

Pearson 4th Grade Interactive Science Chapters

Inquiry-based general science curriculum for the third grade featuring a text/workbook that students can write in.

INTERACTIVE SCIENCE. 4PEARSON

Inquiry-based general science curriculum for the fourth grade featuring a text/workbook that students can write in.

Interactive Science Activity Workbooks Homeschool Activities Workbook includes: · Activities Workbook About the Program Interactive Science Activity Workbooks develop the skills necessary for children to truly understand science concepts with: · Fun, educational activities for kids · Opportunities for kids to create their own experiments · Easy, step-by-step instructions for kids to complete experiments at home Key Points/Program Differentiators · Customized for at-home use · Individual attention · Uses easy-to-find materials · Visually engaging and fun to use Program Overview The Interactive Science Activities workbooks are designed for the home environment, and modified from the lengthy lab manuals used in schools. They are custom designed at-home activities for students and parents to use on their own or with the Interactive Science grade-level bundles. The Pearson at Home Interactive Science Activities workbooks provide children with a student-centered approach to scientific discovery. Each hands-on activity presents a child with a challenging question that can be investigated and explored independently or with parent guidance. As part of the directed inquiry process, the child will answer this question by exploring the resources, following the outlined procedures of each activity, collecting data, and drawing conclusions. In some instances, parents might need to help children with certain parts of the activity. Following the directed inquiry, the child will be given an opportunity to expand and demonstrate scientific reasoning by modifying the investigation and designing his or her own experiments to illustrate the concept. Utilizing these activities will encourage every child to think like a scientist and encourage him or her to be inquisitive. This curriculum has been modified specifically for homeschool families. At times, there may be references to print or digital components that are not included within the homeschool bundle. This will not hinder your child's successful completion of the course.

Populations and Communities Ecosystems and Biomes Living Resources Land, Water, and Air Resources Energy Resources

Science curriculum for the primary and elementary grades featuring a text that students can write in.

Science education is the most engaging when it features hands-on lessons, numerous labs and worksheets. For this reason, the Interactive Science: Grade 4 curriculum for homeschooling features those components. By working with this program, you'll ensure your child has access to an exciting learning experience that will help him or her develop a love for the subject. By the time your child completes this program, he or she should be able to: Use prior knowledge to predict the outcome of an experiment. Use the Scientific Method to conduct experiments. Conduct research using the computer and books. Understand that energy and fuels we use in our daily lives come from the environment. Design a model of a wave. Observe the ways in which organisms interact with their environments. You can help your child accomplish these and other Science-related goals by going using Interactive Science: Grade 4 curriculum set. Please note that Pearson creates educational materials for all types of learners.

For that reason, when creating a program, we ensure that the material will be accessible to as many students as possible. As such, we create many ancillary products that fit specific situations and meet a variety of needs. While there are many components to each of our overall educational programs, some of these ancillaries do not meet the needs of homeschoolers, others do not make sense in a homeschool environment and some require an expensive technological infrastructure to deploy. The homeschool product configurations, while selected from a larger program, are complete curriculum bundles designed to engage your children and help them thrive while being mindful of your budget. It is important to note that at times there will be resources mentioned throughout our curriculum material descriptions that are not included in your package. However this will not hinder your child's successful completion of the course. Rather, the exclusion of certain materials will make homeschooling more budget-friendly and will ensure your curriculum meets your individual needs. Interactive Science is a next generation K-8 science program featuring an innovative write-in student edition (grades 1-8) that makes learning personal, relevant, and engaging. Your child will get all of the content, interactivity, and practice they need between the covers of a single book. Your child will interact with science through the many labs and hands-on activities throughout the student worktext. Detailed lesson plans make instruction easy In-depth, hands-on activities throughout each lesson engage your child Got It checkpoints ensure your child understands the material Understanding By Design model leads students to a deeper understanding of science concepts Each homeschool bundle includes a Parent Guide, Write-In Student Edition, and online Teacher s Edition eText. Student online access is not available at this time.

****Please note the Teacher s Edition eText is accessible for one full year, online only. Individual pages cannot be printed.**** Thank you for your interest in Pearson Homeschool. Our product packages were designed with the homeschool community in mind. Pearson creates education materials for all types of learners. When creating a program, we ensure that the material will be accessible to as many students as possible and as such, we create many ancillary products to fit specific situations to meet a variety of needs. While there are many components to each of our overall educational programs, some of these ancillaries do not meet the needs of homeschoolers, others do not make sense in a homeschool environment and some require an expensive technological infrastructure to deploy. The homeschool product configurations, while selected from a larger program, are complete curriculum bundles designed for your children to be engaged and to thrive, while being mindful of your budget. It is important to note that at times there will be resources mentioned throughout your materials that are not included in your package, however this will not hinder your child's successful completion of the course.

Interactive science student texts for grades K-5.

Inquiry-based general science curriculum for the fifth grade featuring a text/workbook that students can write in.

Dieser Band berichtet - für das Fach Englisch - über die Methoden und Ergebnisse der Evaluierung eines Schulversuchs zur Begabtenförderung nach dem Prinzip der Akzeleration des gymnasialen Bildungsganges (sogenannte «Expressklassen»). Die deskriptive Studie zeichnet nicht nur ein detailliertes Bild der Sprachfähigkeit von Gymnasialschülern der ausgehenden Sekundarstufe I, sondern beschreibt darüber hinaus den Unterricht in diesen Klassen und die Sicht der Beteiligten (Schüler, Eltern und Lehrer). Sie zieht ferner Konsequenzen für dringend notwendige Veränderungen des weiterführenden und fortgeschrittenen Englischunterrichts. Das Fach Englisch braucht eine funktionale Rede-, Gesprächs- und Schreibschulung, die im Sinne eines positiven Rückkopplungseffekts auf den Unterricht von validen und zuverlässigen

Verfahren der Leistungskontrolle und -messung begleitet wird.

Co-published with TESOL Press There is a growing need for knowledge and practical ideas about the preparation of teachers for English language learners (ELLs), a growing segment of the K-12 population in the United States. This book is for teachers, administrators, and teacher educators looking for innovative ways to prepare teachers for ELLs and will position teachers to empower these students. This volume will appeal mostly to those preparing teachers in contexts that have not have historically had large numbers of ELLs, but have had a high rate of recent growth (e.g., Midwestern U.S.). This work is the combination of teacher preparation and ELL issues. This volume is unique in tackling pre-service and inservice teacher preparation. Additionally, the chapters collectively aim to go beyond merely equipping teachers to meet the needs of ELLs, but to reach a level of effectiveness with the outcome of equity. The book highlights the knowledge, skills, and beliefs of teachers about ELLs. Part I addresses teacher perceptions of, and beliefs about, ELLs and teacher preparation specifically addressing what they should know in terms of students' perspectives. Chapters attend to the experiences and beliefs of immigrant teachers about their roles, the role of service learning in teacher preparation, and the potential of understanding home literacy practices to change teacher beliefs about ELLs. Part II focuses on skills necessary to teach ELLs—writing skills teachers can draw on to inform their teaching practices, technological skills teachers need to develop, and skills related to focusing on the Common Core State Standards for English language arts and mathematics. Each chapter explicitly addresses implications for teacher education or professional development.
