This volume had its beginnings in the two-day colloquium, "Rethinking Chichén Itzá, Tula and Tollan," that was held at Dumbarton Oaks. The selected essays revisit long-standing questions regarding the nature of the relationship between Chichen Itza and Tula. Rather than approaching these questions through the notions of migrations and conquests, these essays place the cities in the context of the emerging social, political, and economic relationships that took shape during the transition from the Epiclassic period in Central Mexico, the Terminal Classic period in the Maya region, and the succeeding Early Postclassic period. Thoroughly revised and updated to reflect the most current trends and developments in the field, *Victimology: Theories and Applications, Second Edition* provides a comprehensive introduction to the study of victimization, crime typologies, and the impact of crime on victims, offenders, and society at large. Each chapter provides an overview of the scope, law, and victim response to crime and concludes with a summary and discussion questions to ensure comprehension. An overview of the issues impacting victims of a wide variety of traditional and contemporary crimes are examined, including child maltreatment, intimate partner violence, bullying, elder abuse, cybercrime and hate crimes. The

history and theories of victimology are explored, as well as definitive laws and policies, strategies for intervention, and future research areas. This Second Edition offers a balance between theory and application and will prepare readers to work with victims, offenders, and the justice system. New to the Second Edition: -Contains new contemporary case studies, including the cases of IMF chief Dominique Strauss-Khan, Casey Anthony, and the Senator Scott Brown case as illustrating non-disclosure of childhood abuse for 40 years. -Includes an analysis on the Casey Anthony case from the perspective of the jury in the chapter on justice systems. -A new chapter includes discussions on domestic and international databases and studies, including UCR, NCVS, StatsCan, Justice Canada, Interpol, and WHO reports on victimization. -Includes a new chapter on child abduction and exploitation including a discussion of child trafficking. -All tables and figures have been updated to reflect the most current data. -Every new printed copy is packaged with full student access to the companion website, which features a variety of engaging and interactive study tools. Key Features: -Offers a balance between theory and the research and practice-oriented tools to prepare readers to work with victims, offenders, and the justice system. -Covers current topics including: human trafficking, victims of gang violence, bullying, victims of terrorism, victims of cybercrime, property

crimes, corporate crimes, workplace violence, racial profiling and disproportionate penalties.

Discerning the early stages of the rebirth of a new Russian empire from the ashes of the Soviet Union, Vladimir Putin and Russia's Imperial Revival argues that Russia's recent overtly aggressive actions and foreign policy doctrines have signaled a renewal of the Cold War. At the least, Russia's actions represent the potential for renewal. This book explains these developments in a historical context. The book begins by describing Russia's initial policy of rapprochement after the collapse of the Soviet Union and its development into a foreign policy of threatened or actual armed aggression. It identifies today's Russia as a nation determined to re-establish itself as a political and military force. As a prominent figure in the development and continuation of its current foreign policy, Vladimir Putin plays a central role in the topics covered. Previous literature often treats Putin as an individual phenomenon examining his connections to corruption or the secret police, but here David E. McNabb examines him as the latest in a long history of Russian despots who followed similar expansionist policies. He details some of the tactics Putin uses to instill fear and dominate political policies of republics newly independent from Russia. These tactics include the use of energy as a weapon, cyber terrorism, and military support for ethnic Russian

separatists in other sovereign nations, most recently exemplified by Russia's annexation of Crimea from Ukraine via armed invasion. In an attempt to demystify Russia's re-emergence as an international political force, Vladimir Putin and Russia's Imperial Revival grounds its analyses in history. It explores as far back as the establishment of the first Russian empire, and regards Putin as a leader determined to establish a fifth imperial incarnation. It provides a nuanced understanding of how Russia arrived at its current position through recent and distant internal and international events.

World Civilizations, AP® Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. World Civilizations, AP® Edition presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations (or, in the case of the earliest period, crossregional contact), and the emergence of new and roughly

parallel developments in many major civilizations. Based on "comparative work and focuses on global processes," this text helps students see the history of the world as one based on multiple disciplines. - Publisher.

The book features real-life examples and amazing diversity focusing on sociology's unique ability to personally resonate well with students' experiences. Throughout the text, the author carefully balances coverage of core topics and contemporary changes in society. Every chapter explores unique topics, such as same-sex marriage, Boko Haram, mob justice, Sharia law, as well as issues of inequality related to race, ethnicity, gender, social class, and urbanization. The text empowers students to use the lenses of sociological imagination to see sociology in everyday life. Using sociological imagination, theory, and sociological perspectives, the text helps students move beyond individual perspective to gain a sociological perspective.

An introduction to a new way of looking at history, from a perspective that stretches from the beginning of time to the present day, Maps of Time is world history on an unprecedented scale. Beginning with the Big Bang, David Christian

views the interaction of the natural world with the more recent arrivals in flora and fauna, including human beings. Cosmology, geology, archeology, and population and environmental studies—all figure in David Christian's account, which is an ambitious overview of the emerging field of "Big History." Maps of Time opens with the origins of the universe, the stars and the galaxies, the sun and the solar system, including the earth, and conducts readers through the evolution of the planet before human habitation. It surveys the development of human society from the Paleolithic era through the transition to agriculture, the emergence of cities and states, and the birth of the modern, industrial period right up to intimations of possible futures. Sweeping in scope, finely focused in its minute detail, this riveting account of the known world, from the inception of space-time to the prospects of global warming, lays the groundwork for world history—and Big History—true as never before to its name.

The book is devoted to the analysis of big data in order to extract from these data hidden patterns necessary for making decisions about the rational behavior of complex systems with the different nature that generate this data. To solve these problems, a group of new methods and tools is used, based on the self-organization of computational processes, the use of crisp and fuzzy cluster analysis methods, hybrid neural-fuzzy networks, and others. The book solves

various practical problems. In particular, for the tasks of 3D image recognition and automatic speech recognition large-scale neural networks with applications for Deep Learning systems were used. Application of hybrid neuro-fuzzy networks for analyzing stock markets was presented. The analysis of big historical, economic and physical data revealed the hidden Fibonacci pattern about the course of systemic world conflicts and their connection with the Kondratieff big economic cycles and the Schwabe–Wolf solar activity cycles. The book is useful for system analysts and practitioners working with complex systems in various spheres of human activity.

The aim of this book is to synthesize the role of information throughout the history of civilization's development. This will be defined through the convergence of (a) the cumulative evolution and revolution of the intellect (cognition as data, information, concepts, knowledge, and wisdom), (b) labor, and (c) politics which seek to control the environment, society, and the world, applying culture and infrastructure as tools. Whereas researchers reveal the myriad of dimensions of the social order and its historiography, this book provides a synthesis of the relations, which is limited to information (and its informing systems) and civilization within the context of *historiosophie* (history with judgment). The method presented in this book—the architectural approach to the dynamics of civilizational development—is a new layer over the quantitative history based on statistical data. In an architectural synthesis of civilization, we seek a “big picture” of “civilization waves” in order to develop some criteria-oriented views of

the world and its future predictability. To understand the crises and conflicts of civilization which are driven by technology in recent centuries, such a synthesis as well as optimism for human proactive adaptation, survival, and, development must be undertaken. This approach to civilizational development should allow humans to eventually “reinvent the future” in a continuous manner. We, in due course, should be able to predict the “rate of change” and provide “civilization bridging solutions” based on original thinking. It is important to remind ourselves that information is as old as our world (about 15 billion years) because plants and trees and, in general, non-human nature produces all sorts of information, for example, the changing colors of plants and trees, which is associated with the different seasons. When the first living organisms appeared on our planet, they had ability to inform as well by changing forms, colors, signals and, so on. The first signs of life on our planet came into being about 3.85 billion years ago. Therefore, organism-based life on the Earth actually came to be over a period of just 130 million years. Hominids diverged from apes some 10-6 million years ago (instinct-driven info-communication, i.e., behavior less controlled by cognition), and the first humans (bipeds with large brains who could use tools and sound-driven info-communication) took form around 6-2.5 million years ago in Southeast Africa. *Homo symbolicus*, who could skillfully use language, appeared about 60,000 years ago. The origin of civilization some 6,000 years ago marks the beginning of the first advanced info-communication systems applied by humans, who could even record information.

Karl Pearson, founder of modern statistics, came to this field by way of passionate early studies of philosophy and cultural history as well as ether physics and graphical geometry. His faith in science grew out of a deeply moral quest, reflected also in his socialism and his efforts to find a new basis for relations between men and women. This biography recounts Pearson's extraordinary intellectual adventure and sheds new light on the inner life of science. Theodore Porter's intensely personal portrait of Pearson extends from religious crisis and sexual tensions to metaphysical and even mathematical anxieties. Pearson sought to reconcile reason with enthusiasm and to achieve the impersonal perspective of science without sacrificing complex individuality. Even as he longed to experience nature directly and intimately, he identified science with renunciation and positivistic detachment. Porter finds a turning point in Pearson's career, where his humanistic interests gave way to statistical ones, in his *Grammar of Science* (1892), in which he attempted to establish scientific method as the moral educational basis for a refashioned culture. In this original and engaging book, a leading historian of modern science investigates the interior experience of one man's scientific life while placing it in a rich tapestry of social, political, and intellectual movements.

Trade, Circulation, and Flow in the Indian Ocean World is a collection which covers a long time span and diverse areas around the ocean. Many of the essays look at the Indian Ocean before Europeans arrived, reminding the reader that there was a cohesive Indian Ocean. This collection includes empirical studies and essays focused on particular area or production. The essays cover various aspects of trade and exchange, the Indian Ocean as a world-system, East African and Chinese connections with the Indian Ocean World, and the movement of people and ideas around the ocean. Presents a truly global history This global world history text emphasizes the major stages in societies' different interactions and assesses the development of major societies. Encompassing social, cultural, political and economic history, the authors examine key civilizations in world history. World Civilizations balances the discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved

in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

Stosunek do własnej historii i roli dziejowej cząsto różni się od sposobu jej postrzegania przez innych. Zjawisko kreowania wizji i interpretacji historycznych stanowi nieodłączny element procesu edukacyjnego. Percepcja oraz sposoby prezentacji polskiej historii i kultury w amerykańskich podręcznikach szkolnych i akademickich w zakresie przedmiotów historii powszechnej, historii europejskiej oraz historii cywilizacji zachodniej były w XX i na początku XXI wieku kształtowane pod wpływem zmieniającej się sytuacji społecznej i politycznej oraz dominujących tendencji naukowych. W koncepcjach filozoficznych i intelektualnych, rozwijanych w Europie Zachodniej i Stanach Zjednoczonych od czasów oświecenia do końca okresu zimnej wojny, najczęściej wykluczono narody oraz państwa Europy środkowej i Wschodniej z kręgu dominujących w świecie cywilizacji zachodniej. W konsekwencji Polska, jej historia i kultura były traktowane marginalnie. na temat udziału Polaków w drugiej wojnie światowej, Katynia czy powstania warszawskiego. Designed for introductory-level survey courses in World History. The primary goal of "World Civilizations" is to present a truly global history--from the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while at the same time assessing the development of major societies. Encompassing social and cultural as well as political and economic history, the book examines key civilizations in world history. "World Civilizations "balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

Victimology: Theories and Applications introduces readers to the study of victimization, crime typologies, and the impact of crime on victims, offenders, and society at large. Each chapter provides a typology of the offender to analyze motivation, and includes an overview of the issues related to people who become victims of a wide variety of traditional and contemporary crimes such as child maltreatment, intimate partner violence, elder abuse, cyber crime and hate crimes. The history and theories of victimology are explored, as well definitive laws and policies, strategies for intervention, and future research areas.
