"The Life of Cheese is the definitive work on America's artisanal food revolution.

Heather Paxson's engaging stories are as rich, sharp, and well-grounded as the product she scrutinizes. A must read for anyone interested in fostering a sustainable food system." Warren Belasco, author of *Meals to Come: A History of the Future of Food* "Heather Paxson's lucid and engaging book, *The Life of Cheese*, is a gift to anyone interested in exploring the wonderful and wonderfully complex realities of artisan cheesemaking in the United States. Paxson deftly integrates careful considerations of the importance of sentiment, value and craft to the work of cheesemakers with vivid stories and lush descriptions of their farms, cheese plants and cheese caves. While she beguiles you with the stories and tastes of cheeses from Vermont, Wisconsin and California, she also asks you to envision a post-pastoral ethos in the making. This ethos reconsiders contemporary beliefs about America's food commerce and culture, reimagines our relationship to the natural world, and redefines how we make, eat, and appreciate food. For cheese aficionados, food activists, anthropologists and food scholars alike, reading *The Life of Cheese* will be a transformative experience." Amy Trubek, author of *The Taste of Place: A Cultural Journey into Terroir*

University can be a psychologically distressing place for students. Empirical studies in Australia and the USA highlight that a large number of law students suffer from psychological distress, when compared to students from other disciplines and members of the general population. This book explores the significant role that legal education can play in the promotion of mental health and well-being in law students, and consequently in the profession. The volume considers the ways in which the problems of psychological distress amongst law students are connected to the way law and legal culture are taught, and articulates curricula and extra-curricula strategies for promoting wellbeing for law students. With contributions from legal academics, legal practitioners and psychologists, the authors discuss the possible causes of psychological distress in the legal community, and potential interventions that may increase psychological well-being. This important book will be of interest to legal academics, law students, members of the legal profession, post-graduate researchers as well as non-law researchers interested in this area.
