In this post-apocalyptic thriller, a lone survivor in the wasteland of Las Vegas is stalked by a terrifying and mysterious threat. When John Doe wakes up from a coma, he finds himself in an empty hospital. With no memory of who he is or how he got there, he finds remnants of a mysterious, horrific event throughout the facility . . . and throughout the ghost town that was once Las Vegas, Nevada. The roads are packed with abandoned cars, the buildings burned and looted. As John searches for other survivors, he discovers that something sinister is prowling the Strip. The residents and tourists of the once glamorous city have all succumbed to a virus. The infected haven't died, exactly. They are just no longer human . . .

A Symphony of Life Triumph of Education over Adversity A Journey of a Persian - American Woman Through War, Revolution, Love, and Freedom The story of Dr. Redjali, a well known public figure in Iran in the mid-twentieth century, begins in Iran (Persia) during the time of Iran's westernization and modernization spearheaded by Reza Shah Pahlavi at the beginning of the 20th century and follows the social, historical, political turmoil, and educational events of the past seventy years in Iran, in Europe and the United States. Like a symphony, this book is composed of four movements.

Through these movements, the author weaves the notes of her life into melodies of social and historical changes, upheavals, wars, revolutions and peace. She traces her own transition from being part of Iran's ruling class to her job-seeking struggles in the United States. This provides the reader, through the author's firsthand experience with many of the great events of the 20th century, a personal account of Iran's contemporary history and politics, education, along with an eye-witness account of the United States civil rights movement, the women's rights struggle, other important issues related to psychology and mental health, and personal issues such as surviving cancer in the United States. Her story encompasses shifts in the tempos and melodies of life, along with a leitmotiv of love of family, individual freedom, and unwavering hope for humanity. The book illustrates the personal approach the author has adopted throughout her life in coping with and overcoming every adversity through using the power of education. It's also a testament to a woman's ability to balance all the facets of her life- career demands, family responsibilities, emotional needs, and the quest to help

others. This book with historical pictures uniquely covers the period between the rise and the fall of the Pahlavi dynasty, the rise of the Islamic Republic of Iran, and the author's personal life in Europe and the United States. It is supported by extensive research, and expresses a great hope that the longstanding cultural misunderstanding and miscommunication between Iran and the West will soon be replaced with a mutual respect which celebrates the power of individual freedom and democracy.

From the time that the Nets sold Julius Erving to the Philadelphia 76ers upon entering the NBA in 1976, until the point when they acquired Jason Kidd from the Phoenix Suns in a trade in 2001, the Nets were plagued by a series of events that were by turns tragic, ill-timed, unfortunate or just plain self-destructive. At least, until 2002, when so many of the ghosts of a quarter-century of misfortune (and occasional mismanagement) were virtually exorcized. These are the Nets. Their history is like that of no other sports organization in America. So lace up your old nylon Chuck Taylor Converse sneakers, inflate that old red, white and blue basketball you've got sitting in the garage and come join us for a long, strange trip back through Nets lore.

The ancient city itself suffered too - bombardment by French and British artillery, its citizens subjected and exploited by the occupying German forces, then evacuated ahead of the withdrawal to the Hindenburg Line - before its final liberation in October 1918. The book gives details of positions, redoubts, attacks, lines of advance and retreat, with many illustrations provided from local sources. Most of the positions described can still be traced and the sites of some epic events located.

"Mary Johnston's THE LONG ROLL and CEASE FIRING are quite possibly the best Civil War novels ever written..." Cease Firing picks up where Mary Johnston's previous book, The Long Roll leaves off. We rejoin Richard Cleave, the Confederate artillery officer, as he fights to regain his reputation. In the process, he experiences the battles of Vicksburg, Gettysburg, Chickamauga, the Wilderness, Kennesaw Mountain and others. Cleave can sense that the war is being lost; and he is torn between that knowledge and his sense of duty and honor.

Through it all, Johnston's attention to historical detail never falters as we are realistically propelled into Cleave's fascinating world. Prominently featured also is Confederate General Joseph E. Johnston, from whom Mary Johnston is descended.

teaching us how to enjoy life more by spending less. He will show you how to buy less stuff, retire young, and live financially free, while you make a positive difference in people's lives and save the planet along the way. The Ultimate Cheapskate's Road Map to True Riches lays out the practices and principles that have made cheap the new cool. Live within your means at thirty and stay there. The Ultimate Cheapskate was living well on what he earned at thirty, so when he made more money, he saved every penny. Now he is "selfishly" employed, doing work he loves and helping others. Do for yourself what you could have others do for you. Cheapskates are die-hard do-it-yourselfers. It's all about having the right tools, and The Ultimate Cheapskate will get you started. Pinch the dollars and the pennies will pinch themselves. It's not the \$3 cup of coffee; it's the big-ticket decisions that determine whether you'll be financially free. So buy a house, not a castle. The Ultimate Cheapskate's Road Map to True Riches promises a quality of life you cannot buy, a sense of satisfaction you cannot fake, and an appreciation for others and for the planet that gives life value. Open your road map and prepare to discover the true joys of financial freedom.

This monograph presents new ideas in nomic truth approximation. It features original and revised papers from a (formal) philosopher of science who

has studied the concept for more than 35 years. Over the course of time, the author's initial ideas evolved. He discovered a way to generalize his first theory of nomic truth approximation, viz. by dropping an unnecessarily strong assumption. In particular, he first believed to have to assume that theories were maximally specific in the sense that they did not only exclude certain conceptual possibilities, but also that all non-excluded possibilities were in fact claimed to be nomically possible. Now, he argues that the exclusion claim alone, or for that matter the inclusion claim alone, is sufficient to motivate the formal definition of being closer to the nomic truth. The papers collected here detail this generalized view of nomic truthlikeness or verisimilitude. Besides this, the book presents, in adapted form, the relation with several other topics, such as, domain revision, aesthetic progress, abduction, inference to the best explanation, pragmatic aspects, probabilistic methods, belief revision and epistemological positions, notably constructive realism. Overall, the volume presents profound insight into nomic truth approximation. This idea seeks to determine how one theory can be closer to, or more similar to, the truth about what is nomically, e.g. physically, chemically, biologically, possible than another theory. As a result, it represents the ultimate goal of theory oriented empirical science. Theo Kuipers is the author of *Studies in Inductive Probability and*

There is very little information about the Jesus Elevator on the internet. Somehow, even Wikipedia missed it. In this book, you are going to learn about Hartley Somerville, a prairie born-again farmer who purchased a 75 foot tall grain elevator in Eilerslie, Alberta, moved it onto his farmstead and, in 1965, repurposed it into the biggest scripture sign Canada has ever seen. Fourteen years later, with the help of a few volunteers, Henry Vanderpyl undertook the task of renovating the elevator with a new verse. For twenty-four years, its endless

This title was first published in 2003. The history of roads in Great Britain has not been one of steady development, but rather, one that has waxed and waned in response to social, military and economic needs, and also as to whether there have been alternative methods of transport available.

Paralleling this, the technical aspects of road construction - with the one great exception of Roman roads - can be seen as a fitful progression of improvement followed by neglect as the roadmaker has responded, albeit tardily on occasion, to the needs of the road user. This text describes the technical development of British roads in relation to the needs of the time, and thereby touches upon its relation to the history of the country more generally.

In the present day, there is widespread confusion regarding the theological achievements of the Catholic Enlightenment. This book outlines such contributions in the fields of biblical exegesis, church reform, liturgical renewal, and the move toward a more tolerant view of other churches and religions. Since some of the most important Catholic Enlighteners lived in Germany, this book concentrates on their endeavors, but also frequently points to other European players. Only an unpolemical historical assessment of the Catholic

Enlightenment can help us to get out of the current gridlock of interpreting Vatican II: was there a break with tradition, or was there continuity? By reviewing the historical debates that preceded Vatican II, the unknown, marginalized, or deliberately forgotten roots of the conciliar debates come to light that can help us fine-tune future hermeneutical endeavors. This history is hitherto unknown to most researchers. Indeed, it is possibly the most neglected field of modern literary history.

The story of a revolution in moving troops and supplies: "A rare gem that will fill a gap in your World War I library. Highly recommended." —Indy Squadron Dispatch The Great War produced many innovations, in particular the spectacular development by the British and French armies of motor transport. The age-old problem of moving soldiers and their supplies was no different in 1914 than it had been some 2,400 years ago, when the great Chinese military thinker Sun Tzu informed his readers that the further an army marched into enemy territory, the more the cost of transport increased,

even to the point that more supplies were consumed by the transportation of men and their horses than was delivered to the troops. Using many previously unpublished illustrations, including artists' impressions, this book tells the story of the men and women who made motor transport work for the victorious British Army on the Western Front, so that in 1918, the humble lorry did indeed help propel the British Army forward on the road to victory.

The nine contributions in this volume attempt to demonstrate the applications of institutional theory to business history and show how the wider study of the institutional environment is inseparable from the study of business. Contributions include an evaluation of community structure and competitive advantage within the Yorkshire woolen industry; a comparative view of financial reconstruction and industrial reorganization in British and Swedish institutions during the Inter-War period; and post-war strategic capitalism in Norway. The poor health of today's roads--a subject close to the hearts of motorists, taxpayers, and government treasurers around the world--has resulted from faulty incentives that misdirect government decision-makers, according to the contributors to *Street Smart*. System growing by only one seventh the rate of traffic growth. The poor maintenance of existing roads is another concern. In cities around the world, highly political and wasteful government decision-making has led to excessive traffic congestion that has created long commutes, reduced safety, and caused loss of leisure time. Street Smart examines the privatization of roads in theory and in practice. The authors see at least four possible roles for private companies, beyond the well-known one of working under contract to design, build, or maintain governmentally provided roads. These include testing and licensing vehicles and drivers; management of government-owned facilities; franchising; and outright private ownership. Two chapters describe the history of private roads in the United Kingdom and the United States. Contemporary examples are provided of road pricing, privatizing, and contracting out are evident in environs as diverse as Singapore, Southern California, and Scandinavia, and cities as different as Bergen, Norway, and London, England. Finally, several chapters examine strategies for implementing privatization. The principles governing providing scarce resources in free societies are well known. We apply them to such necessities as energy, food, and water so why not to "road space"? The main obstacle to private, or semi-private, ownership of roads is likely to remain the reluctance

of the political class to give up a lucrative source of power and influence. Those who want decisions about road services to be controlled by the interplay of consumers and suppliers in free markets, rather than by politicians, will have to explain the need for change. Street Smart makes a powerful case for the need for change and sheds light on the complex issues involved. Eric Weitz presents a social and political history of German communism from its beginnings at the end of the nineteenth century to the collapse of the German Democratic Republic in 1990. In the first book in English or in German to explore this entire period, Weitz describes the emergence of the Communist Party of Germany (KPD) against the background of Imperial and Weimar Germany, and clearly explains how the legacy of these periods shaped the character of the GDR to the very end of its existence. In Weimar Germany, social democrats and Germany's old elites tried frantically to discipline a disordered society. Their strategies drove communists out of the workplace and into the streets, where the party gathered supporters in confrontations with the police, fascist organizations, and even socialists and employed workers. In the streets the party forged a politics of display and spectacle, which encouraged ideological

pronouncements and harsh physical engagements rather than the mediation of practical political issues. Male physical prowess came to be venerated as the ultimate revolutionary quality. The KPD's gendered political culture then contributed to the intransigence that characterized the German Democratic Republic throughout its history. The communist leaders of the GDR remained imprisoned in policies forged in the Weimar Republic and became tragically removed from the desires and interests of their own populace.
