Ohne ein gutes, verlässliches Team könnten viele Führungskräfte ihre Ziele niemals erreichen. Doch leider werden viele Teams von internen Machtkämpfen, Streitigkeiten und den daraus resultierenden Misserfolgen ausgebremst – und die Führungskräfte schaffen es dann oft auch mit Leistungsanreizen oder Belohnungen nicht, ein Team wieder in die Spur zu bekommen. Doch warum sind hier manche Vorgesetzte oft erstaunlich hilflos? Die Antwort wurde Simon Sinek während einer Unterhaltung mit

einem General des Marine Corps offensichtlich. Dieser erläuterte die Tradition: "Offiziere essen immer zuletzt." Was in der Kantine noch symbolisch gemeint ist, wird auf dem Schlachtfeld todernst: Gute Anführer opfern ihren eigenen Komfort, sogar ihr eigenes Leben, zum Wohl derer, die ihnen unterstehen. Sinek überträgt diese Tradition auf Unternehmen, wo sie bedeutet, dass die Führungskraft einen sogenannten Safety Circle, einen Sicherheitskreis, bilden muss, der das Team vor Schwierigkeiten von außen schützt. Nur so bildet sich im Unternehmen eine vertrauensvolle Atmosphäre. Der Sicherheitskreis führt zu stabilen, anpassungsfähigen und selbstbewussten Teams, in denen sich jeder zugehörig fühlt und in denen alle Energie darauf verwendet wird, die gemeinsamen Ziele zu erreichen. Chefs, die bereit sind, als letzte zu essen, werden mit zutiefst loyalen Kollegen belohnt und schaffen so konfliktfreie, motivierte und erfolgreich Teams.

"This book presents methods of reengineering business curricula in order to use ES solutions. It also helps ES vendors understand the higher education environment so they can support college and university programs"--Provided by publisher. This book explains all the concepts underpinning the Organizational Management (OM), Personnel Development (PD) and Training and Event Management modules of SAP HR. It is a comprehensive technical manual which explains every single node of the User Menu and the Configuration. The book first gives an overview of a concept explaining what it is, how it is used and how it relates to the other concepts. It then explains its properties, which are fields in a configuration node. This book is designed to be used both as a reference manual and a learning guide. As a learning guide, it offers four views, each for a different target audience. It can be read from the Senior Management's perspective to gain a broad understanding of the subject and what SAP can do for them. Business Process Owners can achieve a higher level of understanding by getting to know more of SAP concepts and how to perform different tasks in SAP. Users can acquire a thorough understanding of different tasks and concepts underlying them. Functional consultants and proficient users can read the book to gain a complete understanding of the system. As a technical reference, the book can be used to locate the relevant material through the Table of Contents, Index, SAP Menu and SAP Customizing Implementation Guide (IMG). The last two follow the Table of Contents. If the reader is in SAP's User Menu or Configuration, the chapter number for these nodes can be found in SAP Menu and IMG. If a node is not covered in the book, the reason for not doing so is mentioned. The implementation of SAP HR OM, PD and Training can also be guided by the structure of this book.

Ein neues Zeitalter ist angebrochen. Vorbei ist die Zeit, in der Kunden sich gedulden mussten oder Kompromisse eingegangen sind, wenn sie ein Produkt oder eine Dienstleistung in Anspruch nehmen wollten. Abseits klassischer Zielgruppendefinitionen hat sich ein neuer Kundentyp entwickelt: der smarte Kunde. Er ist informiert und involviert. Er ist Mitentwickler und Mitgestalter. Er will Produkte und Dienstleistungen, die seinen Werten entsprechen – und das sofort, immer verfügbar, 24/7! Der smarte Kunde ist oft selbst der Experte. Und damit ändert sich alles: das Ende des Verkaufens ist da. Hinzu kommen rasante technologische, politische und gesellschaftliche Entwicklungen, die die Vertriebsarbeit revolutionieren: digitale Vermarktungs- und Kommunikationswege, neue Global Player und Marktaufteilungen, Kundenwünsche und -profile, Customer-Relationship-Management- und Payment-Systeme, Präsentations- und Procurement-Systeme, Datenschutz und legislative Grundlagen sowie Bots, Robotik, künstliche Intelligenz und Deep Learning – alles, was heute schon anders ist, wird morgen schon wieder anders anders sein. Veränderung geschieht immer schneller und den Unternehmen bleibt immer weniger Gewissheit, Stabilität, Ruhe zum Nachdenken und Zeit für die Umsetzung. Das erfordert ein neues Denken und Handeln in den Unternehmen und Vertriebsabteilungen. Andreas Buhr zeigt auf Basis einer Vielzahl aktueller Studien, welche Werte, Ideen und Strategien den Vertrieb heute und morgen erfolgreich machen. Denn eines bleibt auch im Zeitalter der Digitalisierung bestehen:

Menschen machen Geschäfte für Menschen. Und Menschen kaufen noch immer am liebsten von Menschen. Wie sich der Vertrieb von heute die Möglichkeiten und Chancen, die durch die Digitalisierung entstehen, am besten zunutze macht und dabei gleichzeitig den persönlichen Service optimiert, das zeigt Andreas Buhr praxisnah. Für die Neuauflage des Buches wurden sämtliche Kapitel aktualisiert und zum großen Teil neu geschrieben. Neben neuen Abschnitten, wie z.B. über die Frage nach der (Über-)Macht der künstlichen Intelligenz, wird das Ganze durch ein zusätzliches Kapitel über Vertriebsführung ergänzt. Buhr bietet damit ein topaktuelles umfassendes Buch für eine zeitgemäße Vertriebsorganisation – digital, adaptiv und dabei immer kundenzentriert. Denn das Ende des Verkaufens ist nicht das Ende des Kaufens. Gekauft wird immer. Die Frage ist nur: Wer kauft wann und was beim wem? Sorgen Sie heute schon dafür, dass Ihre Kunden auch morgen noch bei Ihnen kaufen!

Development Follow step-by-step instructions to gather and prepare data, create machine learning models, train and fine-tune models, and deploy your final app, all using SAP HANA and SAP Data Intelligence. c. Platforms Use built-in SAP HANA libraries to create applications that consume machine learning algorithms or

integrate with the R language for additional statistical capabilities. Work with the SAP Leonardo functional services to customize and embed pre-trained models into applications or bring your own model with the help of Google TensorFlow.
