responsible for the huge increase in the rate of esophageal cancer? What if someone told you that GERD was not really a disease so much as our bodies way of coping with a diet we did not evolve with? Heartburn Cured makes a strong argument that the consumption of excess carbohydrates is the root cause and real trigger for acid reflux and the resulting complications like Barrett's and esophageal cancer. Have you ever wondered why most trigger foods are associated with carbs (sugar in coffee, sweet mixes in mixed drinks, pizza crust with tomato sauce topping)? This breakthrough diet book is written by a microbiologist who suffered from chronic heartburn for 20 years before getting fed up with uninformed GI medical doctors prescribing drugs that either did not work or were associated with serious side effects and health problems. In Heartburn Cured, the author explains the role of intestinal microorganisms in digestion and provides clear and easy to understand evidence that excess carbohydrates are converted to gas by gut microbes and the gas produced drives acid reflux (and likely IBS symptoms as well).

Heartburn Cured delivers a death blow to heartburn and GERD by harnessing the glycemic index, tailoring controlled carbohydrate dieting to freeing people from GERD and heartburn as well as the PPIs, H2 blockers and even antacids.

This book will give you a clear understanding of what acid reflux is - a health condition experienced by almost half of the American population. It explains how and why acid reflux occurs as well as discusses in detail why the common health remedies prescribed by health professionals do not eradicate the condition and worsen it instead. Much more than that, the book contains proven non-drug and non-surgical alternatives to effectively cure acid reflux, heartburn, and GERD. Acid Reflux is a health condition where acidic stomach fluid leaks back up the food pipe (the esophagus) causing heartburn - a burning pain felt internally around the lower chest area. It is quite common for people to experience occasional heartburn since acid reflux usually results from eating or drinking certain types of food or drink for some people. However, the frequent occurrence of heartburn may indicate a more severe form of acid reflux condition called GERD (Gastro- Esophageal Reflux Disease). Although the condition may not be life threatening, it may lead to more serious health conditions in the future such as cancer if left unattended or uncared for. The book will help you eradicate the condition for good and prevent it from recurring without resorting to medication or surgery. I hope you find the information and recommendations truly valuable.
