Therefore once the market for the Apple Watch has already been defined and correspondingly analyzed, the next step will be to review what the different elements of the Apple Watch Marketing-Mix are and how they interact with each other. The interaction among them shows clearly how changes and decisions made, which affect to one specific area of a product's Marketing-Mix, produce different changes -and up to what extent- in the rest of the elements², demonstrating that they cannot be seen, considered or analyzed separately but as a whole. It is clear then that only by approaching the Apple Watch Marketing-Mix as a whole, in which each part is irreplaceable and subordinated to Apple's marketing strategy, can be obtained a complete view of the level of efficiency they achieve when exploiting the two Unique Selling Propositions already stated in the conclusions of the first assignment.

To achieve the planned sales forecast over the next year and to protect the current market leadership in the segment of healthy functional drinks, a marketing mix will be established. The current external environmental forces mainly support the organisation's business. Changed consumer patterns regarding a higher consumption of healthy food, as well as the faster lifestyle and the bad image of global companies in the group of younger adults are the main reasons for the increased sales of Bionade. The brand is characterised as unique, innovative, healthy, value added, credible, social and "green". The marketing strategy is based on a mass market penetration strategy in the domestic market and a new market entry strategy in the international markets. The main objective is to keep the current competitor advantages of the unique product in place. The main task for future is to increase brand awareness and sales by marketing communication and the development of the product line. Additionally in future the current distribution strategy in cooperation with the distribution company of Coca Cola Company will be used to get into all traditional retail channels in the domestic and the international markets. In a long time view own sales offices should be open in the main markets to organise distribution, marketing and communication in these countries. The price in the domestic market will increase up to a compared price level of classical soft drinks. Bionade has the chance to be a "mass" product by a high level of quality. But the differentiation is not done by the price. The transfer in the international markets will be followed by a clear and credibility branding strategy.
