealth of data, are economic as well as social a more

inclusive economy, higher national income, and greater life satisfaction for millions of Americans. Like it or not, our lives and opportunities are determined largely by luck. Kleinbard shows that while we can't undo every instance of misfortune, we can offer a path to not just a fairer America, but greater economic growth, more broadly shared.

Originally the Venda Building Society, VBS Mutual Bank was a small, little-known lender in Limpopo before it rocketed from obscurity in 2016 by giving President Jacob Zuma a controversial home loan to repay the state for improvements to his Nkandla homestead. The bank was growing rapidly and sold itself as a fearless champion of black advancement. Its main shareholder, Vele Investments, was on a meteoric trajectory towards becoming a financial conglomerate worthy of national attention. When the bank abruptly went into curatorship in March 2018, no one had any reason to doubt that it was just another unfortunate corporate failure. Then the astonishing truth emerged: the collapse of VBS was due to an epic R2-billion fraud that had created Vele's empire out of thin air and left the bank a hollow shell. *VBS: A Dream Defrauded* unravels the fraud, exploring how suspected mastermind Tshifhiwa Matodzi and his associates first took control of VBS, fed ANC patronage networks and operated under a nationalist mantle endorsed by Venda royalty. The book explains how the bank and its shareholder Vele were seemingly built into a multibillion-rand business, exposes the political machinations that guaranteed VBS up to R3.5 billion in unlawful funding from municipalities and other state institutions, and describes the free-for-all that ensued after the bank's collapse, when all involved tried to cover their tracks. Written by one of the journalists who first broke the story, this book draws on interviews with VBS insiders and other role-players, as well as documents and detailed forensic evidence collected in the course of two years of investigations. This is a compelling account of a bank heist whose shockwaves continue to haunt the politicians, businessmen and traditional leaders who enabled it.

This is the first book to focus on the significance of religion during President Obama's years in the White House. Addressing issues ranging from identity politics, immigration, income inequality, Islamophobia and international affairs, *Religion in the Age of Obama* explores the religious and moral underpinnings of the Obama presidency and subsequent debates regarding his tenure in the White House. It provides an analysis of Obama's beliefs and their relationship to his vision of public life, as well as the way in which the general ethos of religion and non-religion has shifted over the past decade in the United States under his presidency. Topics include how Obama has employed religious rhetoric in response to both international and domestic events, his attempt to inhabit a kind of Blackness that comforts and reassures rather than challenges White America, the limits of Christian hospitality within U.S. immigration policy and the racialization of Islam in the U.S. national imagination. *Religion in the Age of Obama* shows that the years of the Obama presidency served as a watershed moment of significant reorganization of the role of religion in national public life. It is a timely contribution to debates on religion, race and public life in the United States.

The SADC Protocol on Gender and Development is the only sub-regional instrument in the world that brings together global and continental commitments to gender equality in one instrument used to enhance accountability. The Southern African Gender Protocol Alliance is a network of country and regional NGOs that campaigned for the Protocol, its updating, implementation and tracking. Originally aligned to the Millennium Development Goals that expired in 2015, SADC Gender Ministers updated the Protocol and aligned it to the Sustainable development Goals (SDGs), Beijing Plus Twenty and the Africa Agenda 2063 in 2016. In July 2017, the Ministers adopted a Monitoring, Evaluation and Results Framework (MERF) that is now the basis of reporting. 2018 marks the tenth anniversary of the SADC Gender Protocol and the Barometer. Moving with the times, the Alliance has expanded the two yardsticks in the Barometer: the SADC Gender and Development Index (SGDI) and the Citizen Score Card (CSC). The Barometer incorporates many MERF and SDG indicators, as well as

its own unique measures of voice, choice and control. The Barometer also introduces the Gender Responsive Assessment of Constitutions and Laws conducted by Alliance experts and networks around the region. A wealth of data, insights and analysis awaits all readers of the Barometer, that will also be made available online and in multi-media formats. The “SADC we want” is one in which citizens engage; step it up for gender equality, and make sure we achieve Planet 50/50 by 2030!

Arrogance plays a problematic role in organizations, and it is a unique and difficult challenge to address. Taking proper steps towards recognizing and measuring the effect of arrogance in job performance becomes an important step in improving workplace environments. Analyzing Workplace Arrogance and Organizational Effectiveness: Emerging Research and Opportunities provides emerging research on the effects entitlement and superiority have in the workplace, particularly from those in managerial and administrative positions. Highlighting a range of pertinent topics, such as contextual performance, strategic scope, and workplace arrogance scale, this book is an important resource for academics, researchers, students, and managers seeking current research on the relationship between performance and arrogance in the workplace.

In New York and London during World War I, the performance of lieder—German art songs—was roundly prohibited, representing as they did the music and language of the enemy. But as German musicians returned to the transatlantic circuit in the 1920s, so too did the songs of Franz Schubert, Hugo Wolf, and Richard Strauss. Lieder were encountered in a variety of venues and media—at luxury hotels and on ocean liners, in vaudeville productions and at Carnegie Hall, and on gramophone recordings, radio broadcasts, and films. Laura Tunbridge explores the renewed vitality of this refugee musical form between the world wars, offering a fresh perspective on a period that was pervaded by anxieties of displacement. Through richly varied case studies, *Singing in the Age of Anxiety* traces how lieder were circulated, presented, and consumed in metropolitan contexts, shedding new light on how music facilitated unlikely crossings of nationalist and internationalist ideologies during the interwar period.

Not one but two civil rights movements flourished in mid-twentieth-century Texas, and they did so in intimate conversation with one another. Far from the gaze of the national media, African American and Mexican American activists combated the twin caste systems of Jim Crow and Juan Crow. These insurgents worked chiefly within their own racial groups, yet they also looked to each other for guidance and, at times, came together in solidarity. The movements sought more than integration and access: they demanded power and justice. *Civil Rights in Black and Brown* draws on more than 500 oral history interviews newly collected across Texas, from the Panhandle to the Piney Woods and everywhere in between. The testimonies speak in detail to the structure of racism in small towns and huge metropolises—both the everyday grind of segregation and the haunting acts of racial violence that upheld Texas’s state-sanctioned systems of white supremacy. Through their memories of resistance and revolution, the activists reveal previously undocumented struggles for equity, as well as the links Black and Chicana organizers forged in their efforts to achieve self-determination.

This book explores the convergence of gender, race, and social identities in the often-exclusionary arena of American politics. Contributors examine contemporary issues as they relate to candidate positioning, acceptance, and clashing ideologies that pervade America’s political landscape.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States* (1789-1824), the *Register of Debates in Congress* (1824-1837), and the Congressional

Against the backdrop of a politically approved view that Europeans did little to further the Zimbabwean nationalist freedom movements before Independence in 1980, this book will help to nail that misconception against a wall. The story of Garfield Todd and his various roles as Christian missionary, liberal prime minister of southern Rhodesia, high-profile opponent of UDI and its architect Ian Smith from 1965 to 1980, will surely be an eye-opener for many young people in central and southern Africa, who may never have heard of this great man who spent his life in education and public service. The role of Garfield Todd and some of the people who worked with him has been effectively airbrushed from the pages of the official Zimbabwean story. Why? is the question. Susan Woodhouse gives us the answer by telling the story of a small but influential group of men and women who dared swim against the racial current in Africa after the Second World War. Its a story told with warmth, personal insight and often great humour. This Edinburgh-based author, who Sir Garfield said knew the Todds better than anyone else, has introduced a small but dedicated group of long forgotten activists to a new generation of readers.

Séances, clairvoyance, and telepathy captivated public imagination in the United States from the 1850s well into the twentieth century. Though skeptics dismissed these experiences as delusions, a new kind of investigator emerged to seek the science behind such phenomena. With new technologies like the telegraph collapsing the boundaries of time and space, an explanation seemed within reach. As Americans took up psychical experiments in their homes, the boundaries of the mind began to waver. *Common Phantoms* brings these experiments back to life while modeling a new approach to the history of psychology and the mind sciences. Drawing on previously untapped archives of participant-reported data, Alicia Puglionesi recounts how an eclectic group of investigators tried to capture the most elusive dimensions of human consciousness. A vast though flawed experiment in democratic science, psychical research gave participants valuable tools with which to study their experiences on their own terms. Academic psychology would ultimately disown this effort as both a scientific failure and a remnant of magical thinking, but its challenge to the limits of science, the mind, and the soul still reverberates today.

America's economy does not currently live up to our country's core values. We are a nation founded on the ideals of coming together across differences to forge a common future. Yet over the past fifty years, our economy has been pulling us apart at unprecedented rates. By allowing top income earners and the wealthiest Americans to hoard wealth like almost never before, we belie what makes our country great. This is a threat to our well-being, our democracy, and our values. Brian C. Johnson combines accessible scholarship on wealth and income inequality in America with deeply personal accounts of six Americans of diverse backgrounds who are each wrestling with what it means to survive and thrive in this new economic world. In so doing, he offers a solution that is as visionary as it

is practical. Dubbed the Citizen Dividend, this revolutionary model assumes that economic growth is built off of the wealth we have created together as a country, and together we all reap its benefits. In *Our Fair Share*, Johnson lays the groundwork for implementing this solution, detailing what the Citizen Dividend is, offering examples of similar existing models, outlining the benefits of such systems, tackling some of the common concerns that arise, and offering a path toward making it a reality. Ultimately, *Our Fair Share* calls on each of us to claim what is uniquely American, building a common future that embraces and celebrates our differences. This is our revolutionary inheritance. May we all benefit from it.

The volume also contains readings on psychology confronting societal challenges with topics including: Culturally relevant personality assessment; Emotion-related self-regulation and Children's social, psychological and academic functioning. This vital resource: Presents readings from presentations that were highlighted at the 31st International Congress of Psychology Includes contributions from an international panel of renowned experts Offers information that compares the minds of primates and contemporary humans, and examines human cognitive capability Contains 24 chapters that explore a wide range of topics presented at the Congress Written for professionals and students in the field, Diversity in Harmony is filled with contributions from noted experts and offers a reflection of the state of psychology in the second decade of the 21st century.

William Sharp (1855-1905) conducted one of the most audacious literary deceptions of his or any time. Sharp was a Scottish poet, novelist, biographer and editor who in 1893 began to write critically and commercially successful books under the name Fiona Macleod. This was far more than just a pseudonym: he corresponded as Macleod, enlisting his sister to provide the handwriting and address, and for more than a decade "Fiona Macleod" duped not only the general public but such literary luminaries as William Butler Yeats and, in America, E. C. Stedman. Sharp wrote "I feel another self within me now more than ever; it is as if I were possessed by a spirit who must speak out". This three-volume collection brings together Sharp's own correspondence – a fascinating trove in its own right, by a Victorian man of letters who was on intimate terms with writers including Dante Gabriel Rossetti, Walter Pater, and George Meredith – and the Fiona Macleod letters, which bring to life Sharp's intriguing "second self". With an introduction and detailed notes by William F. Halloran, this richly rewarding collection offers a wonderful insight into the literary landscape of the time, while also investigating a strange and underappreciated phenomenon of late-nineteenth-century English literature. It is essential for scholars of the period, and it is an illuminating read for anyone interested in authorship and identity.

This book makes the legal and political case for Indigenous constitutional recognition through a constitutionally guaranteed First Nations voice, as advocated by the historic Uluru Statement from the Heart. It argues that a constitutional amendment to empower

Indigenous peoples with a fairer say in laws and policies made about them and their rights, is both constitutionally congruent and politically achievable. A First Nations voice is deeply in keeping with the culture, design and philosophy of Australia's federal Constitution, as well as the long history of Indigenous advocacy for greater empowerment and self-determination in their affairs. Morris explores the historical, political, theoretical and international contexts underpinning the contemporary debate, before delving into the constitutional detail to craft a compelling case for change. This new edition of the Routledge Handbook of Gender in South Asia provides a comprehensive overview of the study of gender in South Asia. The Handbook covers the central contributions that have defined this area and captures innovative and emerging paradigms that are shaping the future of the field. It offers a wide range of disciplinary and interdisciplinary perspectives spanning both the humanities and social sciences, focusing on India, Pakistan, Bangladesh and Sri Lanka. This revised edition has been thoroughly updated and includes new chapters, thus adding new areas of scholarship. The Handbook is organized thematically into five major parts: • Historical formations and theoretical framings • Law, citizenship and the nation • Representations of culture, place, identity • Labor and the economy • Inequality, activism and the state The Handbook illustrates the ways in which scholarship on gender has contributed to a rethink of theoretical concepts and empirical understandings of contemporary South Asia. Finally, it focuses on new areas of inquiry that have been opened up through a focus on gender and the intersections between gender and categories, such as caste, ethnicity, sexuality, and religion. This timely study is essential reading for scholars who research and teach on South Asia as well as for scholars in related interdisciplinary fields that focus on women and gender from comparative and transnational perspectives.

Inside the Bubble: Campaigns, Caucuses, and the Future of the Presidential Nomination Process is a behind-the-scenes look at the 2020 Democratic nomination process focusing on the Iowa caucuses and the campaign workers who located there. For decades, Iowa held the first contest in the presidential nomination process and individuals interested in campaign work considered it a "holy grail." But in 2020, a record number of Democrats seeking to unseat President Trump – and the hundreds of young campaign workers who located to Iowa – created a political event unmatched in scope and scale. Those workers, embedded in the caucus bubble, focused for months on finding supporters for their candidate and ensuring they attended their precinct event – the first step in selecting delegates to the national convention. And then Caucus Day came, and with it a technology-driven fiasco that seemed to foreshadow a year of pandemic and protest. The lessons learned in 2020 underscored the importance of local staff who organize and mobilize supporters for a candidate in whom they believe. And those lessons are applicable to any race of any party in any state. For students of US politics as well as aspiring candidates, political journalists, and campaign professionals, this book captures the drama and human perspective of campaigns and elections in America.
