Eine Reise vom sonnenhellen Glanz der Alhambra zur düsteren Kühle des englischen Hofes Katharina von Aragón ist erst 14 Jahre alt, als sie zu Beginn des 16. Jahrhunderts den Thronfolger Englands heiraten muss. Sie verlässt ihr Heimatland Spanien - und damit alles, was sie liebt. Am englischen Hof herrschen spürbar schroffere Sitten. Und Katharina sehnt sie sich zurück nach Badekultur und exotischen Früchten, nach luftigen Gewändern und lauen Sommernächten. Als erste Frau Heinrichs VIII. lernt sie den tyrannischen Herrscher aus nächster Nähe kennen: Als Erste leidet sie unter seinen unzähligen Liebschaften, und als Erste erfährt sie, was es bedeutet, ihm keinen Sohn schenken zu können ... "Die ewige Prinzessin" ist die Romanvorlage zur Fernsehserie "The Spanish Princess", die Fortsetzungsserie von "The White Princess" und "The White Queen". This volume contains recent research papers presented at the international workshop on OC Probabilistic Methods in FluidsOCO held in Swansea. The central problems considered were turbulence and the NavierOCStokes equations but, as is now well known, these classical problems are deeply intertwined with modern studies of stochastic partial differential equations, jump processes and random dynamical systems. The volume provides a snapshot of current studies in a field where the applications range from the design of aircraft through the mathematics of finance to the study of fluids in porous media."

Focussing on the work of Sir John Kingman, one of the world's leading researchers in probability and mathematical genetics, this book touches on the important areas of these subjects in the last 50 years. Leading authorities give a unique insight into a wide range of currently topical problems. Papers in probability concentrate on combinatorial and structural aspects, in particular exchangeability and regeneration. The Kingman coalescent links probability with mathematical genetics and is fundamental to the study of the latter. This has implications across the whole of genomic modelling including the Human Genome Project. Other papers in mathematical population genetics range from statistical aspects including heterogeneous clustering, to the assessment of molecular variability in cancer genomes. Further papers in statistics are concerned with empirical deconvolution, perfect simulation, and wavelets. This book will be warmly received by established experts as well as their students and others interested in the content.

This book collects the contributions to the NATO Advanced Research Workshop on "Fundamental Aspects of Quantum Theory," held at the Centro di Cultura Scientifica "Alessandro Volta," Villa Olma, Carro, Italy, 2-7 September 1985. The meeting was dedicated to the memory of the late professor Piero Caldirola, a prominent member of the Physics Department of the University of Milan and a native of Como. The aim of the workshop has been to present several recent experimental results and theoretical developments concerning the various facets of quantum physics. The breadth of scope of the meeting was in accordance with Professor Caldirola's vast scientific interests, and fostered communication among experimental physicists, theoretical and mathematical physicists, and mathematicians, working in different but related fields. Indeed, lecturers endeavoured to make their contributions understandable to people acquainted with the problem but not necessarily familiar with the technical details; and these efforts were successful, as indicated by the frequent private discussions which took place among participants belonging to different breeds and brands. The meeting was made up of six one-day sessions, each of them addressing to a specific aspect of quantum theory: 1. General Problems and Crucial Experiments; with emphasis on single-particle interference experiments of neutrons and of photons, and on the measurement problem. 2. Quantization and Stochastic Processes; including stochastic quantization of gauge fields, stochastic description of supersymmetric fields, quantum stochastic calculus and stochastic mechanics.

To succeed in life, you must top your class, get Band One for school tests, and obtain four A stars for the PSLE. Or at least, that is the world according to Ling, a typical Singaporean mum who has made it her goal in life to help her children succeed in school. Ling's older daughter, April, has all the makings of a model student and looks set to ace the Primary Six national exams. In the meantime, Ling's younger son, Noah, is free-spirited and more interested in canteen food than what goes on in class. This (almost) kiasu mum records her journey diary-style, describing hilarious episodes involving crazy worksheets, assessment book overload and jittery parent-teacher meetings. Ling's humorous take on surviving Singapore schools will have you laughing and give you serious food for thought, all at the same time!

This volume contains the proceedings of the International Conference on Spectral Geometry, held July 19-23, 2010, at Dartmouth College, Dartmouth, New Hampshire. Eigenvalue problems involving the Laplace operator on manifolds have proven to be a consistently fertile area of geometric analysis with deep connections to number theory, physics, and applied mathematics. Key questions include the measures to which eigenfunctions of the Laplacian on a Riemannian manifold condense in the limit of large eigenvalue, and the extent to which the eigenvalues and eigenfunctions of a manifold encode its geometry. In this volume, research and expository articles, including those of the plenary speakers Peter Sarnak and Victor Guillemin, address the flurry of recent progress in such areas as quantum unique ergodicity, isospectrality, semiclassical measures, the geometry of nodal lines of eigenfunctions, methods of numerical computation, and spectra of quantum graphs. This volume also contains mini-courses on spectral theory for hyperbolic surfaces, semiclassical analysis, and orbifold spectral geometry that prepared the participants, especially graduate students and young researchers, for conference lectures.
