A guide to ebook publishing on a budget which takes the reader gently through every stage of the self-publishing process: from copy editing and proofing to the simplest, most robust, free ebook formatting method and on to sales, social media and publicity tips. Written by a non-techie journalist and author of mainstream-published fiction & non-fiction who has been there, on a very tight budget, and made many mistakes so that the reader doesn't have to. Whilst this book is aimed at the complete beginner, there is an additional techie chapter by IT man Mark Binner for those who wish to explore ebook coding further. "A fantastically brisk, snappy and practical guide. I love the step-by-step and hand holding nature of the instructions for the techie aspects!" *****Thriller author Louise Voss, Kindle #1 Ranking Author, over 100,000 copies sold "I'm 83 years old and technically naive as far as computers are concerned. This is a clear and concise step by step guide that will allow even the novice to self-publish a book for free using this manual along with the print-on-demand services provided by the company Create Space. If you know how to use a simple computer word processing program and have access to the Internet, then you can self-publish your own book for free. This is not, however, just a book that tells you to go to Create Space and follow directions there. While I do take you step by guided step through each part of the self-publishing process, and offer cautions when I think they are needed, there is much more information about how to self-publish presented in this book. Several early chapters cover how to prepare a manuscript for self-publication. I give you handy tricks and tips I have learned on how to spot and avoid some common mistakes that are often made in self-publishing. I explain the process. I tell you different ways you can illustrate your book for free, I explain whether you need to copyright your work or not and, if so, I provide information how to do that. I tell you how to create the interior of your book, how to choose the size of your book before you even start your manuscript, how to create a nice looking cover for your book for free, using your own images or personal photos if you wish, and more, much much more. There is no need to give hundreds, sometimes thousands, of dollars to a professional book manufacturer or vanity press to put your work into print. You can do the same thing yourself, and you can do it for free. If you don't already have all the necessary programs needed for self-publishing installed, I provide links where you can download these for free and I give you step by step instructions on how to use each one. I even tell you where you can get stock photos for illustrations for free, as well as advise about several photo editing programs you can use..also for free. One such free download of a very good photo editing program is similar to the more expensive photo program Photoshop, only without the higher price. And there is even more. How do I know so well what you need here? Because I am not a professional book manufacturer nor am I in any way affiliated with Create Space (I chose them because I like their finished products and they have an excellent support staff.) I was once just a beginner,like you might be right now. I was someone who, working within a limited budget, figured out the process of self-publishing my own books for free. Because I was once exactly where you may be right now, I understand that you need concise and detailed but simplified instruction, that you need a complete step-by-step guide that will literally lead you by the hand, so to speak, in helping you put your own book together for free. And I know that you need to know all the ins and outs of the process, not just the nuts and bolts of the self-publishing process, itself, although that is thoroughly covered as well. Once I understood all the ins and outs of this self-publishing process, once I "ironed out all the kinks" that the average person will usually face, once I figured out where to download all the free programs needed and so on, I have since published several of my own books and will continue to do so. i have also helped others, who never dreamed they could self-publish a book, put their own editions together. So if you can use a computer word processing program (there are loads of them available and most work in a similar fashion, but I cover only the two most popular, Microsoft Works and Microsoft Word in detail this manual) and if you have access to the Internet, you can follow this step by step guide and self-publish your own book for free using just this manual and the print-on-demand company Create Space. So pick up this book, read each chapter carefully, then follow the detailed step-by-step instructions to self-publish your own book for free.

If you have ever dreamed of writing and publishing your own book, you can realise that dream through self-publishing. Self-publishing is the route many writers choose these days to make their works available to the reading public. Self-publishing today is different from what it used to be many years ago when authors had to spend a lot of money to publish their book. Today, authors can self-publish their book for free or for as little as \$100 depending on the self-publishing platform they choose. As a soon-to-be author, the first thing you need to do to self-publish a book is to know your genre. One of the rules of writing is that you should write about what you know. If you have a specific genre that you enjoy reading, chances are that that is the genre you will want or like to write about. Consider your interests and the types of book that you read before you decide on the genre you want to venture into. Your major aim of writing a book should not be to make money. It should be about something you have interest and passion for. There a lot of genres available in both fiction and non-fiction writing. Before you start writing your book, have a plan of what the book will be about and the genre it will fit in. You need to focus on a specific genre when you are writing a book so you can market it. Some books may cross genre lines, such as paranormal and romance books, while some books will fit neatly into a genre. What your book is about should be very clear to the would-be reader so they will be interested in what you have written to want to buy the book. Most readers have the types of books they like to read and have a habit of sticking to a few genres. There are different genres for both fiction and non-fiction books. You need to make sure your book stands out from other books in the same category. If you are writing a romance novel, for instance, how do you make it stand out from other romance novels that are already in the bookstores? This is a question you must answer. Once you have determined your genre and know exactly what you want to write about, you should begin to think of marketing your book. Make it something that prospective readers will choose when they see it in bookstores or online. This will set it apart from other books of the same kind and lure readers to buy it. You can make a career out of self-publishing your books and marketing them to the right audience. After you have decided on what you are going to write about and what will make your book stand out from the rest, you can then begin to outline your book. You should write down an outline of the book and the points you are trying to make. Well-written books convey a message. Make sure your book conveys a good message to the readers that they can take away from the book. Read books in the genre you are interested in writing so you can get the feel for that type of writing. Reading is a very good way to improve writing skills. Before you start to write your book, read the genre that you want to write in and have a good idea of what you want to say in your own book. Get a copy of this book to learn how you can take advantage of the self-publishing opportunities available.
