The creative use of fear by news media and social control organizations has produced a "discourse of fear" - the awareness and expectation that danger and risk are lurking everywhere. Case studies illustrates how certain organizations and social institutions benefit from the exploitation of such fear construction. One social impact is a manipulated public empathy: We now have more "victims" than at any time in our prior history. Another, more troubling result is the role we have ceded to law enforcement and punishment: we turn ever more readily to the state and formal control to protect us from what we fear. This book attempts through the marshalling of significant data to interrupt that vicious cycle of fear discourse.

"Johnson astutely reveals that franchises are not Borg-like assimilation machines, but, rather, complicated ecosystems within which creative workers strive to create compelling 'shared worlds.' This finely researched, breakthrough book is a must-read for anyone seeking a sophisticated understanding of the contemporary media industry." —Heather Hendershot, author of *What's Fair on the Air?: Cold War Right-Wing Broadcasting and the Public Interest* While immediately recognizable throughout the U.S. and many other countries, media mainstays like X-Men, Star Trek, and Transformers achieved such familiarity through constant reincarnation. In each case, the initial success of a single product led to a long-term embrace of media franchising—a dynamic process in which media workers from different industrial positions shared in and reproduced familiar culture across television, film, comics, games, and merchandising. In *Media Franchising*, Derek Johnson examines the corporate culture behind these production practices, as well as the collaborative and creative efforts involved in conceiving, sustaining, and sharing intellectual properties in media work worlds. Challenging connotations of homogeneity, Johnson shows how the cultural and industrial logic of franchising has encouraged media industries to reimagine creativity as an opportunity for exchange among producers, licensees, and even consumers. Drawing on case studies and interviews with media producers, he reveals the meaningful identities, cultural hierarchies, and struggles for distinction that accompany collaboration within these production networks. *Media Franchising* provides a nuanced

portrait of the collaborative cultural production embedded in both the media industries and our own daily lives.
