ACLS Study Guide - E-Book

Growing out of the collaborative research of an American ethnomusicologist and Zimbabwean musician, Paul F. Berliner's *The Art of Mbira* documents the repertory for a keyboard instrument known generally as mbira. At the heart of this work lies the analysis of the improvisatory processes that propel mbira music's magnificent creativity. In this book, Berliner provides insight into the communities of study, performance, and worship that surround mbira. He chronicles how master player Cosmas Magaya and his associates have developed their repertory and practices over more than four decades, shaped by musical interaction, social and political dynamics in Zimbabwe, and the global economy of the music industry. At once a detailed exposition of the music's forms and practices, it is also an indispensable historical and cultural guide to mbira in a changing world. Together with Berliner and Magaya's compendium of mbira compositions, *Mbira's Restless Dance*, *The Art of Mbira* breaks new ground in the depth and specificity of its exploration of an African musical tradition, and in the entwining of the authors' collaborative voices. It is a testament to the powerful relationship between music and social life—and the rewards of lifelong musical study, performance, and friendship.

This book considers how a combination of place-based writing and location responsive technologies produce new kinds of literary experiences. Building on the work done in the Ambient Literature Project (2016-2018), this books argues that these encounters constitute new literary forms, in which the authored text lies at the heart of an embodied and mediated experience. The visual, sonic, social and historic resources of place become the elements of a live and emergent mise-en-scène. Specific techniques of narration, including hallucination, memory, history, place based writing, and drama, as well as reworking of traditional storytelling forms combine with the work of app and user experience design, interaction, software authoring, and GIS (geographical information systems) to produce ambient experiences where the user reads a textual and sonic literary space. These experiences are temporary, ambiguous, and unpredictable in their meaning but unlike the theatre, the gallery, or the cinema they take place in the everyday shared world. The book explores the potentiality of a new literary form produced by the exchange between location-aware cultural objects, writers and readers. This book, and the work it explores, lays the ground for a new poetics of situated writing and reading practices.
