Das vorliegende Buch eröffnet den Dialog zwischen zwei Denkern, deren Arbeiten traditionell völlig unverbunden nebeneinander stehen, es wagt den Vergleich zwischen der Philosophischen Anthropologie von Helmuth Plessner (1892-1985) und der Historischen Epistemologie von Georges Canguilhem (1904-1995). Überzeugend weist Thomas Ebke nach, dass den philosophischen Konzeptionen beider Denker eine eigentümliche Dialektik eingeschrieben ist, die auf der einen Seite ihre Äquivalenz garantiert, sie auf der anderen Seite jedoch in eine unendliche Rivalität verwickelt: Diese Dialektik zeigt sich in der Struktur eines "lebendigen Wissens des Lebens". Zugleich erhellt der Autor die enorme Gegenwartsfähigkeit der Einsichten Plessners und Canguilhems. Erst im Rückgang auf das lebendige Wissen des Lebens, das beide Theoretiker je unterschiedlich ausbuchstabieren, entsteht ein überzeugender Ausweg aus den Aporien, von denen die zeitgenössischen Biowissenschaften ebenso heimgesucht werden wie deren philosophische Standardkritiken.

This document consists of five chapters from the eBook Understanding Physical Geography: Chapter 26: Introduction to Life; Chapter 27: Spatial Distribution of Species and Ecosystems; Chapter 28: Biogeochemical Cycling and Ecosystem Productivity; Chapter 29: Soils and Soil Classification; and Chapter 30: Human Alteration of the Biosphere. This eBook was written for students taking introductory Physical Geography taught at a college or university. For the chapters currently available on Google Play presentation slides (Powerpoint and Keynote format) and multiple choice test banks are available for Professors using my eBook in the classroom. Please contact me via email at Michael.Pidwirny@ubc.ca if you would like to have access to these resources. The various chapters of the Google Play version of Understanding Physical Geography are FREE for individual use in a non-classroom environment. This has been done to support life long learning. However, the content of Understanding Physical Geography is NOT FREE for use in college and university courses in countries that have a per capita GDP over \$25,000 (US dollars) per year where more than three chapters are being used in the teaching of a course. More specifically, for university and college instructors using this work in such wealthier countries, in a credit-based course where a tuition fee is accessed, students should be instructed to purchase the paid version of this content on Google Play which is organized as one of six Parts (organized chapters). One exception to this request is a situation where a student is experiencing financial hardship. In this case, the student should use the individual chapters which are available from Google Play for free. The cost of these Parts works out to only \$0.99 per chapter in USA dollars, a very small fee for my work. When the entire textbook (30 chapters) is finished its cost will be only \$29.70 in USA dollars. This is far less expensive than similar textbooks from major academic publishing companies whose eBook are around \$50.00 to \$90.00. Further, revenue generated from the sale of this academic textbook will provide "the carrot" to entice me to continue working hard creating new and updated content. Thanks in advance to instructors and students who abide by these conditions. Der herausragende Debütroman der US-Poetry-Slammerin Elizabeth Acevedo Xiomara hat ihre Worte immer für sich behalten, so wie ihre strenggläubige Mutter es verlangt. In ihrem Viertel in New York übernehmen stattdessen Fäuste das Reden. Doch X hat Geheimnisse: ihre Gefühle für Aman aus ihrer Klasse; ihr Notizbuch voller Gedichte, das sie unter dem Bett versteckt – und ein Slam-Poetry-Club, der all diese Geheimnisse ans Licht bringen wird. Denn auf der Bühne bricht Xiomara schließlich ihr Schweigen und verlangt, von allen gehört zu werden. Für Fans von Angie Thomas und Sarah Crossan Übersetzt von der deutschen Poetry-Slammerin Leticia Wahl

Denken Sie, das Gehirn ist eine perfekte Rechenmaschine, die evolutionäre Krone aller Informationssysteme, die komplexeste Struktur des Universums, präziser und leistungsfähiger als jeder Computer? Vergessen Sie das sofort! Das Gehirn ist ein Haufen voller eitler, fauler und selbstverliebter Zellen, die sich ständig verrechnen und dabei noch permanent von ihren Nachbarn abgelenkt werden. Da hält man es kaum für möglich und doch geschieht das Wunder: Das Gehirn funktioniert! Sehr gut sogar, denn Menschen sind im Gegensatz zu rechnenden Maschinen ausgesprochen kreativ. „Wie das?“, mag man fragen und dieses Buch gibt die Antwort darauf. Fachlich fundiert und locker aufbereitet berichtet der deutsche Science Slam-Meister 2012 Henning Beck über das Zusammenspiel von Nerven- und ihren Helferzellen, erklärt, was ein Geistesblitz überhaupt ist, wie er entsteht und was die Hirnforschung zum Thema Kreativität zu sagen hat.
