»Ich bin einer von ungezählten Millionen, die durch Nelson Mandelas Leben inspiriert wurden.« Barack Obama Eine fast drei Jahrzehnte währende Gefängnishaft ließ Nelson Mandela zum Mythos der schwarzen Befreiungsbewegung werden. Kaum ein anderer Politiker unserer Zeit symbolisiert heute in solchem Maße die Friedenshoffnungen der Menschheit und den Gedanken der Aussöhnung aller Rassen wie der ehemalige südafrikanische Präsident und Friedensnobelpreisträger. Auch nach seinem Tod finden seine ungebrochene Charakterstärke und Menschenfreundlichkeit die Bewunderung aller friedenswilligen Menschen auf der Welt. Mandelas Lebensgeschichte ist über die politische Bedeutung hinaus ein spannend zu lesendes, kenntnis- und faktenreiches Dokument menschlicher Entwicklung unter Bedingungen und Fährnissen, vor denen die meisten Menschen innerlich wie äußerlich kapituliert haben dürften.

Neoplasms are common in dogs and cats and it has been estimated that 50% of dogs and cats aged over 10 years die of neoplasia. The demand for treatment of pets with cancer is increasing and seems likely to do so for the foreseeable future as more animals become insured and their treatment costs are covered. The purpose of this book is to provide a basic clinical approach to the diagnosis and treatment of the more common tumours in dogs and cats for the practising veterinary surgeon, undergraduate student and veterinary nurse. It is not intended to be a comprehensive reference book, covering all aspects of veterinary oncology, since several such texts exist. Rather it seeks to provide a core of basic, easily accessible and clinically relevant information on general aspects of veterinary oncology. The first three chapters present general background information on pathogenesis, tumour biology, managing the cancer patient and the most frequently used methods of treatment. Practical details of chemotherapy and guidance on safety are given, as well as coverage of radiotherapy. The remaining chapters then provide specific information on the epidemiology, aetiology, pathology, presentation, staging, management and prognosis for tumours occurring in the different body systems.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

“Twenty-twenty hindsight” means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. “I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words.” – Louise Heystek-Emerton: CEO Wordwise/Khuluma Awethu

This book covers novel strategies and state of the art approaches for automated non-invasive systems for early prostate cancer diagnosis. Prostate cancer is the most frequently diagnosed malignancy after skin cancer and the second leading cause of cancer related male deaths in the USA after lung cancer. However, early detection of prostate cancer increases chances of patients' survival. Generally, The CAD systems analyze the prostate images in three steps: (i) prostate segmentation; (ii) Prostate description or feature extraction; and (iii) classification of the prostate status. Explores all of the latest research and developments in state-of-the art imaging of the prostate from world class experts. Contains a comprehensive overview of 2D/3D Shape Modeling for MRI data. Presents a detailed examination of automated segmentation of the prostate in 3D imaging.

Examines Computer-Aided-Diagnosis through automated techniques. There will be extensive references at the end of each chapter to enhance further study.

Enrich your students and the institution with a high-impact practice Designing and Teaching Undergraduate Capstone Courses is a practical, research-backed guide to creating a course that is valuable for both the student and the school. The book covers the design, administration, and teaching of capstone courses throughout the undergraduate curriculum, guiding departments seeking to add a capstone course, and allowing those who have one to compare it to others in the discipline. The ideas presented in the book are supported by regional and national surveys that help the reader understand what's common, what's exceptional, what works, and what doesn't within capstone courses. The authors also provide additional information specific to different departments across the curriculum, including STEM, social sciences, humanities, fine arts, education, and professional programs. Identified as a high-impact practice by the National Survey of Student Engagement (NSSE) and the Association of American Colleges and Universities' LEAP initiative, capstone courses culminate a student's final college years in a project that integrates and applies what they've learned. The project takes the form of a research paper, a performance, a portfolio, or an exhibit, and is intended to showcase the student's very best work as a graduating senior. This book is a guide to creating for your school or department a capstone course that ties together undergraduate learning in a way that enriches the student and adds value to the college experience. Understand what makes capstone courses valuable for graduating students Discover the factors that make a capstone course effective, and compare existing programs, both within academic disciplines and across institutions Learn administrative and pedagogical techniques that increase the course's success Examine discipline-specific considerations for design, administration, and instruction Capstones are generally offered in departmental programs, but are becoming increasingly common in general education as well. Faculty and administrators looking to add a capstone course or revive an existing one need to understand what constitutes an effective program. Designing and Teaching Undergraduate Capstone Courses provides an easily digested summary of existing research, and offers expert guidance on making your capstone course successful.
