

Consumer Behavior Solomon

Consumer Behavior, Buying, Having, and Being

Consumers are changing but the marketing categories used to identify them have not. Engage with this new generation of consumers who increasingly take for granted that products and advertising will blend their multiple brand identities rather than market to them as a specific subculture. Male or female, work or play, online or offline. These and other market categories are no longer relevant as modern consumers defy traditional boundaries and identify as members of multiple subcultures. The New Chameleons reveals how to engage with this new generation and how to stand out among the competition. Global consumer behavior expert Michael R. Solomon directs marketers to move beyond their traditional categories and communicate with consumers as individuals rather than as a market segment. He explains how traditional marketing is based on the assumption of boundaries between us and them, the individual and the collective, producer and consumer, work and play, humans vs. computers, and editorial vs. commercial. He then shows how those boundaries are blurring: people identify with members of multiple subcultures; individuals seek collective advice before making a purchase; consumers no longer distinguish between purchases online or in-store; consumer-generated content becomes the norm; gender identity is fluid; gamification strategies turn work into play; and identity marketing becomes more popular. Combining history, data, experience and examples, The New Chameleons is written for every marketer (or reader) who wants to offer products and services that resonate with consumers now and in the future.

For undergraduate and MBA courses in consumer behavior. Solomon goes beyond the discussion of why people buy things and explores how products, services, and consumption activities contribute to shape people's social experiences. Consumer Behaviour: Buying, Having, and Being, Seventh Canadian Edition emphasizes the importance of understanding consumers in formulating marketing strategy. Many (if not most) of the fundamental concepts in marketing are based on the practitioner's ability to know people. After all, if we don't understand why people behave as they do, how can we identify their needs? If we can't identify their needs, how can we satisfy those needs? To illustrate the potential of consumer research to inform marketing strategy, the text contains numerous examples of specific applications of consumer behaviour concepts by marketing practitioners, as well as examples of windows of opportunity where such concepts might be used. 013435267X / 9780134352671 Consumer Behaviour: Buying, Having, and Being, Seventh Canadian Edition Plus MyMarketingLab with Pearson eText -- Access Card Package, 7/e Package consists of: 0133958094 / 9780133958096 Consumer Behaviour: Buying, Having, and Being, Seventh Canadian Edition 0134386167 / 9780134386164 MyMarketingLab with Pearson eText -- Valuepack Access Card -- for Consumer Behaviour: Buying, Having, and Being, Seventh Canadian Edition

The key to marketing is understanding and satisfying consumer needs, thus a knowledge of consumer behavior is essential to any organization dealing with customers, users, or clients. This book promises to be a contemporary classic. It brings together an international set of scholars, many of whom are "household names", to examine the diverse approaches to consumer behavior topics. The editors employ a micro to macro structure, dividing each topic into three parts: one reflecting foundational work, one focused on emerging trends, and one covering practical applications. Each part examines the relationship between consumer behaviour and motivation, including well-being, gender, social class, and more, and concludes with practitioner perspectives on the challenges and opportunities that come with understanding customers. Readers will gain insight into how drives that are constantly in flux relate to other aspects of human cognition and behavior, allowing them to reach customers successfully, and to meet their needs. With contributions from leading scholars, including Sidney Levy and Jagdish Sheth, this volume sets the standard as the most comprehensive, cutting-edge resource on the subject of consumer behavior. Students of consumer behaviour and marketing will find this a useful exploration of a fast-moving field, fundamental to the welfare of companies, government, non-profits, and consumers. It will also benefit new and established academic researchers as well as practitioners who want to stay on top of current knowledge.

The creation and expression of identity (or of multiple identities) in immersive computer-mediated environments (CMEs) is rapidly transforming consumer behavior. Despite this huge potential, however, experts know very little about the best way to talk to consumers in these online environments. How will well-established research findings from the offline world transfer to CMEs? That's where "Virtual Social Identity and Consumer Behavior" comes in. Written by two of the leading experts in the field, it presents cutting-edge academic research on virtual social identity, explores consumer behavior in virtual worlds, and offers important implications for marketers interested in working in these environments. The book provides special insight into the largest and fastest growing group of users - kids and teens. There is no better source for understanding the impact of virtual social identities on consumers, consumer behavior, and electronic commerce.
