Angels of Efficiency traces the invention of film and the parallel rise of management consulting, telling the story of how these together brought about new forms of information visualization and visual management. The period from 1880 to 1930, author Florian Hoof argues, saw the genesis of a form of visual knowledge that provided a novel means to intervene in management processes. Visual management largely superseded oral and written forms of communication and decision-making, instituting a strategy for overcoming the mid-nineteenth-century crisis of control and resulting in a media-based form of rationality. Focusing largely on early corporate consulting in America by tracing the careers of Frank Gilbreth and his wife and business partner, Lillian Gilbreth, Hoof examines the rise and lasting effects of corporate consulting as a visual form. Framing consulting as a cultural technique that is characterized by media processes in which the boundaries of economic logic and legitimacy emerge, Angels of Efficiency forges a new approach to the history of consulting. In addition to pioneering a new field of film and media studies, Hoof contributes original research to American cultural and economic history, such as archival findings concerning Gilbreth's consulting efforts for the German Army during WWI. With this distinct and innovative interdisciplinary approach, Hoof has marshalled cinema and media studies, business history, and science and technology studies to make sense of the rise of consulting practices and their remarkable stability to this day.

In den letzten zwanzig Jahren hat die Unternehmensberatung ein starkes Wachstum und ein hohes Maß an internationaler Verbreitung erfahren. Wie aber erschließen Unternehmensberater erfolgreich neue internationale Märkte? Mit Hilfe eines institutionellen Ansatzes untersucht der Autor die Funktion sozialer Netzwerke zur Überwindung geographischer Ferne. Empirische Fallstudien in London, Madrid und Frankfurt zeigen die fundamentale Bedeutung von Reputation und Vertrauen für die Internationalisierung. Das Buch leistet damit einen systematischen Beitrag zu einem sozio-institutionellen Verständnis wirtschaftlicher Globalisierungsprozesse.

Vor mehr als zwanzig Jahren fiel der Eiserne Vorhang, und mit ihm verschwand ein Ordnungsmuster, das die Welt in zwei Lager teilte. Doch was bleibt von den Strukturen, Praktiken und Institutionen des Kalten Krieges? Welches politische, soziale, militärische und kulturelle Erbe prägt direkt und indirekt die Welt bis in unsere Gegenwart? Das Wechselspiel von Vergangenenem und Gegenwärtigem, die Präsenz des Gestern im Heute thematisiert der vorliegende Band - eine Spurensuche in Ost und West und in der "Dritten Welt" auf unterschiedlichen Themenfeldern: Nationaler Sicherheitsstaat, Außen- und Sicherheitspolitik, Gesellschaft, Wirtschaft und Recht, Staatenbildung, Staatsreform und Staatszerfall.

Professional service firms are critical agents of contemporary economies and understanding them has become a central focus of recent scholarship. This very timely and well organized Handbook brings together several leading scholars who explore how we might think and theorize about professional service firms and their entrepreneurial behaviours. The Handbook will become a key source for the growing community of researchers in this area. Æ Royston Greenwood, University of Alberta, Canada Æ For too long, both researchers and practitioners have presumed that professional service firms follow the status quo when they should better understand how these professionals set the rules for globalization. This Handbook reminds us that professionals are as much the shock-troops of capitalism as the multinational corporations that they serve. As this Handbook shows, the leading firms successfully compete with each other by fostering entrepreneurship and innovation in order to service an institutional system that undergirds the international economy. Æ Christopher McKenna, University of Oxford, UK Professional services are increasingly seen as an important foundation for future economic growth and prosperity. Yet research on innovative and entrepreneurial processes in professional services has been surprisingly scarce. This Handbook provides a collection of original contributions from leading scholars outlining the current stock of knowledge in the area as well as providing directions for further research. The expert contributors discuss entrepreneurship and innovation from a number of different perspectives, including the entrepreneurial professional team, the entrepreneurial firm and the institutional environment. The first part of the book looks at the challenges of entrepreneurship specific to the professional service firm while the second explores the creation and exploitation of entrepreneurial opportunities in the professional service team. Part III turns to the organization and Part IV to the management and growth of the entrepreneurial professional service firm. The final part discusses the interplay between professions, firms and the institutional environment. Researchers, scholars and PhD students in the areas of entrepreneurship and professional service firms along with advanced students of management will find this volume of great value.

The management consulting industry is a leading component of the world's knowledge economy permeating every segment of industry, commerce and government service. A multi-billion dollar phenomenon, it has yielded its own body of knowledge and set of practices. Exponents do make a lot of money for the consulting businesses they serve. What is not always understood, or transparent, is the value clients receive. This book seeks to make good that deficiency in our perception of the profession. Learning on his deep and wide-ranging experience, Dr John Louth seeks to lift the lid on the management consulting profession in a critically reflective and accessible manner. With vignettes and examples drawn from his own experience and practice, he dissects the rational explanations usually provided by practitioners. He calls for restraint and self-awareness from both client and consultant, and advocates the reform of a profession that seems increasingly

powerful and unregulated. Dr Louth explores the management consulting profession on its own terrain, through its own language and discourses. He disentangles the management consultant's notions of "strategy," "risk management," "change" and "project management" so that these become meaningful to the layperson. Given the complexity that dominates the global geopolitical system and international economy, he asks how management consulting diagnoses can be effective in an uncertain and highly contingent world. With a foreword by Professor Rebecca Boden of the University of Roehampton Business School in London, this book is an accessible and scholarly monograph that is essential reading for those seeking to understand management consultancy and its role in the modern world.

Management Consulting A Complete Guide to the Industry Wiley

Was ist kompetentes und professionelles Beratungshandeln? Zur Klärung dieser Frage hat Tanja-Vera Herking im Rahmen von tiefenanalytischen Interviews mit Unternehmensberatern die Kompetenz- und Professionalitätsstrukturen sowie deren Entwicklungsprozesse innerhalb ihrer Beraterbiographien erhoben. Hierdurch werden die spezifischen Strukturen u.a. der Beratungsinteraktion, Wissensgenese und -applikation, aber auch Inszenierungserfordernisse und paradoxe Handlungsanforderungen deutlich, welche die Autorin in einem Strukturmodell von Beratungskompetenz und -professionalität zusammenfasst. Ausgehend von diesem Modell arbeitet sie Parameter der Kompetenzentwicklung und Professionalisierung von Unternehmensberatern heraus. Die aufgezeigten Prozesse lassen sich in einem Stufenmodell mit spezifischen Entwicklungsaufgaben darstellen, die Unternehmensberater auf ihrem Karriereweg zu lösen haben. Dabei werden Ansätze einer sogenannten Meta-Beratung erkennbar, welche die Entwicklungsprozesse der Unternehmensberater sowie der Unternehmensberatung als Eliteschmiede befördern können.

Unternehmensberatung, eine bisweilen wundersam anmutende Mischung aus beinhardter Rationalisierung, Esoterik und Zukunftsvision, kommt immer dann zum Einsatz, wenn wirtschaftliche Strukturen aus dem Gleichgewicht zu geraten drohen. Was es eigentlich heißt, sich beraten zu lassen, welche Medien dabei eine Rolle spielen und wie die Branche der Unternehmensberatung zu einem zentralen gesellschaftlichen Wissenssystem wurde, ist Gegenstand dieses Buches.

Gesellschaftspolitische Entwicklungen werden nicht erst seit der jüngsten Finanzkrise durch Unternehmensberatungen wie McKinsey geprägt. Die Beraterkultur nimmt seit langem Einfluss auf die Gestaltung ökonomischer wie politischer Prozesse. Eine historische Grundlagenstudie zum Visual Management. Entscheidenden Anteil daran, dass die Consulting Branche zu einem zentralen gesellschaftlichen Wissenssystem wurde, hatten Medien der Beratung: der Film, graphische Modelle, Statistiken und Flow-Charts. Mit ihrer Hilfe inszenierte sich etwa der photographie- und filmbegeisterte Consultant Frank Bunker Gilbreth als "Engel der Effizienz", der in den 1910er Jahren in Berlin und den Vereinigten Staaten seinen Auftraggebern verspricht, im Unternehmen verborgene Effizienzpotentiale heben zu können. In den USA erproben Berater zur gleichen Zeit graphische und kinetische Verfahren der Zukunftsantizipation. Daraus gehen Praktiken des Visual Management hervor, die nicht nur ein neues Sinnsystem darstellen, sondern dem durch technologische und soziale Umbrüche verunsicherten Industriemanagement Orientierung versprechen. Die Entzauberung der Welt durch deren ingenieurwissenschaftliche Rationalisierung geht paradoxerweise mit einer Verklärung der Beraterbranche einher. Beratung, eine bisweilen wundersam anmutende Mischung sowohl aus beinhardter Rationalisierung und Kontrolle wie auch aus Esoterik und Zukunftsvision, kommt immer dann zum Einsatz, wenn wirtschaftliche Strukturen aus dem Gleichgewicht zu geraten drohen.

Inhaltsangabe: Problemstellung: Obwohl seit mehreren Jahren das Internet als Ort der Geschäftsabwicklung in vielen unterschiedlichen Formen für Unternehmen und Privatpersonen einen wichtigen Anteil an zahlreichen Prozessen gefunden hat, ist die Anwendung dieser neuen Technologien im Umfeld von Beratungsdienstleistungen noch stark unterentwickelt. Dieser Umstand ist umso erstaunlicher, als das Unternehmensberatungen bei der Umsetzung neuer Geschäftsmodelle oder der Portierung bekannter Vorgehensweisen auf die neuen Technologien eine Vorreiterrolle eingenommen haben. Gerade im aktuellen wirtschaftlichen Umfeld, in dem sich die Beratungsbranche befindet, würde eine vermehrte Anwendung elektronischer Beratungsdienstleistungen den Markt verändern und Unternehmen die diese Herausforderung zeitig meistern können so einen erheblichen Wettbewerbsvorteil verschaffen. Im Zusammenhang mit IT-basierten Unternehmensberatungslösungen ist Sicherheit ein wesentlicher und erfolgskritischer Faktor. Diese Tatsache ergibt sich vor allem aus dem Umstand, dass Angriffe auf IT-Systeme in den letzten Jahren kontinuierlich und exponentiell zugenommen haben. Da hier in den nächsten Jahren ein vermehrter Beratungsbedarf identifiziert werden kann, gibt ein sicheres, über das Internet funktionierendes Beratungskonzept den Beratungsunternehmen ein zugkräftiges Innovationsinstrument an die Hand. Den Rahmen dieser Arbeit bildet ein IT-basiertes Beratungskonzept und bereits vorhandene Sicherheitstechnologien für Netzwerke und das Internet. Der Schwerpunkt der Untersuchung liegt auf der Implementierung von Sicherheitstechnologien, die Transaktionen, Kommunikation und Geschäftsprozesse innerhalb eines IT-basierten Beratungskonzeptes hinsichtlich bestimmter Sicherheitsaspekte zuverlässig ermöglichen. Bevor die zentralen Inhalte der Arbeit thematisiert werden, wird im Folgenden zunächst der strukturelle Aufbau des Vorgehens

aufgezeigt. Damit soll die Grundlage für ein umfassendes Verständnis der Inhalte aufgezeigt werden. In Kapitel 2 werden nach der allgemeinen Begriffsbestimmung der Unternehmensberatung verschiedene Formen der IT-basierten Beratung vorgestellt. Im weiteren Verlauf wird die IT-basierte Unternehmensberatung am Beispiel eines E-Consulting-Konzeptes konkretisiert und der Ablauf des Beratungsprozesses dargestellt. Abschließend werden in der Beratung verwendete Informationstechnologien vorgestellt und an Hand zweier Praxisbeispiele näher erläutert. Das dritte Kapitel [...]

The interaction between clients and consultants during consulting projects is essential for their success and therefore for the long-term survival of consulting companies. The aim of this book is to further advance our understanding of the nature of client-consultant relationships. Building upon a critical discussion of the contributions and shortcomings of existing research, Natalia Nikolova proposes an innovative conceptual model, which provides a critical yet constructive platform for the development of a more differentiated view of professional work. The framework concentrates on the cultural and political relations between clients and consultants during service production. It represents a prolific platform for further research and provides practitioners with an increased awareness of hitherto under-explored issues of client-consultant relationships. This book is aimed at scholars of professional business service firms and those interested in multidisciplinary studies of human relations in general. It will also appeal to students interested in these areas and to clients and consultants involved in consulting projects.
