Competition, the drive for efficiency, and continuous improvement ultimately push businesses toward automation and later towards autonomy. If a business can operate without human intervention, it will minimize its operational cost. If Uber can remove the expense of a driver with an autonomous vehicle, it will provide its service cheaper than a competitor who can't. If an artificially intelligent trading company can search, find, and take advantage of some arbitrage opportunity, then it can profit where its competitors cannot. A business that can analyze and execute in real-time without needing to wait for a human to act, is a business that will be able to take advantage of brief inefficiencies from other markets or businesses. This trend following a thesis that is based on 100 years of proven economic theory. Short-wave economic cycles, those 5- to 10-year cycles, are driven by credit but the long-wave economic cycles, those 50- to 60-year cycles, are driven by technological revolution. We've had 5 cycles over the past 200 years with the last wave, the Age of Information & Telecommunications. We've seen evidence that a new cycle has begun. Technological revolutions come by way of a cluster of new innovations. About a decade ago, you started to see AI, robotics and IoT (sensors) delivering on automation. That's been powerful, but not transformational. It does not force businesses to fundamentally change how they do business. The last piece of the puzzle was cryptocurrency because it allows us to process and transfer economic value without human intervention. Soon, there will be a global race to build autonomous operations. Businesses and organizations without autonomous operations simply will not be able to compete with those that do because ... autonomy is the ultimate competitive advantage. Crypto is the mechanism that will accrue value from being the infrastructure for the next digital financial revolution. Crypto Asset Investing lays out a case that we've begun a new technological revolution similar to the Internet Age of the 1990's. Artificial intelligence, the Internet of Things, robotics and cryptocurrency are converging to deliver on a new age, what I call the Age of Autonomy. Understanding the transformation that's taken place before anyone else can yield enormous investment opportunity. In this book, you'll learn how and why to invest in crypto assets.

In THE AGE OF CRYPTOCURRENCY, Cybermoney is poised to launch a revolution, one that could entirely re-invent traditional financial and social structures while bringing the world's billions of "unbanked" individuals into a new global economy. Cryptocurrency represents the promise of a financial system without a middleman, one owned by the people who use it and one safeguarded from the devastation of a 2008-type crash. Bitcoin became a buzzword overnight. A cyber-enigma with an enthusiastic following, it pops up in headlines and fuels endless media debate. You can apparently use it to buy almost anything from coffee to cars, yet few people seem to truly understand what it is. This raises the question: Why should anyone care about Bitcoin or other? But bitcoin, the most famous of the cybermoneys, brings with it a reputation for instability, wild fluctuation, and illicit business; some fear it has the power to eliminate jobs and to upend the concept of a nation-state. It implies, above all, monumental and wide-reaching change - for better and for worse. But it is here to stay, and you ignore it at your peril. With the knowledge of this book novices start trading at a whole different level than without the book's essential education in advance. "Der Höhepunkt meiner Investitionen in Kryptowährungen war erreicht, als mein Portfolio über 650% im Gewinn gewesen war. Wenig später hatte ich alles wieder verloren. Der Grund war mein Ego, meine Gier, Selbstüberschätzung, der Besitztumseffekt und weitere Faktoren." - Wolfgang Fallmann, Autor Ein großer Teil der Anleger und Investoren verlieren an den Märkten Geld. Wir Menschen glauben, dass wir rationale und gute Entscheidungen treffen können. Leider trifft das auf den Großteil der Menschen und für die meisten Investitions-Entscheidungen nicht zu. Wir lassen uns nur zu oft von uns selbst täuschen und verlassen uns bei unseren Entscheidungen zu sehr auf unsere aktuelle Stimmung, Gefühle und Emotionen. Diese und andere Gründe, verursachen vorhersagbare Fehler im Denken. Diese Fehler führen zu schlechten Entscheidungen und dies wiederum führt zu Verlusten bei unseren Investitionen. Mit diesem Buch werden Sie diese Fehler nicht mehr machen! Der Inhalt des Buches stützt sich auf die wissenschaftlichen Forschungsarbeiten der Verhaltensforscher Daniel Kahneman und Amos Tversky die den Grundstein der Verhaltensökonomik legten sowie dem Ökonom und Psychologen Dan Ariely und weitere Kollegen. Einen Einfluss hat auch der Finanzmathematiker, Risiko- und Zufallsforscher Nassim Nicholas Taleb, der mehr als 20 Jahre als Wertpapier- und Optionenhändler tätig war sowie Ray Dalio, Gründer von "Bridgewater Associates", einen weltweit bekannten und sehr erfolgreichen Hedgefonds. Das erfolgreiche Konzept seiner "Principles" bildet die Quintessenz dieses Buches. Der Autor, Wolfgang Fallmann, ist seit 2014 in Kryptowährungen tätig. Er hat den ersten Bitcoin-Bankomaten Österreichs mitentwickelt, investiert in Kryptowährungen, betrieb Staking und Masternodes. Zuletzt war er CEO einer Altcoin-Mining-Firma. Sein enormes Wissen gibt er in Büchern, Kursen und wöchentlichen Insight Reports weiter.
