Learn to "see" more compelling images with this on-the-go field guide from Bryan Peterson! What makes an image amazing? Believe it or not, it is not about the content. What makes a photo compelling is the arrangement of that content—in other words, its composition. The right composition gives your images impact and emotion; the wrong one leaves them flat. In this handy, take-anywhere guide, renowned photographer, instructor, and bestselling author Bryan Peterson frees amateur photographers from the prejudices of what is "beautiful" or "ugly" so that they can instead focus on color, line, light, and pattern. Get the tools you need to show your distinct voice and point of view in every image you shoot. With this guide in your camera bag, you'll be equipped not only to "see" beautiful images but to successfully shoot them each and every time. Also available as an ebook

Flash is a necessary and immensely creative tool that dramatically increases the opportunities of any amateur photographer. However, many amateurs find flash intimidating, unsure of where to begin. Instead, they continue limiting themselves to shooting only available light.

Understanding Flash Photography is a guide to off-camera flash, helping free photographers from "auto" to get the images they want when

natural light isn't enough. If you've been afraid to venture past natural light, here is the book that will finally help you explore the exciting possibilities of artificial light. Author Bryan Peterson starts by breaking down how flash works, then dispels the widely held myth that automatic "TTL" flash exposure is easier, explaining how to quickly master manual flash exposure to control the quality, shape, and direction of light. For the hundreds of thousands who found *Understanding Exposure* an exciting tool in moving past "auto" exposure in available light, *Understanding Flash Photography* is the essential companion to mastering the often challenging exposure puzzle.

Providing readers with a study of learning how to turn poorly lit images into finely crafted, masterfully lit photographs, this guidebook instills photographers with the self-confidence to think on their feet and photograph any portrait subject anywhere. Acclaimed photographer Neil van Niekirk presents seven distinctly different lighting scenarios—available light, exposure metering, a touch of flash, bounced on-camera flash, off-camera flash, video light, and hard sunlight—to show readers how to manipulate the direction and quality of light, the subject's and photographer's position, and numerous other variables so as to turn a bad image into a stunning, professional-level portrait. Packed with dozens of instructional, full-color photos, this work also features 10 sample photo sessions, allowing readers the opportunity to see the seven lighting scenarios put to practice.

Shooting with any kind of flash - whether it's a simple light on your camera, a remotely-triggered unit, or a complete studio setup - completely changes the photographic experience. No longer do you simply need to be aware of light; now you need to know how to shape it to your own ends. The *Flash Photography Field Guide*, small enough to be taken on the most arduous shoot, will show you exactly how to do this, whether you're shooting models in a studio, live sports events, or something as personal and special as your friend's wedding. This book covers the details of setting up and using modern TTL flash systems, and the creative and technical choices you'll come across, from syncing the flash with the camera to modifying the quality of the light.
