Students from a STEM focused elementary school (Morriss) provided 191 student responses with 473 student responses coming from 4 other elementary schools within the same school district. The students responded to a learning environment questionnaire based on three scales from the What Is Happening In this Class? (WIHIC) and the attitude scale from the Test Of Science Related Attitudes (TOSRA). Factor structure, internal consistency reliability, discriminate validity, and the ability to distinguish between different classes were supported by data analysis of Morriss and Other student groups. An ANOVA was used which produced statistically significant differences in the Cooperation scale. Morriss students' perceived higher levels of cooperation in their classrooms relative to Other students from schools within the same school district. Student outcomes (Achievement and Attitudes) showed a significant difference suggesting that the Morriss students may be performing better on Achievement assessments based on teacher preparation. In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes

of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.

The purpose of this study was to examine the relationship between one North Texas School District's Limited English Proficient (LEP) students' language acquisition levels as measured by TELPAS and the students' academic performance on the Science and Social Studies the State of Texas Assessment of Academic Readiness (STAAR) tests. If a relationship existed, this study sought to determine if there was a minimum score on TELPAS that would be related to student success on STAAR in the area of science and social studies. In the state of Texas, TELPAS determines the student's level of English language proficiency and is given to all LEP students each year. STAAR tests measure academic achievement. In the eighth grade students take the STAAR Science and STAAR Social Studies test, in addition to the other areas of reading and math. The TELPAS Composite scores and STAAR Science and STAAR Social Studies scores for eight grade students in one district were examined for the 2013-2014 school year and the 2014-2015 school year. These scores were examined both separately and combined using a correlation to determine if a relationship existed. Overall, the strength of the relationship between TELPAS and STAAR Science was moderate. The relationship between TELPAS and STAAR Social Studies was also moderate. The strength of the relationship was not strong enough to determine if a minimum score on TELPAS could be established to insure success on the STAAR Science and STAAR Social Studies tests. Correlates with the Student Workbook; Reviews the assessed Texas Essential Knowledge and Skills (TEKS) for Reading; Provides correct answers and analyses for the Assessments; Correlation charts and skills charts help educators track students' strengths and weaknesses with STAAR. Includes Practice Tutorial CD for use on screen or IWB. Assess student knowledge of the Texas Essential Knowledge and Skills (TEKS) for Reading with two full-length Assessments for each subject. Questions provide students with the necessary practice needed to achieve academic success on STAAR. Chapters on test-taking strategies and test anxiety build students' confidence and test-taking skills. Glossaries familiarize students with vocabulary terms and concepts found on state proficiency tests. Answers are provided in the Parent/Teacher Edition only.
