First published in 1982, this study explores the dynamics of class formation during the vital decades between 1830 and 1914, when a rising urban industrial order was developing in complex interdependence with a declining rural agrarian order. The book follows the divergent paths of two cities - Birmingham and Sheffield – in their social development. These paths reflect the complex process of conflict and compromise as the 'old' order was gradually replaced by the 'new'. It studies in detail many aspects of social life that were affected by these changes such as education, public administration, political structures, public administration, religion, the professions, popular culture and family. This book will be of interest to those studying Victorian history and sociology.

Die Entstehung der modernen Großstädte im 19. Jahrhundert brachte auf engstem Raum eine völlig neue Welt hervor. Boulevards und Prunkfassaden, neue Verkehrsmittel und neue Kommunikationssysteme sowie die künstliche Beleuchtung veränderten das Raum- und Zeitgefüge der Städterinnen und Städter. Es entstand eine eigene, urbane Kultur und Lebensweise. Manchester, St. Petersburg, Barcelona und München sind die vier faszinierenden, ebenso typischen wie eigenwilligen Metropolen, deren wechselvolle Geschichte Clemens Zimmermann hier vergleichend ausbreitet. Between 1845 and 1855, 2 million Irish men and women fled their famine-ravaged homeland, many to settle in large British and American cities that were already wrestling with a complex array of urban problems. In this innovative work of comparative urban history, Matthew Gallman looks at how two cities, Philadelphia and Liverpool, met the challenges raised by the influx of immigrants. Gallman examines how citizens and policymakers in Philadelphia and Liverpool dealt with such issues as poverty, disease, poor sanitation, crime, sectarian conflict, and juvenile delinquency. By considering how two cities of comparable population and dimensions responded to similar challenges, he sheds new light on familiar questions about distinctive national characteristics--without resorting to claims of "American exceptionalism." In this critical era of urban development, English and American cities often evolved in analogous ways, Gallman notes. But certain crucial differences--in location, material conditions, governmental structures, and voluntaristic traditions, for example--inspired varying approaches to urban problem solving on either side of the Atlantic.

*Cities and Their Vital Systems* asks basic questions about the longevity, utility, and nature of urban infrastructures; analyzes how they grow, interact, and change; and asks how, when, and at what cost they should be replaced. Among the topics discussed are problems arising from increasing air travel and airport congestion; the adequacy of water supplies and waste treatment; the impact of new technologies on construction; urban real estate values; and the field of "telematics," the combination of computers and telecommunications that makes money machines and national newspapers possible.

With the exception of the occasional local case study, music-hall history has until now been presented as the history of the London halls. This book attempts to redress the balance by

setting music-hall history within a national perspective. Kift also sheds a new light on the roles of managements, performers and audiences. For example, the author confutes the commonly held assumption that most women in the halls were prostitutes and shows them to have been working women accompanied by workmates of both sexes or by their families. She argues that before the 1890s the halls catered predominantly to working-class and lower middle-class audiences of men and women of all ages and were instrumental in giving them a strong and self-confident identity. The hall's ability to sustain a distinct class-awareness was one of their greatest strengths - but this factor was also at the root of many of the controversies which surrounded them. These controversies are at the centre of the book and Kift treats them as test cases for social relations which provide fresh insights into nineteenth-century British society and politics.

Located in the heart of England's Lake District, the placid waters of Thirlmere seem to be the embodiment of pastoral beauty. But under their calm surface lurks the legacy of a nineteenth-century conflict that pitted industrial progress against natural conservation—and helped launch the environmental movement as we know it. Purchased by the city of Manchester in the 1870s, Thirlmere was dammed and converted into a reservoir, its water piped one hundred miles south to the burgeoning industrial city and its workforce. This feat of civil engineering—and of natural resource diversion—inspired one of the first environmental struggles of modern times. *The Dawn of Green* re-creates the battle for Thirlmere and the clashes between conservationists who wished to preserve the lake and developers eager to supply the needs of a growing urban population. Bringing to vivid life the colorful and strong-minded characters who populated both sides of the debate, noted historian Harriet Ritvo revisits notions of the

natural promulgated by romantic poets, recreationists, resource managers, and industrial developers to establish Thirlmere as the template for subsequent—and continuing—environmental struggles.

With many new photos and an updated introduction, *The Day John Met Paul*, a critically-acclaimed Beatles book, reappears in a visually stunning second edition.

The book is an hour-by-hour account of the fateful day the two founding Beatles met in July 1957. But it is much more than that: it's a spellbinding story of how fate brought together two men who would radically change the face of popular music, from its look and feel to its sound. Jim O'Donnell, a veteran rock music writer, spent eight years researching *The Day John Met Paul*. Published in 1996 and translated into several languages, the book was widely praised for its blend of accurate reporting and colorful storytelling. Long out of print, but revered among Beatles fans, the new printing enlivens the text with many well-chosen photos of the Liverpool landmarks--from Strawberry Field to Penny Lane--that played a role in the Beatles' lives and works. *The Day John Met Paul* chronicles

the first "Day in the Life" of the Beatles--a day that changed the musical world. Documenting the difficult class relations between women slaveholders and slave women, this study shows how class and race as well as gender shaped women's experiences and determined their identities. Drawing upon massive research in diaries, letters, memoirs, and oral histories, the author argues that the lives of antebellum southern women, enslaved and free, differed fundamentally from those of northern women and that it is not possible to understand antebellum southern women by applying models derived from New England sources.

This work traces the main dimensions of the relationship between central and local government, concentrating upon the role played by law in shaping that relationship. It demonstrates how the issues raised are linked to the system of parliamentary democracy, and to the tradition of public law.

This book is based mainly on the experience of the townland of Ballykilcline, a community of small farmers and laborers living on an obscure estate in the Irish midlands near the provincial market town of Strokestown, County Roscommon. Now in paperback, a three volume thematic interpretation of the development of modern British society from 1750.

Katrina Navickas provides a lively and detailed account of popular politics in Lancashire in this period. She offers fresh insights into the complicated dynamics between radicalism, loyalism, and patriotism, explaining how this heady mix created a politically charged region where both local and national affairs played their part.

In 1981, Liverpool Council ordered the closure of Croxteth Comprehensive School because of falling rolls. The local residents protested, and when this failed occupied the school and for a year ran it themselves with the help of volunteer teachers. Phil Carspecken was one of those volunteers, and this book, first published in 1991, tells the stor

This is the second volume of a two-volume social history of nineteenth-century Hankow, a city of over one million inhabitants and the commercial hub of central China. In the first volume, *Hankow: Commerce and Society in a Chinese City, 1796-1889* (1984), the author emphasized the dynamism of late imperial commerce, the relation of the

metropolis to its hinterland, and the corporate institutions of the city, notably its guilds, which assumed a number of functions we normally attribute to a municipal government. In this volume, the focus is on the people of Hankow, in all their ethnic diversity, occupational variety, and constant mobility, and on the social bonds that enabled this mass of people to live and work in a crowded city with much less disruptive social conflict than occurred in Hankow's counterparts in early modern Europe. Built into the argument of the book is a running comparison nineteenth-century Hankow with such cities as London and Paris in the somewhat earlier period when they, too, were experiencing the growing pains of nascent preindustrial capitalism. How are we to account for the fact that the cities of early modern Europe were so much more prone to protest and social upheaval than Hankow was in a comparable stage of development? The author finds the answer in the cultural hegemony of an activist elite that fostered moral consensus, social harmony, and an aura of solicitude for the well-being of residents at every social level, exemplified in such service institutions as poor relief, firefighting, and public security. Toward the end of the nineteenth century, however, the social bonds that had held Hankow together were beginning to fragment, as social polarization and growing class-consciousness fostered an atmosphere of increasing unrest.

This challenging and original study examines the most important aspects of popular political culture in eighteenth-century Britain. The first part explores the way the British

people could influence existing political institutions or could exploit their existing powers, by looking at the role of the people in parliamentary elections, in a wide range of pressure groups, in their local urban communities, and in popular demonstrations. The second part shows how the British people became increasingly politicised during the eighteenth century and how they tried to shape or defend their political world. The epic story of the rise and fall of the empire of cotton, its centrality to the world economy, and its making and remaking of global capitalism. Cotton is so ubiquitous as to be almost invisible, yet understanding its history is key to understanding the origins of modern capitalism. Sven Beckert's rich, fascinating book tells the story of how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry, combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in the 1780s, these men captured ancient trades and skills in Asia, and combined them with the expropriation of lands in the Americas and the enslavement of African workers to crucially reshape the disparate realms of cotton that had existed for millennia, and how industrial capitalism gave birth to an empire, and how this force transformed the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, workers and factory owners. Beckert makes clear how these forces ushered in the world of modern capitalism,

including the vast wealth and disturbing inequalities that are with us today. The result is a book as unsettling as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist.

In the first full-length treatment of nineteenth-century urbanism from a geographical perspective, Richard Dennia focuses on the industrial towns and cities of Lancashire, Yorkshire, the Midlands and South Wales, that epitomised the spirit of the new age.

This book is the first on the creation, development and influence of popular politics, specifically the role of Political Unions, on the Great Reform Act of 1832. Political Unions and the force of public opinion played a vital role in seeing the Reform Bill through Parliament and setting England on the path of peaceful, legislative reform. Their emphasis on representing the 'industrious' classes linked the Unions to the emerging debates - political and socio-economic - in later Victorian Britain and the evolution of British participatory democracy.

This monograph provides a detailed account of one of England's most important cities at a crucial period in the development of popular democracy. It traces the sectarian conflicts, ethnic tensions and social adjustments of Liverpool as they affected, and indeed still affect, the city's politics. It addresses the historical anomaly of Liverpool's loyalty to the Conservative party; anomalous because the Liberals had a firm grip on power in every other great northern city of the period. Caribbean to the coast of West Africa, the British Atlantic world is deeply interconnected across its regions. In this groundbreaking study, thirteen leading scholars explore the idea of transatlanticism--or a shared "Atlantic world" experience--through the lens of architecture, built spaces, and landscapes in the British Atlantic from the seventeenth century through the mid-nineteenth century. Examining town planning, churches, forts, merchants' stores, state houses, and farm houses, this collection shows how the powerful visual language of architecture and design allowed the people of this era to maintain common cultural experiences across different landscapes while still forming their individuality. By studying the interplay between physical construction and social themes that include identity, gender, taste, domesticity, politics, and race, the authors interpret material culture in a way that particularly emphasizes the people who built, occupied, and used the spaces and reflects the complex cultural exchanges between Britain and the New World.

Politicians, social administrators, economists, biographers and historians have shared the belief that the Charity Organisation Society effectively rationalised relief to the Victorian poor and illustrated the advantages of caring voluntarism over impersonal state handouts. It is now clear that in provincial England these impressions were illusory. The alleged sinful profligacy of other charitable bodies

was persistently condemned by the Charity Organisation Society for fostering latent sin amongst the poor. By exposing how they failed in practice to satisfy their own prescriptions for appropriate poor relief this volume asks whether the Charity Organisation Society were themselves morally equipped to castigate others about sin.

This collection of essays covers the representation and practice of drinking a variety of beverages across eighteenth- and nineteenth-century Britain and North America. The case studies in this volume cover drinking culture from a variety of perspectives, including literature, history, anthropology and the history of medicine.

In this innovative contribution to the field of environmental history, Stephen Mosley explores the devastating human and environmental costs of smoke pollution in the world's first industrial city.

The eighteenth century represents a critical period in the transition of the English urban history, as the town of the early modern era involved into that of the industrial revolution; and since Britain was the 'first industrial nation', this transformation is of more-than-national significance for all those interested in the history of towns. provide a rich variety of perspectives on urban development in the period. The city of Liverpool remains outside the narrative frameworks of modern British history, at the nexus of competing cultural, economic, and political forces. Merseypride explores just how this sense of otherness shapes Liverpoolian identity, a “Merseypride” that changes with the city’s fortunes. Leading academic John Belchem’s second edition of this acclaimed book paints a fascinating picture of a city currently experiencing an extraordinary renaissance. “Belchem is entitled to take pride in this piece of Mersey History.”—History

In this study, Vigier examines the development of pressures and tensions associated with the Industrial Revolution in Liverpool and Manchester, cities with contrasting traditions of local government. Refreshing and insightful, Beatlemania offers a deeper understanding the days of the Fab Four and the band’s long-term effects on the business and culture of pop music.

The two centuries after 1800 witnessed a series of sweeping changes in the way in which Britain was governed, the duties of the state, and its role in the wider world. Powerful processes - from the development of democracy, the changing nature of the social contract, war, and economic dislocation - have challenged, and at times threatened to overwhelm, both governors and governed. Such shifts

have also presented challenges to the historians who have researched and written about Britain's past politics. This Handbook shows the ways in which political historians have responded to these challenges, providing a snapshot of a field which has long been at the forefront of conceptual and methodological innovation within historical studies. It comprises thirty-three thematic essays by leading and emerging scholars in the field. Collectively, these essays assess and rethink the nature of modern British political history itself and suggest avenues and questions for future research. The Oxford Handbook of Modern British Political History thus provides a unique resource for those who wish to understand Britain's political past and a thought-provoking 'long view' for those interested in current political challenges.
