This volume provides a comprehensive introduction to foundational topics in sound design for linear media, such as listening and recording; audio postproduction; key musical concepts and forms such as harmony, conceptual sound design, electronica, soundscape, and electroacoustic composition; the audio commons; and sound's ontology and phenomenology. The reader will gain a broad understanding of the key concepts and practices that define sound design for its use with moving images as well as important forms of composed sound. The chapters are written by international authors from diverse backgrounds who provide multidisciplinary perspectives on sound in its linear forms. The volume is designed as a textbook for students and teachers, as a handbook for researchers in sound, media and experience, and as a survey of key trends and ideas for practitioners interested in exploring the boundaries of their profession.

Creative Writing Practice: reflections on form and process explores the craft of creative writing by illuminating the practices of writers and writer-educators. Demonstrating solutions to problems in different forms and genres, the contributors draw on their professional and personal experiences to examine specific and practical challenges that writers must confront and solve in order to write. This book discusses a range of approaches to writing, such as the early working out of projects, the idea of experimentation, of narrative time, and of failure. With its strong focus on process, *Creative Writing Practice* is a valuable guide for students, scholars and practitioners of creative writing.

In the nineteenth century, many American Protestants expected almost limitless, orderly progress as Christianity and democracy spread and as technology and prosperity increased. Yet they also believed that, many centuries hence, after progress had run its course, the Second Coming of Jesus and a supernatural End to the world would occur. If these Protestants had one foot in the world of steamships and the telegraph, the other remained firmly planted in the cosmos of the Apocalypse--a universe where angels poured out vials of wrath, where the dead would rise again, and where the wicked would be cast forever into a lake of burning fire.

In this inspiring and provocative memoir, Caylin Moore tells the against-all-odds story of his rise from cruel poverty in gang-ridden Los Angeles to academic success at Oxford University, with hope as his compass. By all rights, Caylin Louis Moore should be dead, in prison, or stalking the streets of Compton with his fellow gang-members. Instead, he's a Rhodes Scholar, author, speaker, and role model for every kid deprived of hope in downtrodden communities. *A Dream Too Big* is the story of Moore's exodus from one of the most impoverished, gang-infested communities in the United States to the golden, dreaming spires of Oxford, England. After Moore's mother gathered her three young

children and fled an abusive husband of nine years, leaving behind a comfortable middle-class life, Moore found himself in a bewildering and dangerous environment. The family lived in a neighborhood ruled by the Bloods, and Caylin often lay awake at night, terrified by both the sounds of gunfire outside and the scratching of rats and roaches moving in the walls. When Moore's father was convicted of murder and his mother was sexually assaulted in the hospital while recovering from open-heart surgery, Moore was forced to enter adulthood prematurely. Embracing his mother's steely faith in God and education, Moore skirted the gangs and the endemic violence of Compton to excel on the football field and in the classroom. Academics and athletics led to college scholarships, which led to a Fulbright and eventually the Rhodes Scholarship. Along the way, Moore cofounded a student organization that brought college athletes into underserved classrooms as inspirational speakers, role models, and mentors. Moore's eye-opening, inspirational story proves that, contrary to what others told him on his journey, there is no such thing as a dream too big. "A dream too big is a truly special book. Caylin's story is not just inspirational, it is instructional. I have admired him and his journey for a long time; read this book and you'll understand why." --Wes Moore, bestselling author of *The Other Wes Moore*, CEO of Robin Hood "I loved this story of triumph in praise of a sacrificial single mom and a kid who, against all odds, fought hunger-pains and gangs to make a dream-too-big become a dream-come-true. Through gunshots and the temptations of inner city poverty, Caylin Moore laced up his cleats, outran gangs, and caught the 6:00am bus on an empty stomach. A future world-changer, Caylin has penned an inspiring tale that should be mandatory reading for every student, parent, and anyone else interested in the success of those who will shape and define our future." -- Ron Hall, #1 New York Times bestselling author of *Same Kind of Different as Me* and *Workin' Our Way Home*

"This work explores the ways in which the film industry of the early twentieth century influenced the writings of F. Scott Fitzgerald Early chapters examine Fitzgerald's literary adaptation of visual film techniques and aural cinematic concept within him

Who is this Gatsby anyhow? Answering that question, voiced by one of the book's characters, is fundamental to teaching F. Scott Fitzgerald's *The Great Gatsby*. Although there is no simple answer, classroom analysis of this classic American novel can lead to a rich exploration of the colorful yet contradictory period Fitzgerald dubbed the Jazz Age. The novel also prompts considerations of novelistic technique, specifically point of view, characterization, and narrative structure. This volume aims to give instructors of *The Great Gatsby* multiple tools and strategies for teaching the novel and for introducing students to the culture of the 1920s. Part 1, "Materials," reviews the novel's composition history and the scholarly resources related to the novel. In part 2, "Approaches," contributors demonstrate a range of frameworks that usefully inform teaching, from the new historicism to feminist and gender studies to narrative theory. They also examine the novel's complex artistry, variety of motifs and symbol patterns, and cultural and social influences, such as the era's changing racial attitudes, the rise of a new suburban culture, and the dichotomy of East versus West in America.

Ronald Berman, noted Fitzgerald scholar, makes it clear that accepted interpretations of *The Great Gatsby* and of Fitzgerald's work in

general must be changed. Berman demonstrates that Fitzgerald wrote within a vast dialectic, relating the ideas of the twenties to those of the "old America" described in so many of his works.

Background information accompanies the story of a young man, newly rich, who tries to recapture the past and win back his former love, despite the fact that she has married

Exploring the practice of writing through stylistics, Jeremy Scott draws on the work of writers and theorists to show how stylistic techniques can help writers enhance their own fiction. Negotiating the creative-critical crossover, this book helps students develop practical writing skills and a critical awareness of creative possibilities.

America is embroiled in ideological conflict, with the opposing partisan bulwarks of the Left and the Right widening a chasm that threatens the unity of our Republic. The tumult in Washington has radiated into our universities, homes, and relationships — from constitutional threats; to the imposition on free speech; to a sprawling, unelected administrative state, America is at a tipping point. Fortunately, Encounter's Broadside and Intelligence series offer indispensable ammunition for intelligent debate on these critical issues of our time. With a staunch allegiance to the truth, these timely essays resurrect 18th-century pamphleteering to take on everything from the failures of the redistribution of wealth, to the twisting of Title IX, to the dangers of the increasingly unchecked media bias. Saving the Republic, a collection of Encounter interventions, is a necessary resource of critical thought and commonsense on how to safeguard the promise of America. Saving the Republic is edited by Roger Kimball with contributions from Jay Cost, Philip Hamburger, Mollie Ziegler Hemingway, David B. Kopel, Greg Lukianoff, Andrew C. McCarthy, Jared Meyer, James Piereson, Claudia Rosett, Avik Roy, Robert L. Shibley, Michael Walsh, and Kevin D. Williamson. Together these authors make the definitive case for liberty and democratic capitalism at a time when they are under siege from the resurgence of collectivist sentiment.

A critical introduction to the classic Fitzgerald novel, covering such elements as characterization, plot, symbolism, and setting

Provides specific teaching strategies for each chapter and classroom-tested oral, written, drawing, and dramatic activities that help students make meaning out of the novel and engage them in its thematic and affective elements.

This study explores the vestiges of primitive sacrificial rituals that emerge in a group of canonical modernist novels, including *The Turn of the Screw*, *Heart of Darkness*, *The Good Soldier*, *The Great Gatsby*, and *To the Lighthouse*. It argues that these novels reenact a process that achieved its seminal expression in the Genesis story of *The Binding of Isaac*, in which Abraham, having been prevented from sacrificing Isaac, offers up a ram in his place. Modernist reenactments of this pattern present narrators who, although vigorously protesting the victimization of certain characters, unflinchingly seize upon others as their surrogates. Each novel is designed in such a way, however, as to resist the reconstruction of a sacrificial ritual to which its narrator is prone. The resulting tension between the binding and unbinding of ritual persecution dramatizes the paradox that we can neither believe convincingly in the guilt of our scapegoats nor imagine a society that has dispensed with them entirely. Thomas Cousineau is Professor of English at Washington College in Maryland.

Today more and more ethnically, culturally, and linguistically diverse students enroll in our college and university courses. These diverse, multilingual students enrich our campuses and at the same time present challenges. Who are these students? What skills do these diverse students need to be successful in college? How can faculty help them succeed? For faculty in all disciplines seeking answers to these questions, this is an essential book. This text provides practical advice on how to assist these students with academic tasks and how to help them to succeed in the academy.

In a work that spans the twentieth century, Nancy Tomes questions the popular--and largely unexamined--idea that in order to get good health care, people must learn to shop for it. *Remaking the American Patient* explores the consequences of the consumer economy and American medicine having come of age at exactly the same time. Tracing the robust development of advertising, marketing, and public relations within the medical profession and the vast realm we now think of as "health care," Tomes considers what it means to be a "good" patient. As she shows, this history of the coevolution of medicine and consumer culture tells us much about our current predicament over health care in the United States. Understanding where the shopping model came from, why it was so long resisted in medicine, and why it finally triumphed in the late twentieth century helps explain why, despite striking changes that seem to empower patients, so many Americans remain unhappy and confused about their status as patients today.

The Common Core State Standards initiated major changes for language arts teachers, particularly the emphasis on "informational text." Language arts teachers were asked to shift attention toward informational texts without taking away from the teaching of literature. Teachers, however, need to incorporate nonfiction in ways that enhance rather than take away from their teaching of literature. The *Using Informational Text* series is designed to help. In this fourth volume (Volume 1: *Using Informational Text to Teach To Kill a Mockingbird*; Volume 2: *Using Informational Text to Teach A Raisin in the Sun*; Volume 3: *Connecting Across Disciplines: Collaborating with Informational Text*), we offer challenging and engaging readings to enhance your teaching of *Gatsby*. Texts from a wide range of genres (a TED Talk, federal legislation, economic policy material, newspaper articles, and 1920s political writing) and on a variety of topics (income inequality, nativism and immigration, anti-Semitism, the relationship between wealth and cheating, the Black Sox scandal and newspaper coverage, and prohibition) help students answer essential questions about F. Scott Fitzgerald's novel. Each informational text is part of a student-friendly unit, with media links, reading strategies, vocabulary, discussion, and writing activities, and out-of-the-box class activities.

British culture has changed almost beyond recognition since 1956. Angry young men have been displaced by Yuppies, Elvis by the Spice Girls, and meat and two veg by continental cuisine. What is more, as the death of Diana, Princess of Wales showed, the British are now more famous for a trembling lower lip than a stiff upper one. This volume, the last in the series, examines the transformations in literature and culture over the last forty years. An introductory essay provides a context for the following chapters by arguing that although there have been significant changes in British life, there are also profound continuities. It also discusses the rise of 'theory' and its impact on the humanities. Each essay in the volume concentrates on a facet of British culture over the last half century from painting to poetry, from the seriousness of the novel to the postmodern ironies of the computing age. What we get from this selection is not only an informed history of the relations between literature and culture but also a lively sense of cultural change, not least of which is the new found relationship between literature and other arts which ushers us into the new millennium.

Ernest Hemingway, F. Scott Fitzgerald, and William Faulkner stand as the American voice of the Great War. But was it warfare that drove them to write? Not according to Keith Gandall, who argues that the authors' famous postwar novels were motivated not by their experiences of the horrors of war but rather by their failure to have those experiences. These 'quintessential' male American novelists of the 1920s were all, for different reasons, deemed unsuitable as candidates for full military service or command. As a result, Gandall contends, they felt themselves emasculated--not, as the usual story goes, due to their encounters with trench warfare, but because they got nowhere near the real action. Bringing to light previously unexamined Army records, including new information about the intelligence tests, *The Gun and the Pen* demonstrates that the authors' frustrated military ambitions took place in the forgotten context of the unprecedented U.S. mobilization for

the Great War, a radical effort to transform the Army into a meritocratic institution, indifferent to ethnic and class difference (though not to racial difference). For these Lost Generation writers, the humiliating failure vis-a-vis the Army meant an embarrassment before women and an inability to compete successfully in a rising social order, against a new set of people. *The Gun and the Pen* restores these seminal novels to their proper historical context and offers a major revision of our understanding of America's postwar literature.

What does it mean to "fail" in performance? How might staging failure reveal theatre's potential to expand our understanding of social, political and everyday reality? What can we learn from performances that expose and then celebrate their ability to fail? In *Performance Theatre and the Poetics of Failure*, Sara Jane Bailes begins with Samuel Beckett and considers failure in performance as a hopeful strategy. She examines the work of internationally acclaimed UK and US experimental theatre companies Forced Entertainment, Goat Island and Elevator Repair Service, addressing accepted narratives about artistic and cultural value in contemporary theatre-making. Her discussion draws on examples where misfire, the accidental and the intentionally amateur challenge our perception of skill and virtuosity in such diverse modes of performance as slapstick and punk. Detailed rehearsal and performance analysis are used to engage theory and contextualise practice, extending the dialogue between theatre arts, live art and postmodern dance. The result is a critical account of performance theatre that offers essential reading for practitioners, scholars and students of Performance, Theatre and Dance Studies.

Over the past two hundred years, Western North Carolina has evolved from a mountainous frontier known for illicit moonshine production into a renowned destination for craft beer. Follow its story from the wild days of saloons and the first breweries of the 1870s through one of the longest Prohibitions in the nation. Eventually, a few bold entrepreneurs started the first modern breweries in Asheville, and formerly dry towns and counties throughout the region started to embrace the industry. The business of beer attracts jobs, tourists and dollars, as well as mixed emotions, legal conundrums and entrepreneurial challenges. Join award-winning beer writer Anne Fitten Glenn as she narrates the storied history of brewing in Western North Carolina.

? Universities have stood for 900 years in Western culture with most of their institutional structures essentially unchanged. They still serve three basic functions: educating the faculty, teaching students and gathering knowledge. Funding is, and always has been, the main difficulty within universities and most of the problems critics point to can be traced to a lack of it—universities, it seems, are always in crisis. The authors demonstrate that universities are in fact doing well. They generate an immense amount of research and drive the development of new technologies. On the whole, faculty members teach pretty well and students are in fact learning (at least something), and the challenges of inadequate funding are faced with adequate success.

Considering a range of neglected material, this book provides a richer view of how crime and criminality were understood between the wars.

From the author of *Crying*, a witty, wide-ranging cultural history of our attitudes toward work—and getting out of it Couch potatoes, goof-offs, freeloaders, good-for-nothings, loafers, and loungers: ever since the Industrial Revolution, when the work ethic as we know it was formed, there has been a chorus of slackers ridiculing and lampooning the pretensions of hardworking respectability. Reviled by many, heroes to others, these layabouts stretch and yawn while the rest of society

worries and sweats. Whenever the world of labor changes in significant ways, the pulpits, politicians, and pedagogues ring with exhortations of the value of work, and the slackers answer with a strenuous call of their own: "To do nothing," as Oscar Wilde said, "is the most difficult thing in the world." From Benjamin Franklin's "air baths" to Jack Kerouac's "dharma bums," Generation-X slackers, and beyond, anti-work-ethic proponents have held a central place in modern culture. Moving with verve and wit through a series of fascinating case studies that illuminate the changing place of leisure in the American republic, *Doing Nothing* revises the way we understand slackers and work itself.

This book brings together researchers with cognitive-scientific and literary backgrounds to present innovative research in all three variations on the possible interactions between literary studies and cognitive science. The tripartite structure of the volume reflects a more ambitious conception of what cognitive approaches to literature are and could be than is usually encountered, and thus aims both to map out and to advance the field. The first section corresponds to what most people think of as "cognitive poetics" or "cognitive literary studies": the study of literature by literary scholars drawing on cognitive-scientific methods, findings, and/or debates to yield insights into literature. The second section demonstrates that literary scholars needn't only make use of cognitive science to study literature, but can also, in a reciprocally interdisciplinary manner, use a cognitively informed perspective on literature to offer benefits back to the cognitive sciences. Finally, the third section, "literature in cognitive science", showcases some of the ways in which literature can be a stimulating object of study and a fertile testing ground for theories and models, not only to literary scholars but also to cognitive scientists, who here engage with some key questions in cognitive literary studies with the benefit of their in-depth scientific knowledge and training.

This carefully compiled collection includes ten of the greatest novels of all time about the plight of married women. Scott Fitzgerald *The Great Gatsby* Nathaniel Hawthorne *The Scarlet Letter* Leo Tolstoy *Anna Karenina* Gustave Flaubert *Madame Bovary* William Makepeace Thackeray *Vanity Fair* Willa Cather *My Antonia* Henry James *The Portrait of a Lady* Anne Bronte *The Tenant of Wildfell Hall* Mary Elizabeth Braddon *Lady Audley's Secret* Virginia Woolf *Mrs Dalloway in Bond Street*

Camera Works is about the impact of photography and film on modern art and literature. For many artists and writers, these new media offered hope of new means of representation, neither linguistic nor pictorial, but hovering in a kind of utopian space between. At the same time, the new media introduced a dramatic element of novelty into the age-old evidence of the senses. For the avant-garde, the challenges of the new media were the modern in its most concentrated

form, but even for aesthetically unadventurous writers they constituted an element of modern experience that could hardly be ignored. Camera Works thus traces some of the more utopian projects of the transatlantic avant-garde, including the Readie machine of Bob Brown, which was to turn stories and poems into strips of linguistic film. The influence of photography and film on the avant-garde is traced from the early days of Camera Work, through the enthusiasm of Eugene Jolas and the contributors to his magazine transition, to the crisis created by the introduction of sound in the late 1920s. Subsequent chapters describe the entirely new kind of sensory enjoyment brought into modern American fiction by the new media. What Fitzgerald calls "spectroscopic gayety," the enjoyable disorientation of the senses by machine perception, turns out to be a powerful force in much American fiction. The revolutionary possibilities of this new spectatorship and its limitations are pursued through a number of examples, including Dos Passos, James Weldon Johnson, and Hemingway. Together, these chapters offer a new and substantially different account of the relationship between modern American literature and the mediatized society of the early twentieth century. With a comprehensive introduction and detailed particular readings, Camera Works substantiates a new understanding of the formal and historical bases of modernism. It argues that when modern literature and art respond to modernity, on a formal level, they are responding to the intervention of technology in the transmission of meaning, an intervention that unsettles all the terms in the essential relationship of human consciousness to the world of phenomena.
