Which Scottish anti-slavery campaigner lost a son in a Confederate prisoner-of-war camp during the American Civil War? Was the enemy of Scotland's first 'freedom fighter' not England, but ancient Rome? What was the laboratory accident that led to one of the greatest discoveries in modern medicine? How did the Declaration of Arbroath in 1320 influence the legal foundation of the greatest superpower the world has ever seen? Which singing superstar overcame a learning difficulty to become a worldwide inspiration? The answers to these and many other questions can be found in Great Scottish Heroes, covering 2,000 years of Scottish history and encompassing outstanding leaders in a broad range of pursuits, including the arts, exploration, medicine, sport, religion and politics. Even a brief list of Scottish inventions shows the nation's influence upon our world: television, penicillin, the steam engine, the telephone, the vacuum flask, to name only a few. Scotland has for centuries produced a great number of exceptional, heroic individuals out of all proportion to its small population and geographical size. This concise but wide-ranging book offers biographies of fifty Scottish heroes and heroines, but in truth there are a hundred others, and more, who would qualify for inclusion. These men and women helped to shape the world, and continue to do so today. Great Scottish Heroes shows how they achieved such remarkable success. If you are a Scot by birth, descent, or adoption, this book will make you even prouder of your countrymen. If you are not Scottish, you will wish you were.

In Burning Rubber, Charles Jennings tells the fast and furious tale of motor sport's premier competition, from its earliest roots in the suicidal road races of the Edwardian age to the brave new world of Hamilton, Button, Alonso and Vettel in the 2000s. In a narrative bristling with anecdote and incident, he explores the lost world of the 1950s racetrack, the rise of British constructors in the 1960s, the impact of technological changes from the late 1970s, the advent of the high-profile team boss in the 1980s and the revolution wrought on Formula One by computers in the 1990s. Throughout, sparkling and incisive profiles shed revelatory light on the drivers who have risked life and limb: the brilliant but inscrutable Juan Manuel Fangio, the ebullient Stirling Moss, the champagne-gargling James Hunt, the cerebral Alain Prost and mercurial Ayrton Senna, the adenoidal Nigel Mansell, the metronomic Michael Schumacher, the precocious Lewis Hamilton and the reborn Jenson Button. Burning Rubber takes the reader on a white-knuckle drive through the bends, straights, chicanes and pit stops of Formula One's chequered history.

“ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties — such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes — the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)
