"Traveling Genius surveys the half century of work by British writer Jan Morris, including more than fifty books and thousands of essays and reviews, from 1950s America via Oxford, Venice, Trieste, Sydney, and Hong Kong to her home in Wales. Internationally known as a travel writer, she has also distinguished herself across many other genres by writing history, autobiographies and biographies, and literary fiction and essays."

"Existing accounts of Morris's work are largely confined to reviews and magazine essays, and often concentrate on James Morris's sex change and transformation into Jan Morris. This is of course significant to the writing, and some critics detect a change of tone and style afterward, but a detailed analysis of how her writing works has not yet been undertaken. In *Traveling Genius*, Gillian Fenwick fills that gap in the scholarship with the first study to explore the depths of Morris's complete body of work, utilizing close readings and archival research."--BOOK JACKET.

The past few decades have seen major impacts of different pandemics and mass casualty events on health resource use in terms of rising healthcare costs and increased mortality. In this context, the development of acute respiratory failure in patients requires the use of mechanical ventilation, either invasive or noninvasive. Recently, noninvasive ventilation (NIV) has proved to be a valuable strategy to reduce mortality rates in patients. This is the first book to describe the clinical indications of NIV in patients who have been hospitalized with high-risk infections as well as in the prehospital management of mass casualty incidents, including chemical or biological disasters and pandemics. Compiled by internationally respected experts, it offers comprehensive coverage of all aspects of noninvasive mechanical ventilation in public health emergencies, such as equipment needs and guidelines for health organizations. Considering recent events (SARS, H1N1 influenza pandemic), the book concludes with a critical review of current studies and future prospects for the use of NIV, offering a valuable resource for all practitioners managing mass casualty incidents and disasters.

Jährlich erscheint eine Vielzahl von digitalen Spielen, die historische Inszenierungen verwenden - in diversen spielmechanischen Formen, mit einem breiten inhaltlichen Spektrum und aus fast allen Epochen. Bislang überblickt sie die Geschichtswissenschaft nicht strukturiert, formuliert keine Erkenntnisinteressen und erschließt sie nicht systematisch. Wieso solche Inszenierungen historisch und gesellschaftlich relevant sind, erläutert das Buch einführend. Sein Hauptteil ordnet den Stand der Forschung statistisch, methodisch und disziplinär sowie entlang von Spielformen und Epochen. An vielen Beispielen identifiziert er die Lücken des Diskurses, kondensiert Erkenntnisinteressen und bezieht andere Geistes- und Sozialwissenschaften ein. Weitgehend unbeachtet sind bislang Online-Rollenspiele, obwohl der empirischer Teil am Beispiel *The Secret World* ihre Qualität als Erinnerungskulturelles Wissenssystem aufzeigt. Wie dieses Medium Historisches inszeniert, ist gesellschaftlich bedeutend, aber auch in wirtschaftlicher Hinsicht. Das Buch erschließt daher ein Arbeitsfeld für Studierende, Lehrende und Forschende in Geschichts- und anderen Geisteswissenschaften, eröffnet aber auch neue Denkansätze für die praktische Anwendung im Game Design.

This book explores the remarkable sociocultural convergence in multiplayer online games and other virtual worlds, through the unification of computer science, social science, and the humanities. The emergence of online media provides not only new methods for collecting social science data, but also contexts for developing theory and conducting education in the arts as well as technology. Notably, role-playing games and virtual worlds naturally demonstrate many classical concepts about human behaviour, in ways that encourage innovative thinking. The inspiration derives from the internationally shared values developed in a fifteen-year series of conferences on science and technology convergence. The primary methodology is focused on sending avatars, representing classical social theorists or schools of thought, into online gameworlds that harmonize with, or challenge, their fundamental ideas, including technological determinism, urban sociology, group formation, freedom versus control, class stratification, linguistic variation, functional equivalence across cultures, behavioural psychology, civilization collapse, and ethnic pluralism. Researchers and students in the social and behavioural sciences will benefit from the many diverse examples of how both qualitative and quantitative science of culture and society can be performed in online communities of many kinds, even as artists and gamers learn styles and skills they may apply in their own work and play.
