"These essays are among Scott MacDonald's best. An added bonus among all this new work is one updated vintage essay from 1981—still the very best essay ever written about the uses of pornography. All the essays are intellectually, personally and viscerally vibrant, coupling substantive recent essays with his trademark, probing interviews with key filmmakers. Each interview is beautifully paired with the essays. Scott MacDonald is a monument to thoughtful knowledge of, and pleasure in, avant-garde cinema."—Linda Williams, author of *Screening Sex* "More than any other critic, Scott MacDonald truly explores contemporary experimental cinema, seeking out new works and new artists, reconsidering classics and broadening out our sense of film history from the images on screen to the social, political and economic contexts and debates surrounding them. And yet if MacDonald surveys a complex landscapes, his books never carry the claustrophobia of the archive or academia. This criticism answers the call of the open road, with conversations and companionship with vivid personalities guiding the way, and the sense of high adventure waiting just around the bend."—Tom Gunning, Chair, Committee on Cinema and Media, University of Chicago

This report finds that the funding of the EU is complex and lacks transparency and that there is a need for a simpler system that would reduce the administrative burden. It concludes that a Gross National Income based revenue source is the best way of providing the bulk of the budget's funding. Apart from other considerations, the Committee has seen no evidence that any other new form of taxation would provide the same level of clarity and certainty.

Additional written evidence is available in Volume 3, available on the Committee website www.parliament.uk/pasc

Howard J. Wiarda is one of the leading global scholars of international relations, comparative politics, and foreign policy, and the author/editor of more than sixty books. Now in this highly personal and swashbuckling account, Professor Wiarda tells the stories that lie behind the research: his adventures in Europe, Asia, Latin America, the Middle East, and South Africa. Complementing his academic work, these three volumes are filled with impressions, research findings, gossip, and preliminary ideas and concepts—the true "stuff" of how scholarly books get written. For Wiarda has had a remarkable life: in some of the nation's leading universities, academic policy work in the State and Defense Departments, and denizen of the Washington think tanks. He has also lived abroad for extensive periods and traveled widely in some of the world's most troubled and exciting places. These books tell the story of his "adventures in research." It happens all the time: you're watching the Champion's League, pondering Robert Kilroy Silk's unnatural glow, reading the latest newspaper debate about EU bendy banana laws, and thinking: what's really going on in Europe? Does anyone actually know what they're talking about? And where are Riga and Vilnius anyway? You needn't worry any more. With this armchair guide you'll discover the strange and fascinating world that calls itself Europe - without ever having to leave your own home. There are insights into culture (how to join the Finns beating themselves with birch twigs in the sauna); the lowdown on the people that matter (porn stars turned politicians in Italy); fascinating facts and explanations of historical rifts (and you thought the relationship between Britain and France was bad). You'll find out how to talk like Berlusconi, unravel the workings of the EU and guide yourself from the Baltics to Belgium, Portugal to Poland. The stench of greed is engulfing all our once-admired institutions. Business bosses pocket millions for even the most dismal performance. Bureaucrats pay themselves eye-watering amounts, while wasting billions of our money.

Multimillionaire bankers lie, steal our money, rig interest rates and wreck our banks. Politicians and peers fiddle even more from their expenses than before the expenses scandal broke. Everything that once made Britain admired in the world - our sense of fair play, our decency, our tolerance, our democracy - has been cynically trampled in the mud by our self-serving, grasping ruling elites. And while our masters loot ever more of our money for themselves, they preach to us about the need for austerity, cutbacks and sacrifices. Greed Unlimited exposes how our voracious, selfish elites have made fools of us all and looks at how we can fight back against the rapacity of those who have so much power over us.

This edited collection explores the future options for the UK regarding its relationship with the European Union (EU). Since Britain applied for membership in 1961, the nature of the relationship between the UK and the EU has been central to economic and political debate, being widely perceived as 'inevitable', because withdrawal from the process would leave Britain isolated and largely powerless. However, this book challenges this presumption by illustrating that it could be in Britain's long-term interest to seek positive and plausible global

policy options if it were to be released from the rigidities and constraints imposed by aspects of EU membership (e.g. economic policy, agriculture and fisheries, trade relations, taxation policy, labour relations, social policy, human rights and civil liberties, foreign policy, sovereignty and national identity) Britain might benefit from a looser relationship. Hence, the effective choice Britain possesses is between an essentially European future or a comprehensive global strategy. How the creation of the Nobel Prize in Economics changed the economics profession, Sweden, and the world Our confidence in markets comes from economics, and our confidence in economics is underpinned by the Nobel Prize in Economics, which was first awarded in 1969. Was it a coincidence that the prize and the rise of free-market liberalism began at the same time? The Nobel Factor is the first book to describe the origins and power of the most important prize in economics. It tells how the prize, created by the Swedish central bank, emerged from a conflict between central bank orthodoxy and Sweden's social democracy. The aim was to use the halo of the Nobel brand to influence the future of Sweden and the rest of the developed world by enhancing the bank's authority and the prestige of market-friendly economics. And the strategy has worked spectacularly—with sometimes disastrous results for societies striving to

cope with the requirements of economic theory and deregulated markets. Drawing on previously untapped archives and providing a unique analysis of the sway of prizewinners, *The Nobel Factor* offers an unprecedented account of the real-world consequences of economics and its greatest prize.

This book brings together contributions from leading scholars around the world on the most relevant and pressing economic themes surrounding the UK–EU relationship. With chapters spanning from the UK's accession to the bloc to the aftermath of its decision to leave, the book explores key themes in UK economic growth and EU membership, international trade, foreign direct investment, financial markets and migration. Chapters interrogate the history of the relationship, the depth of foreign direct investment, and responses to the financial crisis. Considering both the history and future of UK and EU relations, the book is a relevant and timely volume that gives welcome context to a fast-changing relationship.

Challenging one-eyed technology-focused accounts of renewables policy, this book provides a ground-breaking, deep-diving and genre-crossing longitudinal study of policy development. The book develops a multi-field explanatory approach, capturing inter-relationships between actors often analyzed in isolation. It provides empirically rich and systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries. While France, Germany, Poland and the United Kingdom opted for 'technology-specific' renewables support mixes, Norway and Sweden embarked on 'technology-neutral' support mixes. Differences between the two groups result from variations in domestic political and organizational fields, but developments over time in the European environment also spurred variation. These findings challenge more simplistic and static accounts of Europeanization. This volume will be of key interest to scholars and students of energy transitions, comparative climate politics, policy theory, Europeanization, European integration and comparative European politics more broadly, as well practitioners with an interest in renewable energy and climate transition. In this EU referendum year, it's time for people across Europe to look at what really goes on in Brussels in our name. It has been estimated that the EU costs us around £1,000 billion a year - an incredible £2000 for every man, woman and child in Europe. So what do we get for our money? Politicians and administrators selflessly working to bring us efficient government? Well-targeted regulations that promote economic prosperity? A safe and free society? A well-protected environment? Help for people in poorer countries? Or is our money being squandered by a self-serving euro-elite of unaccountable politicians and incompetent bureaucrats, or else devoured in a feeding frenzy of fraud and corruption where a few lucky insiders become unimaginably rich at our expense? And is the tsunami of regulation pouring out of Brussels in reality strangling industry, destroying jobs, restricting personal freedom, desecrating the environment and further impoverishing the developing world? Using their extensive network of insider sources, David Craig and Matthew Elliott smash through the secrecy

and disinformation that are the Brussels hallmark to reveal what our European rulers are really getting up to. The result is a horrifying story of bureaucracy, hypocrisy and kleptocracy - and how we are all suffering as a result.

This research report aims at filling the knowledge gap concerning organized business crime by highlighting one specific phenomenon, that of EU cross-border VAT fraud. It intends to provide insight into: the effectiveness of the present VAT control system; the vulnerability of legitimate trade to criminal inroads; and, the development of organized crime in this area.

This major new text provides an engaging introduction to all aspects of politics and policy in the European Union. The author's lively and student-friendly style brings the subject to life, giving readers a sense of the colour of EU politics and its impact on people's lives. John McCormick examines the history, institutions, processes and policies of the European Union. He analyses where the EU stands in today's world, set in the context of globalization, EU enlargement and Europe's changing role on the world stage. In addition, the book focuses on the mechanisms by which Europeans engage with the EU and reviews public opinion in member states – both about integration itself and a range of broader issues. Each chapter contains a wide range of features to support and reinforce learning: • Photos and descriptions of events, thinkers and political actors • Integrated coverage of theory • Breakdowns of key debates • Chapter summaries and guides to further reading • On-page definitions and clear explanations of key concepts

"This is the first study of the far right's role in the climate crisis, presenting an eye-opening sweep of a novel political constellation, revealing its deep historical roots"-- To protect European citizens and their money, the European Union must fight fraud and corruption. OLAF has a key role to play in winning that fight. This publication is a part of a series that explains what the EU does in different policy areas, why the EU is involved and what the results are.

Antitrust economics is a field that draws extensively on the economic theory of industrial organization, and the field's frontier is at the cutting edge of economic research. This book bridges the gap between introductory texts and advanced research volumes by presenting select themes in antitrust economics and modeling. All from a neoclassical perspective, the author begins by discussing classic monopoly, continues to add more markets to the mix—via spillover effects and horizontal/vertical

mergers—and then explores logical ties to international trade and regulated industries. While brief and selective, the method provides a basic analytical reference point for approaching special antitrust topics not covered here, such as tying, bundling, and exclusive dealing. Such analytics are sometimes likened to a rational defense of monopoly and related anti-competitive behavior, but are essential to explicating antitrust economics from a mainstream Western economic vantage.

Following the Lisbon Treaty, the powers of the European Parliament in external relations have gradually expanded and it is increasingly influencing the foreign policy of the European Union. This book analyses the role of the European Parliament as an international actor and presents a new debate about its role outside the EU territory. It explores different policy areas including human rights, international aid, trade, crisis management and the environment to provide a systematic analysis of the modern global role of the European Parliament. The book also considers the European Parliament's regional interactions with Africa, Latin America, the United States, Asia and the Middle East. With a common analytical framework and research covering the lifespan of the European Parliament from its first direct elections in 1979 to the present day, this comprehensive volume presents an unparalleled analysis of one of the most important institutions in the European Union. This book will be of interest to students and scholars of European Union politics and institutions, European policy, government, international relations and European history.

Die mittelbare Beteiligung an Wettbewerbsverstößen stellt den Rechtsanwender erfahrungsgemäß vor größere Schwierigkeiten, ist in diesen Fällen im Vergleich zur unmittelbaren Begehung ein in der Regel besonders hoher Begründungsaufwand von Nöten, um eine Sanktionierung herzustellen. Im Bereich des Kartellrechts hat diese Thematik mit der Entscheidung des EuG "AC-Treuhand/Kommission" erheblich an Brisanz gewonnen. Konkret geht es dabei um die grundlegende Frage, ob sog. Kartellgehilfen, also Unternehmen, deren einzige Aufgabe darin besteht, Kartelle zu organisieren und die Kartellanten bei der Durchführung der wettbewerbswidrigen Absprachen zu unterstützen, vom Anwendungsbereich des europäischen Kartellrechts erfasst werden können. Die gleiche Frage ergibt sich darüber hinaus auch im deutschen Kartellrecht und damit unter Anwendung der Vorschriften des GWB. Im Lauterkeitsrecht nach UWG stellt sich eine im Wesentlichen sehr ähnliche Problematik. Die Diskussion dreht sich hierbei darum, ob die Haftung desjenigen zu bejahen ist, der den Wettbewerbsverstoß eines Dritten erst ermöglicht oder ihn zumindest erleichtert, insbesondere indem er die dafür nötige Infrastruktur zur Verfügung stellt. Nils Bremer untersucht, inwieweit der mittelbare Rechtsgutverletzer verantwortlich ist und wie eine solche Verantwortlichkeit hergeleitet und von ihrem Umfang und Inhalt her umrissen werden kann.

'Theatre, food, refugees: in Adrian's writing they're all linked up ... If you haven't read his book AA GILL IS AWAY, read it now. It was when he was away that he was at his best' Stephen Daldry A. A. Gill was probably the most read columnist in Britain. Every weekend he entertained readers of the SUNDAY TIMES with his biting observations on television and his unsparing, deeply knowledgeable restaurant reviews. Even those who objected to his opinions agree: his writing is hopelessly, painfully funny. He was one of a tiny band of must-read journalists and it was always a disappointment when the words 'A.A. Gill is away' appeared at the foot of his column. This book is the fruit of those absences: twenty-five long travel pieces that belie his reputation as a mere style-journalist and master of vitriol: this is travel writing of the highest quality and ambition. Ten great historic pilgrim routes of Western Europe, inspiration for today's long distance walker. Pilgrimage in Europe is thriving on a massive scale. This century the cathedral at Santiago de Compostela alone has seen 40 times the number of pilgrim visits. Author Derry Brabbs' previous book, Roads to Santiago, focused exclusively on the 'camino' through France and Spain to Santiago de Compostela; Pilgrimage revisits this classic route, and nine other inspirational journeys across Europe. Whether you're truly making a pilgrimage, exploring the world, or simply hiking, Pilgrimage will lead you along deeply historical routes like the 'Jakobsweg' in Germany, between Cologne and Trier. You'll find great walks in Britain and France, like St. Cuthbert's Way which winds around the Scottish Borders to the holy island of Lindisfarne, and the World Heritage Site of Mont-St-Michel built on the tiny island off the coast of Normandy. The most notable addition to the rejuvenated era of pilgrimage is the Via Francigena, now a very well established path through Switzerland and Italy. The Italian section begins on the bleak summit of the Great St Bernard Pass where a hospice still caters to the needs of

passing pilgrims before heading down to Rome through some of Italy's most beguiling countryside interspersed with medieval hilltop towns and villages. Astounding photographs combine with an absorbing text that describes the history and key features of each route, as well as brief details of the distances and the number of days it takes to walk, and a list of websites to help plan your journey.
