

## Examination Notes In Psychiatry Basic Sciences 2ed Hodder Arnold Publication

This vital new study aid is based on the latest changes in the format of the MRCPsych examination so it is completely up-to-date. It combines both Extended Matching Questions and Individual Statements along with timed practice papers to reflect the structure and content of the exam. In addition, it contains clear, concise solutions to each .....

Brings together and interprets previously hard-to-find texts, new translations and passages detailing the interplay between philosophy and psychopathology.

Studying for the MRCPsych exams can seem a daunting prospect, especially when faced with the vast amounts of literature available to help, but this book offers a complete solution in the form of a thoroughly comprehensive guide to the Part II Exam. Completely up to date and taking in the recent changes to the exam, the book reflects the exam format and content extremely accurately. Written by an experienced examiner with contributions from trainees, the book combines these elements to ensure that it is the perfect revision companion for any psychiatrist preparing for the MRCPsych Part II.

This series is designed to prepare candidates for all three multiple choice question papers in the MRCPsych examination. Each book covers one paper and, in presenting a wide range of practice questions, they aim to teach us as much as to test. Questions are arranged as mock examination papers. They are relevant to the syllabus, and are based on accessible sources, including standard textbooks and key papers, many from the recommended reading list of the Royal College of Psychiatrists. Explanations, notes and references support most answers. ICD-10 and DSM-IV have been adopted. Highly practical guidance is offered on preparing for and sitting the exams. This includes detailed advice on organizing revision and developing the expertise and skills to answer MCQs. In addition, the nature of the exams, the regulations and the principles underlying the construction of MCQs are clearly explained. All these books will enable candidates to rehearse and refine their technique, assess their knowledge and build on it. This basic sciences volume addresses recent changes in the format of the MRCPsych examination and prepares the candidate for what is considered to be the most difficult component of the examination.

Over 90% of contact between patients and doctors takes place in general practice making it a valuable research arena but many members of the primary care team are unaware of the opportunities for them to do research. This book provides information on the research options for individuals and practices and describes research work undertaken recently by GPs and their teams in a variety of practice settings. It is easy to read and assumes no previous knowledge of the subject. It is ideal for GPs and all members of the primary healthcare team especially practice and community nurses GP registrars and pharmacists. Research Opportunities in Primary Care covers everything from being part of a research network to undertaking a higher degree and describes the impact of research involvement on the professional and the practice. Sections of each chapter are written by people actually doing research in this setting to give a "hands on" feel of what it means in practical terms. This new text creates a set of practical notes enhanced by specific examples of service-based activity. It complements Research Methods in Primary Care which introduces the range of relevant skills to provide a solid basis for starting research.

The past decade has seen several revisions to the MRCPsych examinations but the latest changes have been the most radical. It is now a three part written examination along with a clinical assessment of skills and competencies. This has changed the focus of the 'new' MRCPsych Paper I, which now includes two thirds 'one-best-item-from-five' multiple choice questions (MCQs). This collection of 'one-best-item-from-five' style multiple choice questions mirrors the new format for the exam. Its companion volume Extended Matching Items for the MRCPsych Examinations Part 1 by Michael Reilly and Bangaru Raju remains relevant for the new format where EMIs make up one third of the questions. Together, these two guides thoroughly prepare you for the revised format, incorporating the new areas of study such as basic ethics, philosophy and history of psychiatry, and stigma and culture. With varying degrees of question difficulty, a wide-range of styles and topics, and full explanations of answers overleaf, MRCPsych Paper I One-Best-Item MCQs is ideal for examination preparation and self-study.

Reinforce the knowledge, skills and confidence you need to excel in your certification exams. Ensure you're ready for the psychiatry certification exams, both written and oral, offered by the Royal College of Physicians and Surgeons of Canada. Psychiatry Review for Canadian Doctors is the only guide written specifically for the needs of residents studying for the RCPSC psychiatry exams. Psychiatry Review for Canadian Doctors also offers robust extra preparation for other exams, including the psychiatry-resident-in-training exam and certification exams in the United States, the United Kingdom, Australia and New Zealand. Features four practice multiple-choice exams (200 questions total) and 20 OSCE scenarios. Covers all the main topics and question formats you'll find on the exams. Provides answer keys with detailed explanations and list of references for follow-up.

This practical guide provides GPs practice managers and members of the primary care team with the tools to manage the stresses and conflict in general practice. All the necessary skills are covered including negotiating dealing with anger handling criticism and change management. Filled with practical examples and exercises referenced throughout and with recommended reading lists at the end of each chapter it encourages the reader to invest in their own personal and professional development.

Over the last 20 years, Examination Notes in Psychiatry has become one of the leading texts for trainee psychiatrists. The 4th edition maintains the core of valuable information that is required by any would-be psychiatrist, but has been completely revised and updated. Assessment and diagnosis form the foundation to each section, but are now enhanced by the inclusion of treatment algorithms and evidence based medicine. Changes to the nomenclature have been made to reflect current practice. The fully revised reading lists lead the reader to the latest papers and publications, and a glossary of relevant websites will provide even further resources - whether during the revision process, or for the professional requiring a rapid reference between consultations. The sheer volume of essential information, provided in a structured, focused format, makes Examination Notes in Psychiatry 4e essential reading for trainees, psychiatrists, and mental health professionals alike.

Completely up to date with the latest examination changes, Get Through MRCPsych: MCQs for Paper 3 contains over 380 'best answer 1 of 5' multiple choice questions (MCQs) presented in a format closely matching the new syllabus. Modelled on actual exam questions so that they accurately reflect the style and level of difficulty, candidates can test and assess their knowledge aiding thorough exam preparation. Providing useful revision advice on question comprehension and answer strategies, candidates can feel fully prepared when they enter the examination room. Featuring an invaluable collection of revision MCQs and detailed explanatory answers referenced to major journals and specialist textbooks, Get Through MRCPsych: MCQs for Paper 3 is the essential revision book for trainee psychiatrists.

Now in a revised and expanded edition, this volume of notes on interviewing and examining psychiatric patients establishes the basis for successful interaction, diagnosis, and treatment. It is intended for students beginning their psychiatric training. The authors include discussions of topics now commonly integrated into professional training, among them forensic and geriatric psychiatry, neuropsychiatry, and mental retardation. A section on child and adolescent psychiatry is also included.

Offers concise and practical guidance on the common types of calculation used in pharmacy and drug preparation. Selected worked examples and test questions are provided at the end of each chapter as well as a general test at the end of the book.

Statistics and evidence-based medicine are assessed in most postgraduate and undergraduate medical examinations and degrees in health sciences. All clinicians have to acquire skills in this area. This book aims to provide a brief overview of basic medical statistics and the numerical aspects of evidence-based medicine, to give realistic worked examples to illustrate the interpretation of studies relevant to clinical practice, and to allow examination practice. It aims to cover all major topics covered in the undergraduate and postgraduate examinations. Each chapter begins with an overview and summary of the main points, followed by worked examples and exercises with full answers. It will be ideal for all postgraduate medical examination candidates. Other clinicians and undergraduate students in medicine and health sciences will also find it useful.

This text presents the most comprehensive resource available that focuses on exam preparation for the MCCQE Part 1 and the USMLE Step 2. Written in a concise, easy-to-read style, this annually revised text includes relevant clinical information on 29 medical subspecialties.

Candidates for the MRCPsych Part 2 often have difficulty with the basic sciences curriculum of the examination because it may have been several years since it was part of their studies. This book provides the information that will refresh and update their knowledge. It begins with ethics and the law and concludes with social sciences. In between .....

The MRCPsych examinations, conducted by the Royal College of Psychiatrists, are the most important exams for psychiatric trainees to achieve specialist accreditation. Written by authors with recent exam success and edited by the distinguished team behind Revision Notes in Psychiatry, Get Through MRCPsych Paper B: Mock Examination Papers provides candidates with the most realistic and up-to-date MCQ and EMIs, closely matched to themes appearing most often in the Paper B exam.

The novice in psychiatry requires a skeletal framework which he can clothe progressively with more detail and sophisticated understanding. Without structure the naive in the subject must fail to orientate through to a clearer conceptualization of key and relevant issues in psychiatry today. To allow for the acquisition of basic concepts, review and revision, any provisional framework should of necessity be concise and unpretentious. In this book Dr. Michael Levi has succeeded in creating a good starting point for the retention of new knowledge, which can then be built on through diverse reading and clinical experience. A. Margo, FRCPsych Consultant Psychiatrist IV Introduction The purpose of writing this book is to provide a concise summary of general adult psychiatry in the form of notes. I have based these notes on what is generally regarded to be the most easily readable and evenly written textbook for the MRCPsych examination. The book is intended to have wide readership - particularly among junior hospital psychiatrists, general practitioners and medical students. In addition, the book will also be useful to psychiatric nurses, psychiatric social workers and clinical psychologists. Reference 1. Gelder, M., Gath, D. and Mayou, R (1988). Oxford Textbook of Psychiatry (Oxford: Oxford Medical Publications) v Acknowledgements I wish to thank Dr A. Margo for writing the Foreword to this book.

Comprising of 400 MCQs, this book provides essential revision content to help you pass the recently introduced MRCPsych Paper A. The most recent guidelines for the new curriculum have been followed in compiling the content. MCQs for the New MRCPsych Paper A with Answers Explained is an invaluable aid for all candidates for the examination of the Royal College of Psychiatrists. Other clinicians and undergraduate students in medicine and health sciences will also find it useful.

Studying for the MRCPsych exams can seem a daunting prospect, especially when faced with the vast amounts of literature available to help, but this book offers a complete solution in the form of a thoroughly comprehensive guide to the Part I Exam. Completely up to date and taking in the recent changes to the exam, the book reflects the exam format and content extremely accurately. Written by an experienced examiner with contributions from trainees, the book combines these elements to ensure that it is the perfect revision companion for any psychiatrist preparing for the MRCPsych Part I.

This book covers both the basic science paper and the clinical topics paper and includes 1200 individual statement questions. All major topics are covered and the book is useful as a revision aid. It is aimed at candidates for the Royal College of Psychiatrists examinations.

Candidates for the MRCPsych examinations have often found the Basic Sciences component one of the hardest to pass and while it underpins all clinical practice, it will continue to be a large part of the Part II syllabus. The extremely popular Examination Notes in Psychiatry: Basic Sciences has been fully revised and expanded for this second edition, providing both the background and in-depth knowledge that will enable trainees to tackle difficult subjects, such as psychological assessment, psychopharmacology and neuroimaging. All the material has been reviewed in the light of new recommendations from the Royal College of Psychiatrists and the changes to the exam format, and the book now covers every subject in a succinct, easily absorbable style. The text has been broken down into memorable parts, highlighting key points with bullet points. Anyone sitting the MRCPsych Part II exam will find this aide-memoire invaluable.

The first comprehensive psychiatry review textbook, designed expressly for the Canadian market, Psychiatry Review and Canadian Certification Exam Preparation Guide is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign-trained psychiatrists seeking to practice in Canada. This new volume, based on The American Psychiatric Publishing Board Review Guide for Psychiatry, has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature, and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The volume takes the reader from the basic sciences comprising the foundation of

psychiatry, through the psychiatric interview and other diagnostic topics, to syndrome-specific chapters paralleling DSM-IV-TR, and finally to current treatment options. Rounding out the review is a 200-question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, *Psychiatry Review and Canadian Certification Exam Preparation Guide* will help the prospective exam-taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

**Lecture Notes:** Psychiatry provides a concise and accessible introduction to the fundamentals of Psychiatry, presenting the principles of Psychiatric examination followed by systematic coverage of the major psychiatric disorders, as well as covering management and treatment options. This eleventh edition has been revised to include recent developments in history-taking, psychotropic drugs and case presentations, as well as covering the practical elements of patient guidance and care. Key features include: • Clearly presented tables, figures and end-of-chapter 'Key point' summaries to aid revision • An emphasis on core management skills needed by Junior Doctors in both psychiatric and general hospital settings • Quick reference guides to help structure patient assessments on-the-go • MCQs and case studies in line with medical school and professional level psychiatry exams For those embarking on study or refreshing their knowledge of psychiatry, *Lecture Notes: Psychiatry* provides a step-by-step guide to both its wider and patient-centred practice.

Completely up to date with the latest examination changes, *Get Through MRCPsych: MCQs for Paper 2* contains 350 'best answer 1 of 5' multiple choice questions (MCQs) presented in a format closely matching the new syllabus. Modelled on actual exam questions so that they accurately reflect the style and level of difficulty, candidates can test and assess their knowledge aiding thorough exam preparation. Providing useful revision advice on question comprehension and answer strategies, candidates can feel fully prepared when they enter the examination room. Featuring an invaluable collection of revision MCQs and detailed explanatory answers referenced to major journals and specialist textbooks, *Get Through MRCPsych: MCQs for Paper 2* is the essential revision book for trainee psychiatrists.

Passing the multiple-choice paper is an essential first stage in the FRCA examinations. A good pass enhances a candidate's ultimate success in the overall scheme of the examination. Written by three practising consultant anaesthetists the second edition of this successful book is ideal preparation for the MCQ examination. As well as providing a comprehensive overview of the types of question typically asked in the examination detailed explanations provide a revision guide in their own right. Lack of basic knowledge is the most significant reason for examination failure; here is help for the FRCA candidate to identify areas of weakness (and strength) so as to overcome this problem.

**MasterPass Series** This summary of the entire MRCPsych Part 1 syllabus uses identical sections and subsections to the actual syllabus with an additional section on how to tackle the examination. The MRCPsych Part 1 examination consists of a written part and a clinical part. The syllabus for the written part includes several different areas in basic sciences (eg. Psychology psychopharmacology and psychopathology) which few trainees would have covered in any detail as undergraduates. The book is essential for candidates for the MRCPsych Part 1 examination but medical students and medical students and mental health nurses may also find it useful. For more information on other titles in this series please click here For more information on 123Doc courses for Junior Doctors please click here

Here is a collection of multiple-choice questions for the Membership of The Royal College of Paediatrics and Child Health Part 1 examination. There are over 300 questions organised into 10 sections and the mixture of questions attempts to reflect the wide range of topics in the current syllabus. Each question has an explanatory answer, making this book an ideal revision guide for the MRCPCH examination.

This is an essential text for candidates preparing for postgraduate specialist exams in psychiatry, particularly the MRCPsych. This Basic Sciences volume is a companion to the successful *Examination Notes in Psychiatry 3/e*: A postgraduate text, which covers the clinical topics. The basic sciences are often poorly understood by trainee psychiatrists, although they form the foundation of clinical practice and are examined in detail, particularly for the MRCPsych Part II examination. This is a comprehensive text for the basic sciences, offering a breadth of information at an appropriate level to meet the needs of the exam candidate.

This book is one of three in a new series designed to equip MRCPsych candidates for their examination. The other two titles cover the Part II Clinical Topics paper and Part II Sciences Basic to Psychiatry paper. For the exam, strategy is as important as knowledge and this series provides a unique way of addressing both. To be of any value an MCQ book must aim to teach as much as to test. All questions in these books are relevant to the MRCPsych syllabus and pitched at the right level of difficulty. In addition, they are based on substantial and diverse sources such as papers cited in the Recommended Reading Lists of the Royal College of Psychiatrists, major textbooks, key papers from leading psychiatric journals and articles recommended in seminars held at the Institute of Psychiatry. Explanations are given for most questions and notes and references to further reading are provided. All the papers have been audited by MRCPsych candidates and each question was scrutinized by over a dozen registrars for accuracy, ambiguity, relevance and difficulty. An introduction gives a clear explanation of the nature of the MRCPsych examination and the principles underlying question setting. Reassuring guidance on good study skills and examination technique is included since most candidates prove to be out of practice in both areas.

The MRCPsych examinations, conducted by the Royal College of Psychiatrists are the most important exams for psychiatric trainee to achieve specialist accreditation. Written by authors with previous exam experience and edited by the distinguished team behind *Revision Notes in Psychiatry*, *Get Through MRCPsych Paper A: Mock Examination Papers* provides candidates with the most realistic and up-to-date MCQ and EMIs, closely matched to themes appearing most often in the Paper A exam.
