Die Selbstbetrachtungen des römischen Kaisers Marc Aurel zählen zu den Monumenten der Weltliteratur. Neben den Briefen Senecas und den ethischen Handreichungen Epiktets sind sie zudem eines der schönsten und wertvollsten Zeugnisse stoischer Philosophie. Völlig missverstanden als Lehre der Gefühllosigkeit, offenbart die Stoa aus diesen literarischen Miniaturen ihr wahres Wesen: Marc Aurel führt den Leser durch die Hallen einer unvergleichlichen Schule der Lebensweisheit, höherer menschlicher Bildung und geistiger Kultur. Einziges Hauptfach ist hier die Humanität, Lehrmeister aber ist der Kaiser selbst, welcher freigiebigst an den Früchten seiner Lebensstudien teilhaben lässt. Wer auch immer nach Veredelung seines Selbst strebt, wird diese Kleinodien der antiken Philosophie mit reichstem Gewinn lesen.

An essential handbook that provides a step-by-step guide to the use of colour for GIS users and cartographers. All GIS users face the task of visualising the results of complex analysis, but the wealth of options available can be overwhelming. Even if a user manages to pick suitable colours on screen, the printed result often proves inaccurate and

unusable. Brown and Feringa have put together a concise guide to the use of colour for all GIS users, cartographers and those involved in remote sensing. The handbook explains the importance of colour, how it can be input, then manipulated, and most importantly, displayed. The authors also include an essentail colour chart produced by the ITC - this colour chart is the definitive version used by GIS users worldwide.

An easy-to-use, easy-to-understand handbook shows how digital cameras and scrapbooking can be a match made in heaven, because the ultimate tool for storing, manipulating, and displaying photos and graphics is on the computer. Original.

This book collects ECM research from the academic discipline of Information Systems and related fields to support academics and practitioners who are interested in understanding the design, use and impact of ECM systems. It also provides a valuable resource for students and lecturers in the field. "Enterprise content management in Information Systems research – Foundations, methods and cases" consolidates our current knowledge on how today's organizations can manage their digital information assets. The business challenges related to organizational information management include reducing search times, maintaining information quality, and complying with reporting obligations and standards. Many of these challenges are well-known in information management, but because of the vast quantities of information being generated today, they are more difficult to deal with than ever. Many companies use the term "enterprise content management" (ECM) to refer to the management of all forms of information, especially unstructured information. While ECM systems promise to increase and maintain information quality, to streamline content-related business processes, and to track the lifecycle of information, their implementation poses several questions and challenges: Which content objects should be put under the control of the ECM system? Which processes are affected by the implementation? How should outdated technology be replaced? Research is challenged to support practitioners in answering these questions.

This Element seeks to demonstrate how ceramics, a data set that is more typically identified with chronology than social analysis, can forward study of Egyptian society writ large. This Element argues that the sheer mass of ceramic material indicates the importance of pottery to Egyptian life. Ceramics form a crucial dataset with which Egyptology must critically engage, but which require us to also engage with statistical thinking and anthropological theory, and which necessitate working with the Egyptian past using a more fluid theoretical toolkit. This Element will demonstrate how ceramics may be employed in social analyses through a focus on four broad areas of inquiry: regionalism; ties between province and state,

elite and non-elite; domestic life; and the relationship of political change to social change. While the case studies largely come from the Old through Middle Kingdoms, the methods and questions may be applied to any period of Egyptian history.
