Das große Buch des Nobelpreisträgers: Eine Programmschrift, die ökonomische Vernunft, politischen Realismus und soziale Verantwortung zusammenführt. Mit diesem Buch hat Sen eine Schneise in die Globalisierungsdebatte geschlagen. Als einer der bedeutenden Wirtschaftstheoretiker der Gegenwart fordert er die Moral in der Marktwirtschaft ein und packt das Weltproblem Nr. 1 an: die sich immer weiter öffnende Schere zwischen dem global agierenden Turbokapitalismus und der zunehmenden Arbeitslosigkeit und Verarmung. Dieses engagierte Buch hat er für die breite Öffentlichkeit geschrieben, eindringlich stellt er dar, daß Freiheit, Gleichheit und Solidarität keine abstrakten Ideale sind, sondern fundamentale Voraussetzungen für eine prosperierende, gerechte Weltwirtschaft.

Wir erwarten von unseren Richtern, dass sie ehrlich und weise handeln. Ihre Integrität und Neutralität sind das Fundament, auf dem unser Rechtssystem ruht. Wir vertrauen darauf, dass sie für faire Prozesse sorgen, Verbrecher bestrafen und eine geordnete Gerichtsbarkeit garantieren. Doch was passiert, wenn sich ein Richter bestechen lässt? Lacy Stoltz, Anwältin bei der Rechtsaufsichtsbehörde in Florida, wird mit einem Fall richterlichen Fehlverhaltens konfrontiert, der jede Vorstellungskraft übersteigt. Ein Richter soll über viele Jahre hinweg Bestechungsgelder in schier unglaublicher Höhe angenommen haben. Lacy Stoltz will dem ein Ende setzen und nimmt die Ermittlungen auf. Eins wird schnell klar: Dieser Fall ist hochgefährlich. Doch Lacy Stoltz ahnt nicht, dass er auch tödlich enden könnte.

Band I, Was Schülerinnen und Schüler wissen und können, enthält eine eingehende Analyse der Schülerleistungen in den Bereichen Lesekompetenz, Mathematik und Naturwissenschaften. Außerdem wird erörtert, wie sich diese Leistungen im Vergleich zu früheren PISA-Erhebungen verändert haben.

Printreading for Residential and Light Commercial Construction presents information applicable to the carpentry, electrical, mechanical, and general building trades, and provides authentic printreading experiences using contemporary prints. Single and multifamily dwellings, plus mixed-use and light commercial project plans are covered in the textbook. Specifications describing the building components and construction procedures are also included for two of the projects, the

In response to the need for cross-nationally comparable evidence on student performance, the Organisation for Economic Co-operation and Development (OECD) launched the OECD Programme for International Student Assessment (PISA) in 1997. PISA represents a commitment by governments to monitor the outcomes of education systems through measuring student achievement on a regular basis and within an internationally agreed common framework. It aims to provide a new basis for policy dialogue and for collaboration in defining and implementing educational goals, in innovative ways that reflect judgments about the skills that are relevant to adult life. PISA is a collaborative effort undertaken by its participants--the OECD member countries

as well as over 30 non-member partner economies--to measure how well students, at age 15, are prepared to meet the challenges they may encounter in future life. PISA is designed to collect information through three-yearly assessments and presents data on domain-specific knowledge and skills in "reading", "mathematics" and "science" of students, schools and countries. It combines the assessment of science, mathematics and reading with information on students' home background, their approaches to learning, their learning environments and their familiarity with computers. Student outcomes are then associated with these background factors. Thereby, PISA provides insights into the factors that influence the development of skills and attitudes at home and at school, and examines how these factors interact and what the implications are for policy development. This publication presents the theory underlying the PISA 2009 assessment, including a re-developed and expanded framework for "reading literacy", which incorporates an innovative component on the capacity to read and understand electronic texts, thus reflecting the importance of information and computer technologies in modern societies. It also provides the basis for the assessment of mathematics and science. Within each domain, the knowledge content that students need to acquire is defined, as well as the processes that need to be performed and the contexts in which knowledge and skills are applied. It also illustrates the domains and their aspects with sample tasks. Finally, the theory underlying the context questionnaires is presented. These are used to gather information from students, schools and parents on the students' home background and attitudes, their learning histories and their learning environments at school. Annexes include: (1) Print reading sample tasks; (2) Electronic reading sample tasks; (3) Background questionnaires; and (4) PISA
