The institution of property is as old as mankind, and property rights are today deemed vital to a prosperous economic system. Much has been written in the last decade on the economics of the legal institutions protecting such rights. This unprecedented book provides a magnificent introduction to the subject. Terry Anderson and Fred McChesney have gathered twelve leading thinkers to explore how property rights arise, and how they bolster economic development. As the subtitle indicates, the book examines as well how controversies over valuable property rights are resolved: by agreement, by violence, or by law. The essays begin by surveying the approaches to property taken by early political economists and move to colorful applications of property rights theory concerning the Wild West, the Amazon, endangered species, and the broadcast spectrum. These examples illustrate the process of defining and defending property rights, and demonstrate what difference property rights make. The book then considers a number of topics raised by private property rights, analytically complex topics concerning pollution externalities, government taking of property, and land use management policies such as zoning. Overall, the book is intended as an introduction to the economics and law of property rights. It is divided into six parts, with each featuring an introduction by the editors that

integrates prior chapters and material in coming chapters. In the end, the book provides a fresh, comprehensive overview of an intriguing subject, accessible to anyone with a minimal background in economics. With chapters written by noted experts on the subject, Property Rights offers the first primer on the subject ever produced. In addition to the editors, the contributors are Louise De Alessi, Yoram Barzel, Harold Demsetz, Thráinn Eggertsson, Richard A. Epstein, William A. Fischel, David D. Haddock, Peter J. Hill, Gary D. Libecap, Dean Lueck, Edwin G. West, and Bruce Yandle.

Suicide is a serious and, sadly, increasingly common phenomenon in our world. It gets much more serious, though, when it affects those we personally know and love. Pursuit is the story of a pastor whose twin brother's death came in such a way, casting his life into turmoil. Using hunting and fishing stories to make complex emotions and ideas understandable, the reader will take a journey with the author through his past (with his brother) and toward healing. Along the way readers examine the identity crisis that the author faced, wrestle with biblical truths, and understand the anguish through which those affected by suicide often go. Pursuit is just that, a dogged pursuit to recover identity, something like normalcy, and healing in a world suddenly changed. Attempting to bring help to some, and understanding to others, pursuit is presented in a raw and honest way for which the author does not apologize, but does hope potential readers will find necessary and not gratuitous.

Across the country, more than 1,600 unused railroad corridors have been converted to level, public, multiuse trails, where people can enjoy a fitness run, a leisurely bike ride, or a stroll with the family. In this newest addition to the popular series, the Rails-to-Trails Conservancy presents the Northeast's finest rail-trails. Rail-Trails Northeast covers one hundred of New Jersey, New York, and Pennsylvania's rail-trails. With a rich industrial and passenger rail history, the Northeast is one of the densest rail-trail regions in the country. Rural, suburban, or urban, rail-trails serve as the backbone of an impressive trail system. This two-color book includes succinct descriptions of each trail from start to finish, plus at-a-glance summary information indicating permitted uses, surface type, length, and directions to trailheads for each trail. Every trip has a detailed map that includes start and end points, trailhead, parking, restroom facilities, and other amenities.

Follow a multi-faceted journey by an improviser and a musicosopher, Eric Antoni, from the cobbled streets of Paris to the Far East. *Musical Mosaic* lays coherent excursus of the author's thought-provoking collection of anecdotes. With the absence of lengthy verbiage of a political-social-economic nature, the book is full of compassionate truthful descriptions of persons and experiences and written with total objectivity, brevity, originality, and musical creativity as inspired by the sense of tonality, throughout the history of music in Europe, since Monteverdi, and all over the world nowadays. As a text that is "musico-sophical" instead of being "musico-logical," it is inspired by the founder of phenomenology, Edmund Husserl (1859–1938), and his philosophical seizure of consciousness. It discusses the author's journey in the world of music and describes "musical consciousness" and the ways in which it moves and works within us. The book

presents to the readers the author's account of the composers he met along the way (Slamet Sjukur, Giacinto Scelsi) and the composers who are currently active (Jean-François Laporte, Pierre Michaud, Myriam Boucher, George Benjamin), along with historical narratives that center around Monteverdi, Bach, Ravel, Debussy, and Bartók. It underlines the interrogations held by today's musicians in light of yesterday's mutations. With this book, the author would like to reach out to composers, performers, and music lovers and contribute towards opening them to the scope of experimentation in music and in the world of sound, all of which keep on becoming more expansive and more intensely conscious. Loaded with hundreds of maps, charts, statistics, photos, and Web links, this handy almanac will help students boost their brainpower in school and at home. Includes puzzles and games. Full color.

Considers the Native American abandonment of the South Carolina coast A prevailing enigma in American archaeology is why vast swaths of land in the Southeast and Southwest were abandoned between AD 1200 and 1500. The most well-known abandonments occurred in the Four Corners and Mimbres areas of the Southwest and the central Mississippi valley in the twelfth and thirteenth centuries and in southern Arizona and the Ohio Valley during the fifteenth century. In *Megadrought in the Carolinas: The Archaeology of Mississippian Collapse, Abandonment, and Coalescence*, John S. Cable demonstrates through the application of innovative ceramic analysis that yet another fifteenth-century abandonment event took place across an area of some 34.5 million acres centered on the South Carolina coast. Most would agree that these sweeping changes were at least in part the consequence of prolonged droughts associated with a period of global warming known as the Medieval Climatic Anomaly. Cable strengthens this inference by showing that these events correspond exactly with the timing of two different geographic patterns of megadrought as defined by modern climate models. Cable extends his study by testing the proposition that the former residents of the coastal zone migrated to surrounding interior regions where the effects of drought were less severe. Abundant support for this expectation is found in the archaeology of these regions, including evidence of accelerated population growth, crowding, and increased regional hostilities. Another important implication of immigration is the eventual coalescence of ethnic and/or culturally different social groups and the ultimate transformation of societies into new cultural syntheses. Evidence for this process is not yet well documented in the Southeast, but Cable draws on his familiarity with the drought-related Puebloan intrusions into the Hohokam Core Area of southern Arizona during the thirteenth and fourteenth centuries to suggest strategies for examining coalescence in the Southeast. The narrative concludes by addressing the broad implications of late prehistoric societal collapse for today's human-propelled global warming era that portends similar but much more long-lasting consequences.
