Authoring a PhD is a complex process. It involves having creative ideas, working out how to organize them, writing up from plans, upgrading the text, and finishing it speedily and to a good standard. It also includes being examined and getting published. Patrick Dunleavy has written *Authoring a PhD* based on his supervision experience with over 30 students. It provides solid advice to help your PhD students cope with both the intellectual issues and practical difficulties of organizing their work effectively. It is an indispensable and time saving aid for doctoral students in the humanities, social sciences, education, business studies, law, health, arts and visual arts, and related disciplines, and will also be a great help to supervisors.

In today's marketplace, there are an array of products that can be purchased and several ways to buy them. Consumers today are faced with numerous choices when deciding on which products to purchase. The choice ultimately comes down to the consumers specific wants and needs. "Is this the right product for me? Will I get my money's worth in this product? Which brand is the best for me?" What it all comes down to is... Are consumers doing their homework to determine the best value out there that will fulfill their wants and needs?

The study of music within multimedia contexts has become an increasingly active area of scholarly research. However, the application of such studies to musical genres outside the 'classical' film canon, or in television and other media remains largely unexplored in any detail. Tristian Evans demonstrates how postminimal music interacts with other media forms, focusing on the film music by Philip Glass, but also taking into account works by other composers such as Steve Reich, Terry Riley, John Adams and others inspired by minimalist and postminimal practices. Additionally, Evans develops innovative ways of analysing this music, based on an interdisciplinary approach, and draws on research from areas that include philosophy,

linguistics and film theory. The book offers one of the first in-depth studies of Philip Glass's music for film, considering *The Hours* and *Dracula*, *Naqoyqatsi*, *Notes on a Scandal* and *Watchmen*, while examining re-applications of the music in new cinematic and televisual contexts. The book will appeal to musicologists but also to those working in the fields of film music, cultural studies, media studies and multimedia.

Marketing is a big subject. It's complex and often misunderstood.

Engineering and high performance polymers cover a wide spectrum of materials that are valued, amongst other things, for their temperature resistance, strength, dimensional stability and chemical resistance in many demanding applications. This new market report from Rapra, discusses their key performance properties, the trends in material developments, and their application in automotive, electrical and electronics, industrial, consumer products and other markets, including medical.

A comprehensive guide to 2004 vehicles features the latest suggested retails and dealer invoice prices; listed ratings by performance, accommodations, and comfort; warranty information; money-saving tips; a "Best Buys" section; and much more. Original.

The most neglected element of the marketing mix can have an unrivalled impact on the bottom line. *Smarter Pricing* helps managers make more intelligent pricing decisions, implement pricing strategies and structures more effectively in the market and capture more value for their business. At no time has effective pricing been more significant. Buyers are getting stronger, markets more transparent, and manufacturers in new powerhouses such as China, are becoming more and more competitive. Recent McKinsey survey of 2500 companies calculated that a 1% increase in price improves operating profit by 11.1%. *Smarter Pricing* is a good, hands-on book on pricing for practising managers, providing a developed mix of techniques through international examples from a range of sectors that bring pricing theory into a real-world context. *Smarter Pricing* joins the developing suite of FTPH books offering executives focused and practical advice on decisive business challenges. *Smarter Pricing* is a fast and focused companion to practical price management, for executives and marketers in every sector.

Bei vielen innovativen Fahrzeugkonzepten sind die Knotenbereiche zentraler Bestandteil der Karosserieentwicklung. Hier liegen häufig Karosserie-Schnittstellen, die die Trennebenen zwischen Rohbaumodulen oder skalierbaren Strukturbauteilen bilden. Da in den Karosserieknoten die Lastpfade umgelenkt und verteilt werden, prägen diese Bereiche auch maßgeblich die Karosserieeigenschaften, speziell die Steifigkeit. Deshalb ist es wichtig, schon früh in der Konzeptphase die Auswirkungen der Knotengestaltung auf die Karosserieeigenschaften abschätzen und beurteilen zu können. Dazu wird auf Grundlage von Untersuchungen anhand einfacher Ersatzsysteme eine Methode entwickelt. Unter Verwendung neu definierter Kennzahlen ist damit eine Bewertung verschiedener Knotenvarianten hinsichtlich der Karosseriesteifigkeit noch vor Erstellung komplexer virtueller Modelle möglich. Diese Methode wird auf verschiedene A-Säulenknoten eines bestehenden Karosseriekonzepts angewandt und mit den Ergebnissen einer Finite-Elemente-Berechnung verglichen. Aus den theoretischen Betrachtungen sowie aus den konkreten Simulationsrechnungen werden weiterhin Konstruktionsrichtlinien abgeleitet und in einer Übersicht zusammengestellt, die den Wirkzusammenhang zwischen Knotengestaltung und Karosseriesteifigkeit verdeutlicht. Zur Autorin Katrin Wendt studierte zwischen 2000 und 2005 an der Technischen Universität Braunschweig und der University of Glasgow Maschinenbau mit der Vertiefungsrichtung Luft- und Raumfahrttechnik. Das derzeitige Aufgabenfeld von Frau Wendt in der Konzernforschung der Volkswagen AG in Wolfsburg umfasst innovative Karosseriekonzepte, in dem auch die vorliegende Doktorarbeit entstanden ist.

Ergonomics teaches how to design technology in such a way that it is optimally adapted to the needs, wishes and characteristics of the user. In this context, the concept of the human-machine system has become established. In a systematic way and with a detailed view of the complicated technical and perceptual psychological and methodological connections, this book explains the basics of automotive ergonomics with numerous examples. The application is shown in examples such as package, design of displays and control elements, of environmental ergonomics such as lighting, sound, vibrations, climate and smell. The design of driver assistance systems from an ergonomic perspective is also a central topic. The book is rounded off by methods of ergonomic vehicle development, the use of mock-ups, driving simulators and tests in real vehicles and prototypes. For the first time, those responsible in the automotive industry and in the field of relevant research are provided with a specialized systematic work that provides the ergonomic findings in the design of today's automobiles. This provides planners and designers of today's automobiles with concrete information for ergonomic product development, enabling them to keep an eye on decisive requirements and

subsequent customer acceptance. This book is a translation of the original German 1st edition *Automobilergonomie* by Heiner Bubb, Klaus Bengler, Rainer E. Grünen & Mark Vollrath, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2015. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
