This book contains 70 ready-to-use mathematics lessons suitable for students aged 14-16. Some lessons offer alternative routes through the curriculum, such as practising indices by solving radical equations, while others concentrate on difficult ideas, like appreciating that not all mathematical relationships are linear. Each plan consists of a teacher's sheet, providing:

- the aims and objectives of the lesson
- a lesson starter, main phase, plenary and homework ideas, each with suggested timeframes
- guidance on how to adapt the activities to cater for students working at different levels; and
- online resources, including links to useful websites, material to display on the whiteboard and additional ideas.

Each plan also includes a photocopiable or downloadable student task sheet that corresponds to the teacher's sheet. The lessons focus on problem solving and putting mathematics into context, and are an essential resource for any busy teacher of mathematics.

Comprehensively matched to the latest Cambridge IGCSE syllabus (0500), including changes to the Reading paper. This updated and literature-led resource is packed with age-appropriate text extracts, focused activities and embedded exam guidance.

The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER

provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Former Secretary of State for Education Kenneth Baker claims that secondary education has become a five-year programme with a single, narrow aim: to prepare pupils for high-stakes GCSE exams at 16. From 2015, all young people will be legally required to stay in education or training until they are 18. Kenneth Baker sees this as a historic opportunity to re-think the aims and structure of English education. He argues that the National Curriculum should extend only to the age of 14 and that there should be four distinct pathways from 14-18 to take account of young people's emerging interests talents and ambitions: Liberal Arts; Technical; Sports and Creative Arts; and Career. All pathways will provide a broad education, but each will have a distinctive character matched to the talents and ambitions of individual students. In 14-18 - A New Vision for Secondary Education, Kenneth Baker builds a compelling case for reform, with contributions from a range of educationalists who draw on the history of English education, practice elsewhere in the world, and their experiences. An essential read for anyone interested in the future of secondary education.
