

Bear Wants More The Bear Books

From picture books to chapter books, YA fiction and nonfiction, Nancy Pearl has developed more thematic lists of books to enjoy. The Book Lust audience is committed to reading, and here is a smart and entertaining tool for picking the best books for kids. Divided into three sections—Easy Books, Middle-Grade Readers, and Young Adult—Nancy Pearl makes wonderful reading connections by theme, setting, voice, and ideas. For horse lovers, she reminds us of the mainstays in the category (Black Beauty, Misty of Chincoteague, etc.) but then in a creative twist connects Mr. Revere and I to the list. In a list called Chapter One, she answers the proverbial question: which chapters books are the most compelling for kids who are now ready to move beyond picture books. And who says picture books aren't deep? Recommended Folk Tales sort out many of life's dilemmas and issues of good and bad; a selection of picture books on Death and Dying introduces this topic with sensitivity; and You've Got a Friend offers up books for early readers that show the complexities and the pleasures of relating to others. Parents, teachers, and librarians are often puzzled by the unending choices for reading material for young people. It starts when the kids are toddler and doesn't end until high-school graduation. What's good, what's trash, what's going to hold their interest? Nancy Pearl, America's favorite librarian, points the way in Book Crush.

Fresh, fun ideas for children's storytime fill this book. The author is a long-time storytime facilitator and has put together 52 weekly themes plus additional holidays, all with detailed instructions for talking about the theme and choosing the books, crafts, songs, poems, games and snacks. Each storytime idea is illustrated with photographs of the craft and snack for easy reference. Libraries, bookstores, preschools and parents alike can use this book to offer themed storytimes that include discussion, literature, art, music, movement and food. Options are provided for each storytime, so the ideas can be used year after year.

Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. Two Books are Better Than One: Reading and Writing (and Talking and Drawing) Across Texts in K-2 helps teachers meet those demands. Each chapter contains an anchor lesson focused on a different way of connecting texts, including: by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds; shared reading and writing; scaffolded small group reading; accountable talk; close reading; and opinion, narrative, and explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

With a foreword by Peter Rollins and an afterword by Thomas J. J. Altizer, Too Good to be True is a collection of sermons written and preached from a radical theology perspective, which demonstrate preaching in a post-Christendom, post-'God' world. These sermons were actually preached in a mainline church in the US. The sermons follow the liturgical and lectionary year A, so clergy may use the books for their own preaching and easily reference it in their professional work.

As more and more people crowd onto less and less land, incidences of human-wildlife conflicts will only increase. A comprehensive overview of this emerging field, Resolving Human-Wildlife Conflicts: The Science of Wildlife Damage Management discusses the issues facing wildlife managers and anyone else dealing with interactions between wildlife and humans. By defining the discipline of wildlife damage management, this book fills a void in the fields of wildlife management and ecology. The director of the Jack H. Berryman Institute, the only academic institute devoted to wildlife damage management, author Michael Conover is the leader in this field. In this book, he stresses the inter-relatedness of wildlife damage management within the larger discipline of wildlife conservation and provides an extensive review of the scientific literature. He includes case-studies that document how an integrated approach to wildlife management can resolve wildlife-human conflicts. Nowhere else will you find the authoritative coverage and depth of theoretical information available in Resolving Human-Wildlife Conflicts: The Science of Wildlife Damage Management. The combination of descriptive prose, historical details, and liberal use of informative sidebars add to its appeal as a textbook, while the organization and scope make it the ideal reference for professionals.
