The US Navy's Sumner-Gearing-class destroyers served as a standard for post-WWII destroyer design and development. In this outstandingly illustrated work (bandwidth throughout with a 16-page color center-spread) Sumrall traces the origins and evolution of these destroyers over nearly forty years and through three wars, showing the advances made in ordnance, fire control, and steam engineering. Oorlogsvloot van de Rotterdamsche Lloyd - '40-'45 verhaalt over de bijdrage die de schepen en hun bemanningen van de Rotterdamsche Lloyd leverden tijdens de Tweede Wereldoorlog. Veel van het persoonlijke leven van de zeelieden in die oorlogsjaren is onderbelicht gebleven. Het speelde zich ver van huis en haard af. Het thuisfront verkeerde al die jaren in grote onzekerheid over het lot van hun geliefden. Het enige contact was af en toe een Rode Kruis telegram waarmee een teken van leven werd gegeven. Bijna driehonderd zeelieden van de Rotterdamsche Lloyd verloren het leven.

Anderen kwamen in Jappenkampen terecht. De helft van de Lloyd-vloot ging gedurende de vijandelijkheden ten onder. Dit boek richt aan de hand van uniek archiefmateriaal de schijnwerper op de rol van de mail- en vrachtschepen van de Rotterdamsche Lloyd en van het vlootpersoneel dat op alle wereldzeeën dienstdeed onder de meest moeilijke omstandigheden. De schepen brachten soldaten, oorlogsmaterieel, voedsel en grondstoffen naar de oorlogsgebieden. Vooral in het begin van de oorlog genoten zij een minimum aan bescherming. De zeelieden die aanvankelijk nog op vrijwillige basis waren aangemonsterd, kwamen later onder de verplichtingen van het "Vaarplichtbesluit 1942" te vallen.

George Griffith writes an imaginative futuristic tale about aerial warfare and a new Utopian Colony in the Pacific.

The revolutionary battleship Dreadnought of 1906 brought together in one package the new technology of oil fired boilers and steam turbines, and all-big-gun armament; in doing so she rendered all other capital ships then afloat completely obsolete. Ten years later the V & W Class did to destroyers what the dreadnoughts had done to battleships; they set a completely new and higher standard of technology and were a cut above anything that had come before. They were, however, less revolutionary than evolutionary and in this new book John Henshaw takes the reader through all the developmental stages with a detailed history of the step-by-step lessons that were learnt, not all of which were fortuitous. In one package the Royal Navy finally acquired a hull that possessed not just good sea-keeping capability but one that was able to carry heavier armament without any adverse effects. Range and speed were commensurate with their size while the super-firing guns, fore and aft, could be deployed in all weathers for a four-gun broadside. The V & W design set the trend for all destroyer design for the next two decades and, indeed, the basic layout of destroyers stayed the same long beyond that. The formula of a raised foredeck and superfiring guns fore and aft continued in the Royal Navy until the Battle Class of 1944 and in the United States Navy until the Fletcher Class of 1943. That the V & Ws served on through World War II in various forms is a testament to the soundness of the basic concept, their adaptability and strength. The V stood for Venerable, because they certainly proved that, and W for Watershed, because they were truly a turning point in destroyer design. The narrative is superbly illustrated with forty-five detailed profile and deck plans, for which the author is so well known, of the principal early British destroyer types and illustrates all the V&Ws through to the end of World War II, including some conversions that were considered but never completed. The book also looks at the influence of the basic design on the destroyers of other navies. This new book, which will appeal both to naval historians and modelmakers, brings together under one cover a narrative that is comprehensive in its scope, well researched and elegantly supported with detailed line drawings and selected photographs for the period 1890–1945.

Anne Jenkins is a PE teacher with a girl's hockey team in her charge. How she ends up in a forest on the planet of Ellerkan pursued by Knights in armour with nets and swords she cannot imagine. Knocked out, the next time she wakes up she finds herself in a castle dungeon with the Crown Prince of Halafalon and only half of her girls. Prince Carl was as arrogant as he was charming. But he had a particular habit, a habit that would come close to killing him. Prince Harold had planned a pleasant afternoon on a picnic, now he was despatched by his father, the King, to search for his missing elder brother. It would be another futile venture, ending with Carl being discovered in some tavern, or in the arms of some wench. Lord William L'Roth should have been King. He knew it, and everyone else knew it. Now, when the artifact was complete, he would make it so. Sir Henry L'Crief shared Lord L'Roth's cause, and at one time he would have feared the consequences of his treason against the King. But with his wife at his side and the artifact to call upon, he now feared nothing, not even L'Roth himself. Sir Henry's wife was not his real wife, but she was an unusual lover. Concubine, mistress, some even called her his pet. It was an apt description. She was large, malevolent and ever hungry. She was called Gil-Yan, and she was a dragon. Five years before, Rolf L'Epine had been on a hunt with the Crown Prince. What he saw that day so horrified him that it changed his life forever. Since then, his life had been peaceful. Now that was set to change. Ancient technology, a war that spanned the galaxy and the consequences of a barbaric tradition returned to haunt them all, and even threatened to eat them...

Op weg naar de Zuilen van Axum ontdekt Frank van Rijn al snel dat Ethiopië een mooi land is met mooie marktjes, een mooi klimaat en mooie ruige bergwegen. Op weg naar de Zuilen van Axum ontdekt Frank van Rijn al snel dat Ethiopië een mooi land is met mooie marktjes, een mooi klimaat, mooie ruige bergwegen en mooie kinderen die mooie stenen op een lelijke manier naar zijn hoofd slingeren, als hij niet snel genoeg voldoet aan hun dwingende eis om geld en pennen uit te delen. Op een lange, moeizame klim loopt het, als er in een dorp juist een school uitgaat, nogal uit de hand met de Ethiopische jeugd. Als een alternatieve rattenvanger van Hamelen zwoegt Van Rijn voort met horden op pennen en geld beluste 'students' achter zich aan, maar de rivier uit het sprookje ontbreekt... In deze 'winterreis door Ethiopië' wordt de lezer, bij naar onze maatstaven niet echt winterse temperaturen van 20 à 30° C, meegenomen op een zeventig dagen durende tocht door dit land dat de kwalificatie 'apart' wel verdient. Zeker voor iemand die reist als Frank van Rijn. Marktjes met opdringerige 'gidsen', hotels van twijfelachtige allure, waar de schrijver in zijn argeloosheid zijn intrek neemt, reuzenvogels bij het Ziwaymeer, een afdaling door alle klimaatzones van Afrika, vanaf de koude 4377 m hoge Tulu Deemtu naar de droge, hete savanne, een boottochtje naar de oorsprong van de Blauwe Nijl en de beroemde Ethiopische koffiecereemonie... Zie hier een greep uit de vele onderwerpen die in dit relaas aan de orde komen. Frank van Rijn beschrijft ze op zijn eigen, nu eens geestige, dan weer ironische, maar soms ook dramatische wijze. Een boek om in één ruk uit te lezen.

Het verhaal van de indrukwekkende evacuatie die de loop van de geschiedenis veranderde Mei 1940. Ruim 400.000 Britse en Franse soldaten zijn omsingeld door Duitse troepen aan de kust van Duinkerke. Op bevel van Winston Churchill wordt Operatie Dynamo gestart, een immense evacuatie van de geallieerde troepen over zee, om een 'kolossaal militair drama' te voorkomen. Tussen 27 mei en 4 juni worden meer dan 300.000 soldaten gered van vernietiging door de nazi's. Duinkerke is het verhaal van de soldaten die dagenlang beschoten en gebombardeerd werden op de stranden; van de burgers die te water gingen met veel te vol geladen boten; van de piloten die hun leven riskeerden om hun kameraden op de grond extra tijd te gunnen; en van de ongelukkigen die niet konden ontsnappen. Opgetekend door bestsellerauteur en BBC-programmaschrijver Joshua Levine, biedt Duinkerke een aangrijpend verslag van een bepalende historische gebeurtenis, verteld vanuit het land, de zee en de lucht.

This book explores past expressions of the Jewish interest in Hinduism in order to learn what Hinduism has meant to Jews living mainly in the 12th through the 19th centuries. India and Hinduism, though never at the center of Jewish thought, claim a place in its history, in the picture Jews held of the wider world, of other religions and other human beings. Each chapter focuses on a specific author or text and examines the literary context as well as the cultural context, within and outside Jewish society, that provided images and ideas about India and its religions. Overall the volume constructs a history of ideas that changed over time with different writers in different settings. It will be especially relevant to scholars interested in Jewish thought, comparative religion, interreligious dialogue, and intellectual history.

Vandaag is China de tweede belangrijkste economie van de wereld met aan de leiding Xi Jinping, de machtigste president na Mao Zedong. Xi Jinping werkt aan een hele reeks initiatieven om China naar de absolute top te brengen, zijn ultieme China Dream. Denk maar aan het 'Belt and Road Initiative', de nieuwe 'Silk Road'; 'Made in China 2025', een techno-strategisch plan dat China wetenschappelijk en technologisch wereldleider zal moeten maken; het ruimtevaart- en nucleair programma; de uitbouw van een 'digitale silk road' of het absolute leiderschap in het 5G-gebeuren; een wereldwijd maritiem netwerk; een globaal 'electrical grid' en niet te vergeten de uitbouw van een sterk Chinees leger. Toch is de 'double digit' economische groei inmiddels stilgevallen en wordt voor bijvoorbeeld 2020 de Chinese economische groei nog op slechts 5,9 % geschat. Dat is te laag voor een land dat nog miljoenen jobs moet creëren, die beslist nodig zijn om geen sociale onrusten uit te lokken. China is met de komst van president Trump ook in een 'koudehandelsoorlog' beland met een weinig rooskleurig uitzicht. Ondertussen is China ook zowat de grootste vervuiler geworden van deze planeet met niet meteen goede vooruitzichten. En daarnaast zijn er de problemen met de Chinese periferie: massale protesten in Hongkong die geregeld uit de hand lopen, de militaire verwickelingen in de 'South China Sea', de mogelijke aanhechting van Taiwan, de problemen in Tibet en Xinjiang waar de Oeigoeren massaal in heropvoedingskampen gestoken worden. Uiteraard zal China een economische macht worden, maar daarom nog niet meteen die supermacht. Daartoe zijn er nog te veel elementen die ontbreken en te veel hindernissen die eerst uit de weg geruimd moeten worden. Onmiskenbaar heeft het Westen de voorbije honderd jaar een immens competitief voordeel opgebouwd, dat niet zomaar weg te wuiven valt.
