

Expedition Modifications

Over the years, a large body of knowledge has developed regarding the ways in which space flight affects the health of the personnel involved. Now, for the first time, this clinical knowledge on how to diagnose and treat conditions that either develop during a mission or because of a mission has been compiled by Drs. Michael Barratt and Sam L. Pool of the NASA/Johnson Space Center. Complete with detailed information on the physiological and psychological affects of space flight as well as how to diagnose and treat everything from dental concerns to decompression to dermatological problems encountered, this text is a must have for all those associated with aerospace medicine.

The Nautical Magazine first appeared in 1832, and was published monthly well into the twenty-first century. It covers a wide range of subjects, including navigation, meteorology, technology and safety. An important resource for maritime historians, it also includes reports on military and scientific expeditions and on current affairs. The 1875 volume is again dominated by reports on the Merchant Shipping Bill and debates on seaworthiness, with the editor continuing to prefer 'personal responsibility' to 'Plimsolecisms' and 'grandmotherly supervision' by the government. Serials focus on the economies of the British colonies, Atlantic shipping lines and emigration to South America, but fiction no longer features. Other topics include the opening of the Royal Naval Museum at Greenwich, innovations such as steel hawsers and desalination apparatus for producing drinking water, a proposal for generating power from wave action, and suggestions for using rats as a tasty and economical food source.

Special Education in Contemporary Society: An Introduction to Exceptionality is designed for use by preservice and inservice teachers who will teach students with special needs in the general classroom. The text provides a rare glimpse into the lives of persons with exceptionalities, including their families and teachers. Focusing on human exceptionalities across the life span, the text employs a traditional organization beginning with four foundations chapters that introduce teachers to special education, followed by 10 "categorical" chapters each on a different "disability." Each categorical chapter features sections on transition, cultural diversity, technology, instructional strategies, and family considerations.

In the Fourth Edition Media Update of Special Education in Contemporary Society, author Richard Gargiulo provides a highly readable and research-based introduction to special education. This book is based on the author's belief that teachers need more than just academic knowledge about exceptionality—they need an awareness and understanding of the human side of students with special needs and their families. The Fourth Edition Media Update can be packaged with an Interactive eBook that offers new video clips of educators, parents, and individuals with special needs talking about their experiences. Icons appear throughout the Media Update linking the book to the interactive eBook features.

The Arctic became part of Canada in 1880 when it was transferred from Britain. How the transfer came about and what Canada did with its new territory is described. The book focuses on the ten marine expeditions that the Dominion government sent north between 1884 and 1912 and examines what these expeditions accomplished.

The fourth volume of Mr. Link's biography of Woodrow Wilson and the history of his times covers the period from autumn 1915 to spring 1916. Since this was a time of extreme domestic political controversy and recurring crises with Mexico and Germany, the volume has no single theme. Mr. Link describes fully the negotiation of the House-Grey memorandum and European reaction to it; the armed ship controversy; the Sussex crisis; and the events that nearly led to war with Mexico in 1916. Materials found in German, British, and French archives and manuscript collections are used, as well as from American sources. Originally published in 1964. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
