Die regelmäßige Versorgung mit Informationen zur Entscheidungsunterstützung für Führungskräfte hat einen hohen Stellenwert in Unternehmen und ist wesentlicher Bestandteil des betrieblichen Berichtswesens. Das Controlling mit seiner Informationsversorgungs- und Koordinationsfunktion nimmt dabei eine entscheidende Rolle ein. Trotz moderner BI-Systeme, die bei der Erstellung und Analyse unterstützen sollen, klagt das Controlling über ineffiziente Geschäftsprozesse, Kommunikationsprobleme mit anderen Abteilungen und fehlende Agilität in der Berichterstattung. Die daraus resultierenden Störungen beeinflussen die Qualität der Informationen und sorgen für unzureichende Entscheidungsgrundlagen. In einer agilen Geschäftswelt mit hohem Wettbewerbsdruck können sich Unternehmen die daraus resultierenden Informationslücken oder -asymmetrien nicht leisten. Dies haben Softwarehersteller erkannt und setzen auf den Trend des Self-Service-BI. Hierbei werden Fachbereiche stärker bei der eigentlichen Berichterstellung eingebunden, um eine höhere Flexibilität bei der Analyse zu gewährleisten. Obwohl Self-Service-BI als einer der bedeutenden Trends am BI-Markt identifiziert wurde, ist der Einsatz in Unternehmen umstritten. Aus diesem Grund untersucht diese Arbeit Anwendungspotentiale und Notwendigkeit von Self-Service-BI im Controlling mit Hilfe einer praxisorientierten Studie. Zudem wird geprüft, ob überhaupt der Wunsch nach mehr Eigenständigkeit und Flexibilität im Berichtswesen existiert. Darüber hinaus zeigt eine praktisch durchgeführte Fallstudie mögliche Nutzenpotentiale von Self-Service-BI im

Vertriebscontrolling auf und ermöglicht Einblicke, wie die Integration von Self-Service-BI in ein bestehendes Berichtswesen gelingen kann.

BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design “best practice” standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been

created simply to provide a “standard”, instead they are based on the most important litmus test “ what standards actually cause dashboards to be used, and what “best

practices” of dashboard and report development provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x platform, before

Oracle acquired Siebel. The current version of the guide reflects Oracle’s 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of

Business Intelligence (BI) stellt in Unternehmen die Versorgung mit entscheidungsorientierten Informationen sicher. Fachanwender und IT-Spezialisten beklagen allerdings häufig die Qualität der Informationen, die in der Regel auf eine fehlende Gesamtstrategie oder die unzureichende Organisation zurückzuführen ist. Die Autoren erörtern in diesem Buch die verschiedenen Probleme im Einsatz von BI und zeigen praktische Lösungsansätze auf. Sie entwickeln ein Vorgehensmodell, das Inhalte, Architektur und Organisation berücksichtigt. Dabei werden die verschiedenen Varianten eines Business Intelligence Competency Center (BICC), deren organisatorische Verankerung sowie Rollen und Aufgaben beschrieben. Behandelt werden im Einzelnen: • Konzeptioneller Rahmen einer BI-Strategie • Entwicklung einer BI-Strategie • Organisation eines BICC: - Funktionen und Personal - Aufbau und Einbettung im Unternehmen • Planung und Einführung eines BICC • Laufende BICC-Prozesse • Werkzeuge für den erfolgreichen Einsatz von BI Die 2. Auflage vertieft neue, wesentliche Aspekte des BICC wie Big Data, Mobile BI, Agile BI und Visual BI. "Das Buch kann somit gleichermaßen BI-Praktikern empfohlen werden, die u.a. die konkreten Checklisten, die klaren Best Practices und konkreten Beispiele schätzen werden, wie auch Lesern aus Forschung und Lehre, die einen Überblick über die relevanten Ansätze im Kontext der BI-Strategie und BI-Organisation suchen." Aus dem Geleitwort von Dr. Henning Baars, Universität Stuttgart In der Edition TDWI erscheinen Titel, die vom dpunkt.verlag gemeinsam mit dem TDWI Germany e.V. ausgewählt und konzipiert werden. Inhaltliche Schwerpunkte dieser Reihe sind Business Intelligence und Data Warehousing.
