Once a taboo subject, victims of rape and molestation were left without a voice with nowhere to turn and no one to help them. In *Take a Walk in My Shoes*, author B. J. Parker shares her personal story of being raped and molested by her stepfather at a young age. She exposes the controversial topic of molestation, its long-term adverse effects on interpersonal relationships, its role in promoting self-destructive behaviors, and the need to find control. In this inspirational memoir, Parker, now fifty-three years old, comes to terms with her early abuse and tells about taking the crucial steps needed to find her way back. *Take a Walk in My Shoes* narrates Parkers story and how she adopted a life of alcohol and drugs to ease the constant emotional pain and how she chose to be homeless rather than live in a dwelling that had everything, including her abuser. Her story follows her journey through childhood and as a runaway teenager, a high school dropout, and a single mother. *Take a Walk in My Shoes* tells how she overcame the stigma of abuse by sharing the message that successes are possible for each and every victim. Parker explains how to embrace life, believe in yourself, dig deep within your soul, and hold tight to your dreams.

Globalization and Armed Conflict addresses one of the most important and

controversial issues of our time: Does global economic integration foster or suppress violent disputes within and between states? Here, cutting-edge research by leading figures in international relations shows that expanding commercial ties between states pacifies some, but not necessarily all, political relationships. The authors demonstrate that the pacific effect of economic integration hinges on democratic structures, the size of the global system, the nature of the trade goods, and a reduced influence of the military on political decisions. In sum, this book demonstrates how important the still fragile "capitalist peace" is.

I had always wanted to visit Cuba. The mystique surrounding Castro and Che had piqued my curiosity and imagination. What was there about this tiny country which lay just 80 miles from Florida that prompted our government to treat it as a threat to our way of life? Why had we backed a poorly organized band of mercenaries in an aborted invasion attempt? Why had American celebrities and fun-seekers flocked there in pre-Castro days? Why is Cuba still a mecca for millions of tourists from all over the world? Why does our government make it so difficult for United States' citizens to visit there? Well, I found a way to go to try to find some answers to those questions and many others. This is the story of my visit and an account of what I found.

"One Man In His Time: A Memoir" is an account of a full life which includes Prentiss's participation in both national and local politics at a high level and his friendship with major figures including Sen. George McGovern and many others. He had two meetings with Gov. Jimmy Carter during his presidential campaigns, and he was a guest in the Reagan White House to receive a major medal. Other portions of his memoir describe, mostly in anecdotal accounts, his extensive work with troubled teenagers sent to his program by the Orange County Florida Juvenile Court. He was also a teacher and administrator at both the secondary (Florida Military School) and college (Valencia College in Orlando) levels of education. He reached many high goals in his life despite having a troubled early adolescence which he describes in detail. His Air Force experience as an Intelligence Officer was also one of high adventure. Prentiss has described himself psychologically as a "seeker of high sensation." This is borne out in his memoir including his choice to be a Volunteer Fireman and his Air Force "close calls." Much of his life is told in the details of his life and times. A reader will have a better feel for the years between 1932 and the present after reading this Memoir.

It was in the late 1970's The American Government was under a lot of pressure from U.S. Citizens to end the War in Vietnam. The American people were tired of being lied to by the political media about what was going on in Vietnam. The American People were beginning to ask many questions that forced the American Government to bring their sons and daughters back home. At the end of 1974 the American Government issued the order to pull out of Vietnam. The number one musical song during the war was recorded by a group called the "Animals", which was titled, "We got to get out of this place". Music was the one thing that helped lift the spirits of the American soldiers. It motivated and directed many events in their lives. The returning soldiers came back with a great hatred towards the Vietnamese people. Many soldiers came back with bad memories of a war that would impact their lives forever. This story is about a woman who became a victim of two different cultures. Love forced her to

choose between her life achievements or a future and security of A Black U. S. American. This is a very unusual love story bought about by the War in Vietnam.

The Second World War stands for the criminal madness of German Nazi government. Less known is their responsibility for the only climatic shift from warm to cold in an otherwise constantly warming world over the last 150 years. Not knowing the reason for the biggest climatic shift since industrialization, which started in winter 1939/40, rectifies to speak about failures of meteorology. Only four months into Second World War Northern Europe experienced the coldest winter in 100 years. The reason: plain physics! Naval war in Northern European seas released the summer heat too quickly. Polar air got free access to Europe. The same applies to the second and third war winter. Europe was back in the Little Ice Age. After Japan attacked Pearl Harbor on Dec. 7th, 1941 naval war became a global affair. In close conformity with naval war in European seas, and subsequently in the Pacific, a pronounced global cooling took place, which lasted until about the mid 1970s. Furthermore, a thorough research of strong warming in the Northern Hemisphere from winter 1918/19 to winter 1939/40 would have revealed a convincing link to naval war in Europe from 1914 to 1918. But climatology does not care! The connection between two naval wars and two climatic changes within 25 years has not yet been investigated and explained. If they had warned governments about the threat of climate change, as their successors currently do with the "greenhouse effect", naval activities in two World Wars may have been prevented, or at least been limited. Claims to understand climate should be regarded as a failure as long as meteorology is unable to explain the two most pronounced climatic shifts during the last century and the role two world wars had in this game. These two events would show that the oceans have a dominate role in the climate system, and man is able to change its direction by intensive activities in the marine environment. It took four months to generate the extreme regional winter 1939/40; and subsequently a few years to contribute to global cooling lasting for three. The book should alter the debate on climate change!

"You're listening to Delilah." Delilah, the most listened-to woman on American radio, has distinguished herself as the "Queen of Sappy Love Songs" and America's ultimate romance guru. But Delilah's life off-air is all the more extraordinary—a life full of trials, forgiveness, faith, and adventure. In *One Heart at a Time*, Delilah's heartfelt account of her own story reveals what shaped the voice that 9 million listeners know and love. Today, Delilah is the founder of an NGO called Point Hope, the owner of a 55-acre working farm, and an inductee of the National Radio Hall of Fame. But to achieve this, she often had to pave her own way. Disowned by her father, divorced, and fired from a dozen jobs over the years, Delilah pushed forward through family addiction and devastating loss, through glass ceilings and red tape. Her

consistent goal to help those in need took her everywhere from the streets of Philadelphia to refugee camps in Ghana. Along the way, Delilah was blessed by thirteen children—ten of them adopted. Though many of them contend with special needs and the forever effects of a broken foster care system, her children have been able to transform their own remarkable lessons into guiding lights for other kids in need. Just as Delilah has done. One Heart at a Time exposes the real woman behind the microphone. In her easy-going style and characteristic, beloved voice, Delilah tells her deeply moving life story as the series of miracles it is.

From a renowned investigative reporter, the true story behind a horrifying Internet abuse epidemic—and the heroes who are out to stop it. The Internet has helped make child abuse terrifyingly common—it is the new face of crime in the 21st century. There are tens, probably hundreds of thousands of children whose sexual abuse has been electronically recorded and distributed on the Internet. As Julian Sher reveals, the men perpetrating these crimes include lawyers, priests, doctors and politicians. They pick their victims from the streets of Bangkok to Boy Scout troops in England, while the police—from a crack image analyst with the Toronto police to an FBI agent who poses as a 13-year-old girl online—work desperately to nab the predators. One Child at a Time goes behind the headlines to show how law officers are fighting back against this tide of abuse, from daring rescues in homes to the seizures of millions of dollars in the offshore bank accounts of the porn merchants. In riveting detail, Julian Sher shows how clue by clue, and image by image, investigators are using cutting edge tools, turning the technology of the Internet against the perpetrators as they race to find and rescue the victims—children who otherwise have no voice. This important book explores the ramifications of a worldwide struggle, from the need for updated legal powers to the unexpected effects the Internet has had on our social fabric. It also includes a full list of resources for concerned parents. Though sometimes harrowing, One Child at a Time is also inspiring—and never less than absolutely relevant.

The Korean War in Retrospect provides a compilation of presentations from a conference sponsored by the Center for National Security Law and the John Bassett Moore Society at the University of Virginia Law School to celebrate the fortieth anniversary of the outbreak of the Korean War. The conference brought together many scholars and participants from the war. They dealt with many of the historical matters related to the war beginning with its origins, while also dealing with the armistice negotiations, and the failure of the war as a practice of deterrence. However, the major focus falls on the nature and ramifications of the war and what can be learned from the results in the long term in regard to the practice of war and foreign policy.
