The Photoshop Workbook: Professional Retouching and Compositing Tips, Tricks, and Techniques reveals the creative skills that photographer and retoucher Glyn Dewis uses for his global clients. In this guide you will learn not only his step-by-step Photoshop techniques, but how and when to apply them so that you, too, can take your images to a whole new level. Glyn starts by covering the individual Photoshop skills that are the essential building blocks of his process: • Mastering selections and cutouts with the Pen tool and other important tools • Dodging and burning, adding textures, transforming a location, and using the “power of gray” for composites • Applying lighting effects such as spotlights, beams, realistic shadows, reflections, and street lighting to images • Creating special effects, including snow and debris, and turning day into night using a nondestructive workflow It’s one thing to learn the techniques, but to master them you need to understand when to apply them and in what order. In the second part of the book, Glyn brings everything together with his real-world projects. He covers six complete, start-to-finish projects—including all the images for you to download and follow along—that show you how to apply the techniques to a variety of scenarios, including character portraits, themed composites, and a landscape.

This volume includes the digital illustrations of 60 artists, each showing how their image was created. Each artist talks about his working process, on techniques, challenges and inspiration behind each piece. Topics range from the basics like choosing canvas size to technical talk like setting up shaders and bump maps. This is a work flow process book. The illustrations are mainly on scenes, characters, fantasy, sci-fi and a little bit on cartoon style.

Eismann is world known for her talent as a Photoshop expert and photographer, but above all she's considered one of the best teachers her field has ever seen. In this book she uses the tutorial approach that made her two previous Photoshop books bestsellers to take photographers beyond quick tips and gimmicky effects.

The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjectsÑwith all of the textures, colors, shapes, and surfaces they haveÑthen visualize the image as a finished photograph before the photography actually begins. With chapters that thoroughly cover the science of lighting and visualization, photographers can apply that knowledge and successfully create artful images.

It would be rare these days to find a film that did not in some way depend on the magic of visual effects, from the raging computer-generated dinosaurs in Steven Spielberg's Jurassic Park, to the fantastical worlds of Tim Burton's Alice in Wonderland, and the photoreal tiger and ocean in Ang Lee's Life of Pi. Through interviews with 16 of the leading effects pioneers from around the world (see list below), author Ian Failes explores the making of some of the most memorable film sequences ever produced, showcasing the shift from practical to digital magic with original behind-the-scenes imagery, shot breakdowns, and detailed explanations of some of the secrets behind the making of cinema's most extraordinary creations. Visual effects artists and films discussed include: Dennis Muren (Star Wars: Episodes IV–VI; Terminator 2: Judgment Day; Jurassic Park; A.I. Artificial Intelligence; War of the Worlds) Bill Westenhofer (Babe: Pig in the City; Cats & Dogs; The Lion, the Witch and the Wardrobe; The Golden Compass; Life of Pi) Joe Letteri (The Lord of the Rings trilogy; King Kong; Avatar; Planet of the Apes; The Hobbit trilogy) Rob Legato (Apollo 13; Titanic; The Aviator; Hugo) Paul Franklin (Pitch Black; Christopher Nolan's The Dark Knight trilogy; Inception; Interstellar) Richard Edlund (Star Wars: Episodes IV–VI; Raiders of the Lost Ark; Ghostbusters; Multiplicity); Edson Williams (X-Men: The Last Stand; The Curious Case of Benjamin Button; The Social Network; Captain America films) Karen Goulekas (Godzilla; The Day After

As a piece of software, Adobe Photoshop is rare - perhaps alone - in evoking genuine passion from its users. As it evolves, it finds its way into the lives of more and more professional creators, tempting them away from their traditional materials, and expanding their horizons. Yes, it can alter photographs. It can also alter careers. New Masters of Photoshop is a showcase of Masters who use Photoshop, and Masters of Photoshop use. The photographers, animators, artists, and designers assembled here have a myriad of different skills: some manipulate, some animate, some create from scratch. All of them produce remarkable, beautiful things. In these pages, the authors will demonstrate examples of their print work, web work, public work, and private work, explaining the techniques they use to achieve their results. More than that, though, they'll tell you how they think: who their influences are, where their ideas come from, and how they find inspiration when the well has run dry. friends of ED has scoured the world for the leading exponents of Photoshop technique. This book is a gallery of Photoshop practice and theory, backed with essays on the influences and inspirations that lie behind the sharpest digital art in today's media-saturated world. The book deconstructs sophisticated, complex, and astonishing Photoshop graphics, providing motivation, skills and inspiration in equal parts. Support for this book is available on the friends of ED web site (friendsofed.com). From the Publisher Creating a Photoshop image is a process that occurs as much in the head as it does on the screen. Uniquely, New Masters of Photoshop documents it all, from the seeds of an idea, to the outcome on screen, paper, or canvas. The projects include examples of collage and montage that involve manipulation of whole images and tiny fragments - working on a grand scale, and at a pixel-by-pixel level. Layers and masks, with all their subtleties, are used in fascinating ways; and filters are treated with the sensitivity and discretion they require.
