Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges contains lectures and papers presented at the Ninth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2018), held in Melbourne, Australia, 9-13 July 2018. This volume consists of a book of extended abstracts and a USB card containing the full papers of 393 contributions presented at IABMAS 2018, including the T.Y. Lin Lecture, 10 Keynote Lectures, and 382 technical papers from 40 countries. The contributions presented at IABMAS 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance, safety, risk, management and life-cycle performance. Major topics include: new design methods, bridge codes, heavy vehicle and load models, bridge management systems, prediction of future traffic models, service life prediction, residual service life, sustainability and life-cycle assessments, maintenance strategies, bridge diagnostics, health monitoring, non-destructive testing, field testing, safety and serviceability, assessment and evaluation, damage identification, deterioration modelling, repair and retrofitting strategies, bridge reliability, fatigue and corrosion, extreme loads, advanced experimental simulations, and advanced computer simulations, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of more rational decision-making on bridge maintenance, safety, risk, management and life-cycle performance of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including students, researchers and engineers from all areas of bridge engineering.

Offering a wealth of thought-provoking insights, this topical Research Handbook analyses the interplay between the law and politics of the EU and examines the role of law and legal actors in European integration.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient volume provides comprehensive analysis of the legislation and rules that determine civil procedure and practice in Singapore. Lawyers who handle transnational matters will appreciate the book's clear explanation of distinct terminology and application of rules. The structure follows the classical chapters of a handbook on civil procedure: beginning with the judicial organization of the courts, jurisdiction issues, a discussion of the various actions and claims, and then moving to a review of the proceedings as such. These general chapters are followed by a discussion of the incidents during proceedings, the legal aid and legal costs, and the regulation of evidence. There are chapters on seizure for security and enforcement of judgments, and a final section on alternative dispute resolution. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts

will fully grasp their meaning and significance. Succinct, scholarly, and practical, this book will prove a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Singapore will welcome this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of civil procedure in the international context.

This book presents the most current trends in the field of finance and accounting from an international perspective. Featuring contributions presented at the 17th Annual Conference on Finance and Accounting at the University of Economics in Prague, this title provides a mix of research methods used to uncover the hidden consequences of accounting convergence in the private (IFRS) and public sectors (IPSAS). Topics covered include international taxation (from both the micro- and macroeconomic level), international investment, monetary economics, risk management, management accounting, auditing, investment capital, corporate finance and banking, among others. The global business environment shapes the international financial flows of finance and the demand for international harmonization of accounting. As such, the field of global finance and accounting has encountered some new challenges. For example, policy-makers and regulators are forced to restructure their tools to tackle with new features of trading at global capital markets and international investment. This book complements this global view of development with country-specific studies, focusing on emerging and transitioning economies, which are affected indirectly and in unforeseen ways. The combination of global perspective and local specifics makes this volume attractive and useful to academics, researchers, regulators and policy-makers in the field of finance and accounting.

Study & Master Agricultural Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Agricultural Sciences.

The role of artificial intelligence (AI) applications in fields as diverse as medicine, economics, linguistics, logical analysis and industry continues to grow in scope and importance. AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives. This book presents the papers from the 21st biennial European Conference on Artificial Intelligence, ECAI 2014, held in Prague, Czech Republic, in August 2014. The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI, as well as to demonstrate innovative applications and uses of advanced AI technology. Included here are the 158 long papers and 94 short papers selected for presentation at the conference. Many of the papers cover the fields of knowledge representation, reasoning and logic as well as agent-based and multi-agent systems, machine learning, and data mining. The proceedings of PAIS 2014 and the PAIS System

Demonstrations are also included in this volume, which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI. The essential guide to EU competition law for students in one volume; extracts from key cases, academic works, and legislation are paired with incisive critique and commentary from an expert author team. In this fast-paced subject area, the authors carefully highlight the most important cases, legislation, and developments to allow students to navigate the breadth of legislation and case law. With their clear explanations and commentary, the authors provide invaluable support to students as they approach this complex and highly technical area of law. Extracts provide opportunities for students to understand the law in practice, and to see its relevance to business. Indispensable for undergraduate and postgraduate students alike, this is the standalone guide to the competition law of the EU. Online resources: The text is accompanied by online resources containing: -An additional chapter on State Aid -Web links -Updates in the law

This collection of essays offers a unique insight and overview of the secured transactions law in many of the most important countries in Asia, as well as reflections on the need for, benefits of and challenges for reform in this area of the law. The book provides a mixture of general reflections on the history, successes and challenges of secured transaction law reform, and critical discussion of the law in a number of Asian countries. In some of the countries, the law has already been reformed, or reform is under way, and here the reforms are considered critically, with recommendations for future work. In other countries, the law is not yet reformed, and the existing law is analysed so as to determine what reform is desirable, and whether it is likely to take place. First, this book will enable those engaging with the law in Asia to understand better the contours of the law in both civil and common law jurisdictions. Second, it provides analytical insights into why secured transactions law reform happens or does not happen, the different methods by which reform takes place, the benefits of reform and the difficulties that need to be overcome for successful reform. Third, it discusses the need for reform where none has yet taken place and critically assesses the reforms which have already been enacted or are being considered. In addition to providing a forum for discussion in relation to the countries in question, this book is also a timely contribution to the wider debate on secured transactions law reform which is taking place around the world.

Style and the Future of Composition Studies explores style's potential for informing how students are taught to write well and its power as a tool for analyzing the language and discourse practices of writers and speakers in a range of contexts. Many college writing teachers operate under the belief that style still refers primarily to the kinds of issues discussed in Strunk and White's popular but outdated book *The Elements of Style*. This work not only challenges this view but also offers theories and pedagogies from diverse perspectives that help teachers and students develop strategic habits and mindsets to negotiate languages, genres, and discourse conventions. The chapters explore the ways in which style directly affects—and is affected by—multiple sources of shifting disciplinary inquiry, contributing new insights by drawing on research in cultural studies, sociolinguistics, discourse studies, translanguaging, and writing across the

curriculum, as well as new approaches to classical rhetorical theory. The reemergence of stylistic inquiry can be used dynamically to produce new insights not only about emerging disciplinary interests but also about the study of style as a kind of language in and of itself. *Style and the Future of Composition Studies* demonstrates that style deserves to be a central focus of writing teaching. More than just the next style collection, the book advocates for style's larger prominence in composition discussions generally. It will be of interest to a broad range of students and scholars of writing studies, as well as a wider set of readers in academe. Instant interpretive history is a difficult and demanding task, and certainly more of an art than some would suggest. *USA and the World* describes not only what happened, but puts events in the context of the past and criticizes policy actions as appropriate. The result goes deeper than most of what appears in current publications. Updated annually and part of the renowned "World Today Series," *USA and the World* presents an unusually penetrating look into America and its relationship to the rest of the world. The combination of factual accuracy and up-to-date detail along with its informed projections make this an outstanding resource for researchers, practitioners in international development, media professionals, government officials, potential investors and students. Now in its tenth edition, the content is thorough yet perfect for a one-semester introductory course or general library reference. Available in both print and e-book formats and priced low to fit student budgets.

Consumer law, particularly consumer credit law, is characterised by increasingly complex regulation in Western economies. Reacting to the Global Financial Crisis, governments in the UK, the EU, Australia, New Zealand and the United States have adopted new laws dealing with consumer credit, responsible lending, consumer guarantees and unfair contracts. Drawing together authors from all of these jurisdictions, this book analyses and evaluates these initiatives, and makes predictions as to their likely success and possible flaws.

The four-volume set LNCS 8517, 8518, 8519 and 8520 constitutes the proceedings of the Third International Conference on Design, User Experience, and Usability, DUXU 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer

Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 256 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 69 papers included in this volume are organized in topical sections on design for health; design for reading and learning; design for mobility, transport and safety; design for rural, low literacy and developing communities; design for environment and sustainability; design for human-computer symbiosis.

Considering the ways in which the 'global turn' is changing the theory and practice of historical disciplines, Explorations in History and Globalization engages with the concept and methodology of globalization, challenging traditional divisions of space and time to offer a range of perspectives on how globalization has affected social, economic, political and cultural history. Each chapter covers a specific theme, discussing how globalization has shaped these themes and how they have contributed to globalization throughout history. Including topics such as ecological exchanges, trade, exchanges of knowledge, migration, empire and urbanization, this volume both explains historical trajectories through a global analytical framework and provides tools that students can employ when posing their own research questions about historical globalization. Containing suggestions for further reading and guidance on the ways in which primary source material can be used as a basis for global historical studies, this is the ideal volume for all students interested in the global exchanges between people throughout history.

Oswaal CBSE Question Bank+NCERT Exemplar Book Class 12 (Reduced Syllabus) (Set of 6 Books) Physics, Chemistry, Biology (For 2021 Exam)Oswaal Books and Learning Pvt Ltd This book has been designed to add to the study and experience of early childhood ideas and experience in an international context. The focus is Australia and China with three research projects explored to provide insights into the history and development of early childhood education in each country. The work offers a consideration of the complexity of early childhood education in local and global contexts, at a time when global relationships can benefit from moving beyond better cultural understandings to greater connections and reciprocity. Each study has accompanying empirical data to support the interpretations offered. The first part of the book presents historical context and examines policy issues, the growth of the early

childhood education workforce and the development of curriculum approaches in each country. The two projects that follow describe teachers' perspectives of children's learning and an in-depth study of a collaborative higher education program that details stakeholder experiences. By studying participant attitudes and ideas in each country we have been able to share early childhood knowledge and discuss perspectives through early childhood languages, like perspectives on the role, importance and nature of play and learning.

The National Eligibility cum Entrance Test (NEET) is conducted every year to grant admission to aspirants into MBBS / BDS courses across the country. From 2020 onwards, NEET is conducted by the National Testing Agency (NTA). Earlier, it was known as All India Pre-Medical Test (AIPMT) and was conducted by the Central Board of Secondary Education (CBSE). The Medical Council of India (MCI) has recommended the syllabus for NEET after review of various State syllabi as well as those prepared by CBSE, NCERT and COBSE. This was done to establish uniformity across the country keeping in view the relevance of different areas in Medical Education. NEET is held every year in the month of May. In the final test paper, there are total 180 questions with 45 questions from Physics, 45 questions from Chemistry and 90 questions from Biology (45 questions from Botany + 45 questions from Zoology). It is observed that most of the questions asked are based on chapters from NCERT textbooks. With the motto of Learning Made Simple, Oswaal Books have developed NEET Question Banks for all the aspirants who wish to crack NEET and come out with flying colors. The Question Banks are a compilation of questions from the last 32 Years' Question Papers of AIPMT to enable exam oriented preparation. Some benefits of studying from Oswaal NEET Question Banks are: • Chapter-wise and Topic-wise presentation • Chapter-wise Objectives: A sneak peek into the chapter • Mind Map: A single page snapshot of the entire chapter • Revision Notes: Concept based study material • Oswaal QR Codes: For Quick Revision on your Mobile Phones and Tablets • Analytical Report: Unit-wise questions distribution in each subject • How to Handle and Crack the Exam: Well defined Tips and Tricks by experts We hope that OSWAAL NEET QUESTION BANKS will help you at every step as you move closer to your educational goal. Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking's Final Exam, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.

Smart Green Cities: is a comprehensive overview of what global cities are doing to become sustainable. Woodrow W. Clark II and Grant Cooke have produced a book that is both practical and visionary. They have examined the infrastructure needs - sustainable development, communications, energy, water, waste, and transportation to develop guidelines, processes and best practices. City leaders are key to mitigating climate change who must plan, design and implement solutions. Smart Green Cities (SGC) offers a global perspective that includes implementing the Green Industrial Revolution the title of their last book. SGC discusses innovative emerging technologies, and the new economics paradigm that move beyond the out-dated neo-classical economics. The authors present examples from around the world including Europe, the U.S, China and the Middle East, which discuss the best green technologies from renewable energy power generation to smart on-site grid development. The extraordinary shift from a rural to an urban world is described; national plans are analyzed; so that future cities will be designed, built and implemented now - not 50 years from now. The struggle for the planet's survival is being waged by the world's cities. Clark and Cooke argue that cities are the key to mitigating climate change and reducing toxic greenhouse gas emissions. SGC introduces sustainable technologies; discusses the economics for implementing the solutions; and offers numerous examples to serve as pathways for cities to become smart, green, and thus carbon neutral.

This book summarizes recent advances in the work on agenda-setting in a comparative perspective. The book first presents and explains the data-gathering effort undertaken within the Comparative Agendas Project over the past ten

years. Individual country chapters then present the research undertaken within the many national projects. The third section illustrates the possibilities and directions for new research in comparative public policy using the data presented in this book. All the data used and discussed in the book is moreover publicly available. The book represents a significant contribution to the study of comparative public policy. By introducing a unified research infrastructure it opens up new possibilities for both empirical and theoretical research in this area. Die Piraten zogen schon früh das mediale Interesse auf sich und fallen seit ihrer Gründung immer wieder durch diverse Aktionen auf, über die die Medien gerne berichten. Doch derzeit befinden sich die Piraten in einer medialen Ebbe, da das Interesse um die jungen Wilden des deutschen Parteiensystems stark zurückgegangen ist. In dieser Untersuchung wird der Frage nachgegangen, ob sich die deutschen Piraten bereits im Prozess des Kenterns befinden. Um diese Frage zu erörtern, werden in verschiedenen Kapiteln unterschiedliche Aspekte, wie die Gründung der Partei, innerparteiliche Demokratie oder Organisation sowie die Wähler- und Sympathisantenstruktur präsentiert, erläutert und dann im Schlusskapitel in den Kontext eingebettet.
