

Financial Management Problems And Solutions

This book blends classroom training with actual practice. It provides case studies for the students of Management, Commerce, Chartered Accountancy, and Cost and Work Accountancy. It contains case studies pertaining to Indian conditions and their suggestions

The coverage of this book is very comprehensive, and it will serve as a concise guide to a wide range of areas that are relevant to the Finance field. The book contains 25 chapters and also a number of real life financial problems in the Indian context in addition to the illustrative problems.

This book has been designed keeping in mind the problems faced by students in applying formula. They do a lot of mistakes, not in remembering formula but in applying it. Hence, a step by step approach will help readers to overcome such issues and will provide a tight-grip on numerical solving.

Collects essays on the multidimensional aspects of risk management.

This text is designed for courses on fixed income securities at the MBA level and graduate level courses in finance. The goal of the text is to provide comprehensive coverage of fixed income instruments and models. A risk management perspective of option theory is presented throughout. The text adopts a non-institutional, binomial approach to fixed income securities based on option pricing technologies, providing cutting-edge theory and technique. While the book is based on the Heath-Jarrow-Morton (HJM) model of interest rate options, discussions also compare and contrast other related models such as the Hall-White model. In addition, traditional techniques of duration and convexity are discussed as these relate to the HJM model. Statistics and algebra are prerequisites.

As indicated by the title, this book focuses on fundamental problems in finance: a logical dilemma in valuation, stock valuation methods/models, risk valuation, and optimal capital structure. It presents an innovative approach to logic and quantitative reasoning (without advanced mathematics) that delivers valuable results ---- convincing solutions to these problems. Readers in finance will definitely be interested in these solutions as well as the methods. In fact, these fundamental problems are essential in the field of finance, and they have remained unsolved (or partly unsolved) for decades. The solutions offered in this book are all sound in theory and feasible in practice, and will hopefully benefit both theoretical research and practical decision-making.

An excellent book for commerce students appearing in competitive, professional and other examinations. 1. The Time Value of Money, 2. Operating and Financial Leverages, 3. Capital Structure : Concept and Theories, 4. Cost of Capital, 5. Capital Budgeting, 6. Management of Working Capital, 7. Inventory Management, 8. Management of Receivables , 9. Cash Management and Cash Budgets, 10. Dividend Policy.

Financial Management Theory, Problems and Solutions S. Chand Publishing

This text on corporate financial management covers topics such as project appraisal, risk and project appraisal, equity capital, debt finance, value-based management, capital structure, and dividend policy.

For many years, the Department of Defense (DOD) has experienced serious financial management problems with regard to accounting, billing, and collecting for its foreign military sales (FMS) program. DOD has not had an adequate program-wide financial management plan since the program's inception. Each military department and the Security Assistance Accounting Center designed their own systems, which have not provided accurate or timely data. As a result, DOD is unable to provide foreign governments with a proper accounting of how their money was spent. Policy implementation has been inconsistent and attempts at standardization have failed. Although some improvements have been made, progress has been slow and many longstanding problems remain uncorrected.

Designed for both undergraduate and graduate students, this popular study guide 25,000 copies were bought of the first edition! covers everything from financial analysis and forecasting, planning and budgeting to leverage and capital structure, mergers and acquisitions and multinational business finance.
