This is a story about relationships. A story about a man named Iye who has been searching for his soulmate. In order to find his partner he must leave the land of Ego and pass through seven doors of spiritual transformation of souldrama. Each door offers and challenge and a gift upon its completion. Will he complete the journey? Today, we seem to search for meaning and purpose in our lives and begin a spiritual journey as we ask ourselves, "Is this all there is?" What keeps people stuck in relationships, careers, addictions? Souldrama helps us to move past the resistance in our lives preventing us from accessing our higher purpose. Souldrama integrates all three levels of intelligences, our rational, emotional, and spiritual, through a group process that puts spirituality into action. The end result helps us to create spiritually intelligent leadership. Souldrama moves group therapy and psychodrama to another level, that of the transpersonal.

Spiritual intelligence is the platform against which we assess the usefulness of one life path or the need to change the particular direction one's actions are taking. Research in this phenomenon reveals the fact that spiritual intelligence allows collective thought or wholeness in thinking. Consequently, those who employ this particular type of intelligence do not just focus on themselves as the basis for deciding on particular decisions. Instead, they would consider the effect that their actions have on other persons. This type of intelligence makes individuals aware of the fact that they are connected to other human beings.

Two quotients analyze our minds and emotions: I.Q. and E.Q. But Kris Vallotton believes we are ignoring a deeper dimension--spiritual intelligence. Because believers have the mind of Christ through the Holy Spirit, we have the capacity for brilliance. God invites us to embark on a journey of discovery as he reveals mysteries and helps us bring our perspective in line with his--transforming our understanding and endowing us with spiritual intelligence. In this eye-opening new release, pastor and bestselling author Kris Vallotton says that God invites us to think like him. He answers questions such as · What are the five dimensions of spiritual intelligence? · How can I build new neural pathways to supernatural thinking? · How do I recognize my sphere of influence and the borders of my divine assignment? · And much more! As you listen to the Holy Spirit and realize what it means to have the mind of Christ, you have the capacity for life-transforming spiritual intelligence unavailable in any other way.

Each of the articles in this volume focuses upon the connections between a moral and spiritual perspective on life, and the manner in which that outlook is played out in the real world of businesses and organizations.

exploding in terms of published works and expanding in terms of scope. Originally a narrow specialty within emergency medicine, the field now extends to trauma psychology, military psychiatry and behavioral health, post-traumatic stress and stress disorders, trauma social work, disaster mental health, and, most recently, the subfield of history and trauma, with sociohistorical examination of long-term effects and meanings of major traumas experienced by whole communities and nations, both natural (Pompeii, Hurricane Katrina) and man-made (the Holocaust, 9/11). One reason for this expansion involves important scientific breakthroughs in detecting the neurobiology of trauma that is connecting biology with human behavior, which in turn, is applicable to all fields involving human thought and response, including but not limited to psychiatry, medicine and the health sciences, the social and behavioral sciences, the humanities, and law. Researchers within these fields and more can contribute to a universal understanding of immediate and long-term consequences—both good and bad—of trauma, both for individuals and for broader communities and institutions. Trauma encyclopedias published to date all center around psychological trauma and its emotional effects on the individual as a disabling or mental disorder requiring mental health services. This element is vital and has benefited from scientific and professional breakthroughs in theory, research, and applications. Our encyclopedia certainly will cover this central element, but our expanded conceptualization will include the other disciplines and will move beyond the individual.

Spiritual Intelligence refers to the intuitive knowledge of the self, others, situations and techniques to achieve the desired objectives. Hence it can be called the soul of all intelligences. Spiritual Intelligence enhances our power to inspire others by transforming their

souls in such a way that their desires and aspirations are aligned in a single direction. Soul is beyond all reason and intellect. It is, in fact, the source of mind and intellect. One who knows his soul knows the universe, since soul is nothing but the microcosm of the universe. This book explains this body-soul continuum and suggests practical steps to evolve through the body-senses-mind-intellect to reach our soul. Welcome to this new path of spiritual evolution.

Our brains are getting wired differently in the world of digital technology, information revolution, and in the inter-cultural world of global society. Think of the new vocabulary: Global brain, collective intelligence, global village, and cyberspace. That should tell us something about the neural rewiring that is taking place inside of our brains, whether or not we are aware of it. The fact that the human brain changes throughout a person's life in response to intellectual stimulation, physical exercise, exposure to new cultural environments, learning opportunities, and challenges is a revolutionary discovery. Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence. That is the old dogma. There is a "Second Copernican Revolution" taking place inside of our brains, writes the author, quoting Carl Zimmer. Some experts are suggesting that we are already living in what Richard Restack calls the "neurosociety." Ray Kurzweil, the futurist, is predicting that by 2045 A.D., human beings will be living in an era of "singularity," when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times. What is going to be the fate of the human spirit, human spirituality, the feeling of connection to a force and power that is greater

Was treibt uns an im Leben? Unsere spirituelle Intelligenz! Sie lässt uns Regeln brechen, Neuland erobern und führt uns zur Verwirklichung unserer wahren Berufung. Die britische Physikerin und Management-Beraterin Danah Zohar und der Psychiater Ian Marshall zeigen – basierend auf den neuesten Erkenntnissen der Gehirnforschung und der Quantenphysik –, was uns wirklich bewegt. Es ist unsere spirituelle Intelligenz, die uns fragen lässt, wie wir mit unserem Leben einen Unterschied machen und Zeichen setzen können. Dieses "Spirituelle Kapital" lässt uns Konventionen hinterfragen und Regeln brechen. Es motiviert uns, unserem inneren Ruf zu folgen und unserem Bedürfnis nach Selbstentfaltung Ausdruck zu verleihen. Und es nährt unser Motiv, dem großen Ganzen zu dienen und über die individuelle Transformation hinaus einen Quantensprung in Wirtschaft und Gesellschaft anzustoßen. Das Buch zeigt, wie

Before the integration of expert systems in biomedical science, complex problems required human expertise to solve them through conventional procedural methods. Advancements in expert systems allow for knowledge to be extracted when no human expertise is available and increases productivity through quick diagnosis. Expert System Techniques in Biomedical Science Practice is an essential scholarly resource that contains innovative research on the methods by which an expert system is designed to solve complex problems through the automation of decision making through the use of if-then-else rules rather than conventional procedural methods. Featuring coverage on a broad range of topics such as image processing, bio-signals, and cognitive AI, this book is a vital reference source for computer engineers, information technologists, biomedical engineers, data-processing specialists, medical professionals, and industrialists within the fields of biomedical engineering, pervasive computing, and natural language processing.

The need for Afrikan mind regeneration and spiritual reawakening A people who have lost these two principal inner qualities of mind can hardly find their through selves in life. This book is an attempt to begin the processes of African self-rediscovery. The ending of slavery and colonialism removed only our physical agony, but the trauma of long and extended torture left deep rooted anguish within the psyche of African race. The effects of this imprint legacy will continue until we start addressing these negative effects. In an effort to do this, the book has provided several suggestions. Some of the program are being provided at the Institute of Mind Talk Afrika.

This book was developed to present, in a practical way, a new type of view of life. All the concepts of the spiritual vision are presented and I describe how to use them in all sectors of life. I will show you how to base your relationships, interpretations on events and direct your choices in a largely conscious way, knowing and predicting all direct and indirect influences. As a society, we move towards the natural development of perceptions about the experiences that happen. The more we question ourselves, the greater our ability to find subtle

points that influence our thoughts and emotions. We are the result of thousands of imperceptible interactions that increase with each movement of technological development. We live closed in our personal worlds, but totally open to energetic connections that direct our choices and even our desires. The moment we experience a change in perception about reality, we understand that we are living in the shadow of collectives. In order to evolve, we need to disconnect from this unconsciousness and learn to direct our own lives through choices that understand the internal and external world. Each point of personal development generates countless changes in this energy of the Whole. We affect society and it affects us in a gigantic way. Awareness will bring about a profound change in all sectors and relationships of your life. And this is an increasingly broad and satisfying path. All the theories and practices in this book are based on my more than 20 years working and studying spirituality, human development and the application of the concepts of quantum physics in reality. Subjects covered in the book: What is spiritual intelligence? Karmic connections and the experiences of the soul in previous incarnations. Living better. Emotions, thoughts and what they cause in our lives. A broader view of life. Spiritual intelligence in the family. Spiritual intelligence in love relationships. Spiritual intelligence at work. FIRE FOR EFFECT! is more than just a book about the Korean War. It is the untold history of the Korean War Artillery Forward Observer, told by the men themselves. From the earliest days of the war in 1950 through the harrowing battles of 1951 and on into the so-called stalemate' period of the hill battles of 1952 and 1953, into the final climactic battles before the cease fire, the Forward Observer, or FO, was there. Korea was and is known as the Artillery War' because more rounds were fired in Korea than in all of WWII, and it was the job of the FO to direct these rounds onto their targets. FOs are the eyes of the artillery, and the importance of their job in Korea has been largely overlooked until now. Serving as infantrymen, but not being considered one, Forward Observers lived, ate and slept on the front lines, ever ready to respond to an attack, or defend friendly troops and positions, and sometimes losing their lives doing it. The awesome responsibility and firepower that was placed on a 22 or 23 year-old lieutenant or sergeant was staggering, and after reading these first hand accounts, one can easily imagine what these young men faced on a daily basis. With over 100 interviews of Forward Observers, from all time periods and from all locations and battles of the war, the grittiness and reality of what these servicemen went through in the 'Forgotten War' is brought to life so that their

This book addresses how Christian leaders integrate faith into the workplace, through a love-based altruistic system of Christian Servant Leadership Spiritual Intelligence (CSLSI). It hypothesizes how CSLSI positively influences a range of desirable employee attitudes and behaviors including servant leadership and followership, organizational citizenship, and positive stress coping and adaptation strategies. This book embraces an interdisciplinary approach to present the global attributes of CSLSI, which includes following God's will and Golden Rule workplace love expression, with specific workplace applications. The empirical research is supplemented by approximately 100 interviews with Christian leaders providing workplace exemplars and a compelling overview of how Christians honor God in the marketplace. This book will appeal to academics and practitioners in business, psychology, medicine, management, leadership, and theology looking to develop a God-honoring work life. Readers will benefit from the principles and the self-diagnostic surveys that assess spiritual intelligence and ways to enhance it.
