The volume focuses on the work of key social theorists, including Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Leon Mayhew, Dorothy Smith and Max Weber. Unique in its approach, the collection demonstrates how the theories of these scholars come to bear on the understanding of public relations as a social activity. Understanding public relations in its societal context entails a focus on such concepts as trust, legitimacy, understanding, and reflection, as well as on issues of power, behavior, and language. Each chapter is devoted to an individual theorist, providing an overview of that theorist's key concepts and contributions, and exploring how these concepts can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist, along with recommendation of key works and secondary literature. Overall, this volume will enhance understanding of theories and their applications in public relations, expanding the breadth and depth of the theoretic foundations of public relations. It will be of great interest to scholars and graduate students in public relations and strategic communication.

Examining the applied media ethics question of professional persuasion, this special double issue resulted from a colloquium and conference on allowable ethical limits of deception in professional persuasion. Participants were invited to reason their way toward a threshold that would define acceptable deception for a professional persuader in pursuit of favorable market and public opinion conditions for a client. As a whole, this issue covers a broad range of views and expressions of opinion that often come close to defining the threshold between morally acceptable and morally outrageous persuasion.

This book examines the tensions and controversies that developed as the war lengthened and the news media went about their traditional tasks. The first of two volumes on the subject, it draws upon previously unavailable Army and Defense Department records to interpret the role the press played during the war.--[foreword]

High-stakes educational testing is a global phenomenon which is increasing in both scale and importance. Assessments are high-stakes when there are serious consequences for one or more stakeholders. Historically, tests have largely been used for selection or for providing a 'licence to practise', making them high-stakes for the test takers. Testing is now also used for the purposes of

improving standards of teaching and learning and of holding schools accountable for their students' results. These tests then become high-stakes for teachers and schools, especially when they have to meet externally imposed targets. More recent has been the emergence of international comparative testing, which has become high-stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries. In this book we draw on research which examines each of these uses of high-stakes testing. The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise. To underline the international appeal of high-stakes testing the studies are drawn from Australia, Africa, the Caribbean, Europe, former Soviet republics and North America. Collectively they illustrate the power of high-stakes assessment in shaping, for better or for worse, policy making and schooling. This book was originally published as a special issue of *Assessment in Education: Principles, Policy & Practice*.

Public Relations in India is a review of the history of Public Relations (PR) in the world and India and an in-depth critical analysis of the value of PR as an essential feature of the management function. The key focus of this book is what PR means for India and other developing countries in the 21st century. Building a case for citizen-centric public relations, the author argues that in India, PR must be viewed as a development tool geared towards socioeconomic progress. This argument is backed by case studies and practical examples of PR writing, PR concepts applicable to India and the latest techniques and gadgets used in PR practice. The book covers topics like Internal and External PR, Satellite and International Communication and Cross-cultural Communication and blends theoretical arguments with management case studies. The book aims to sensitize general readers as well as PR professionals about the increasingly socially responsible role that the PR function has to play in developing nations to help in all-round social uplift.
