Mader's Understanding Human Anatomy and Physiology continues to be the perfect text for a one-semester course, because it was designed for this audience from the very first edition. The text is celebrating its tenth anniversary with a complete facelift, which I believe makes the content even more approachable, user friendly and exciting. Each chapter now begins with an infographic that details fascinating facts about the chapter's subject.

Cell - Tissues - Integumentary system - Skeletal system - Articulations - Muscular system - Nervous system - Neurons, synapses and receptors - Central nervous system - Peripheral nervous system - Autonomic nervous system - Endocrine system - Circulatory system - Heart - Respiratory system - Digestive system - Urinary and reproductive system - Pregnancy and embryonic development.

Now in its ninth edition, this text continues to set the standard for short-course A&P texts with an enhanced media package, an updated art program, and new active learning features to help allied health students better visualise and understand the structure and function of the human body.

Body by Design defines the basic anatomy and physiology in each of 11 body systems from a creational viewpoint. Every chapter explores the wonder, beauty, and creation of the human body, giving evidence for creation, while exposing faulty evolutionistic reasoning. Special explorations into each body system look closely at disease aspects, current events, and discoveries, while profiling the classic and contemporary scientists

and physicians who have made remarkable breakthrough in studies of the different areas of the human body. Body by Design is an ideal textbook for Christians high school or college students. It utilizes tables, graphs, focus sections, diagrams, and illustrations to provide clear examples and explanations of the ideas presented. Questions at the end of each chapter challenge the student to think through the evidence presented.
