

## Activity 1 12 Working Toward The Dream

Information on Projects to Advance Creativity in Education in the form of a compilation of planning and operational grants.

Discusses the Dept. of Homeland Security's (DHS) efforts to identify and address barriers to equal employment opportunity (EEO) in its workforce. Since its inception in March 2003, DHS has faced a number of challenges, one of which is effectively and strategically managing its large workforce (about 216,000 employees) to respond to current and emerging 21st century issues. This testimony discusses: (1) the extent to which DHS has taken steps to identify barriers to EEO in the workplace; (2) efforts DHS has taken to address identified barriers and what progress has been reported; and (3) how DHS oversees and supports its components in identifying and addressing barriers. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. We've all heard of "IQ" ...but what's "EQ?" It's "Emotional Quotient" (aka Emotional Intelligence), and experts say that EQ is a greater predictor of success at work than IQ. Companies are increasingly looking for ways to motivate and develop their employees' emotional intelligence. This book presents trainers and coaches with 50 innovative exercises to be used for either individuals or groups. The activities found in the book are grouped according to the various core competencies associated with Emotional Intelligence: \* Self-Awareness and Control: an awareness of one's values, emotions, skills, and drives, and the ability to control one's emotional responses \* Empathy: an understanding of how others perceive situations \* Social Expertness: the ability to build relationships based on an assumption of human equality \* Mastery of Vision: the development and communication of a personal philosophy The book also includes suggested training combinations and coaching tips.

The American political culture that encourages competition on standardized tests, epitomized by the policy of Race to the Top, oversimplifies students' motivation for learning. This dissertation argues that educational research on student learning and activity engagement should consider motives beyond the pursuit of good grades in the classroom, prestigious college credentials, and going to school because it is what students are supposed to do. In particular, the studies highlight the moral inspirations and cultural habits behind students' engagement in life activities, and how inspiration and habits help to direct learning in life. A case study of an ordinary high school senior articulates a common motive to enroll in college to achieve success in life. Comparative case studies contrast emotional experiences with social responsibilities in order to articulate purposes for learning beyond standardized achievement. Findings suggest that volunteer community service, engagements with family, involvement in religious activities, and working for pay could provide inspiration for students to engage in learning in life.

"Developmental work research is an innovative approach to the study and reshaping of work and learning. It expands cultural-historical activity theory by bringing it to the domains of work, technology and organizations. The world of work is in turmoil, increasingly dominated by 'runaway objects' generated by globalization and greed (global markets are such massive objects out of control). Yet it is the object that motivates work and generates visions of better future. The use values of objects have not vanished, although they are more difficult to grasp than perhaps ever before. Developmental work research rediscovers and expands use values in runaway objects. In workplace interventions it engages practitioners in expansive re-forging of the objects of their work."--Cover.
