This book seeks to fill the information gap on a key emerging real estate market and demystify the perception that the market in Ghana and indeed, across sub-Saharan Africa is opaque. Drawing on decades of experience from within the market, the author presents a detailed examination of the real estate market in Ghana and its existing regulatory framework. In doing so, he provides a justification for its relevance in the subregion. It focuses on seven thematic areas – land administration, legal perspectives, market dynamics, investment potentials, market competitiveness, valuation and compensation. This book will be a useful resource for students, academia, practitioners, real estate developers, investors and professional advisors such as valuers, surveyors, lawyers, accountants, bankers, architects, planners and engineers. An important feature of this book is the way in which chapters are self-contained, and yet follow logically one from another. With this approach, readers can choose a reading path
