Members of the middle class in colonial Malabar left behind a copious amount of writings. These are to be found, among other places, in magazines, autobiographies and diaries. This book explores the social history of the middle class in the region during the British period on the basis of these writings in combination with archival sources. It delves into how they conceptualized domesticity, forged new friendships cutting across caste, and sometimes, even racial lines, and the new forms of leisure they

envisaged. The author also analyses the dilemmas the group faced as it responded to the changes unleashed by colonial modernity at their work places, in the public sphere, and inside homes, where they desperately clung on to tradition even while accepting much of what the West had to offer. This book chronicles the development of Eco criticism in Malayalam literature in the context of three well known novels, viz. Nellu, Marakappile Theyyangal, and Aathi. Until the last decade of the previous century, ecological concerns were unknown to the society in general. Malayalam literary world was largely preoccupied with its own overemphasized themes. But with much concentration on infrastructure development and the unprecedented development of the service sector, the inevitable conflict between nature and culture, between the common people and development managers became the order of the day. In the mid-1980s and early 90s, there has been a substantial growth in environmental literary studies. This book examines the shift happened in literature from its preoccupation with the 'human' in nature to a concern for the nonhuman nature. With full acknowledgement of the influence of earlier eco critical texts published in the language, this book seeks to study in detail, how the above mentioned novels can be called in as prototypical of a new sensibility that has just made its presence felt in Malayalam literary scenario. Literary Eco criticisms, of which these novels are proper representations, depicts the struggles undertaken by the people for their right to land, water and air and at the same time engender resistance movements elsewhere. Such a study needs to be historically located within the large compass of literature. Eco criticism is motivated by environmental praxis in as much it seeks literary representations of physical nature.

This definitive guide to independent India takes us through the events and personalities that have shaped India in the seventy years since 1947. Starting with Independence Day, it covers the decades in which the subcontinent saw the rise of democracy, its metamorphosis from an economy driven by selfsufficiency to one propelled by the economic reforms of the 1990s, and the concurrent liberalization, privatization and globalization that boosted India's growth rate. It also marks the transition from the era of single-party dominance to that of coalition politics and to identity-based politics. Arranged chronologically, India since 1947 covers a wide range of topics, from the Green Revolution, the Five-Year Plans, the infamous Emergency and the emergence of the Bharatiya Janata Party as a major political force to the beginning of television in India and the launch of its space and nuclear programmes. A separate listing of the events leading up to

Independence, interesting factoids on various aspects of modern India and a detailed index further enhance the appeal of the book.
