The authoritative solution to passing the 70-276 exam! MCSE/MCSA Training Guide (70-276): Implementing and Administering a Microsoft Windows Server 2003 Network Infrastructure is the perfect study guide to help you pass one of the four core exams in Microsoft's MCSE Server 2003 certification program and an elective exam in the MCSA program. This certification exam measures your ability to install, manage, monitor, configure, and troubleshoot DNS, DHCP, Remote Access, Network Protocols, IP Routing, and WINS in a Windows Server 2003 network infrastructure. In addition, this test measures the skills required to manage, monitor, and troubleshoot Network Address Translation and Certificate Services. If you're preparing for this exam, you will find our Training Guide series to be the most successful self-study tool in the market. This book is your one-stop shop because of its teaching methodology, the accompanying PrepLogic testing software, and superior Web site support at [www.examcram.com](http://www.examcram.com). Each book in the Training Guide series is published under the direction of Series Editor Ed Tittel, the leading authority on IT certification. This book has been subjected to rigorous technical review by a team of industry experts, ensuring content is superior in both coverage and technical accuracy, and has earned the distinction of Cramsession™ Approved Study Material. The CD features PrepLogic™ Practice Tests, Preview Edition. This product includes one complete PrepLogic Practice Test with approximately the same number of questions found on the actual vendor exam. Each question contains full, detailed explanations of the correct and incorrect answers. The engine offers two study modes, Practice Test and Flash Review, full exam customization, and a detailed score report.

MCSE candidates can practice taking the TCP/IP exam by using the software provided in this book/CD-ROM. The guide offers solid, objective-based content, along with sample questions and exercises to allow the reader to learn the information in depth.

This certification exam measures the ability to develop and implement XML Web Services and server components using Visual C# and the Microsoft .NET Framework. This exam, released in September 2002, counts as a core credit toward the new MCAD (Microsoft Certified Application Developer) certification as well as a core credit toward the new MCSD .NET track. Readers preparing for this exam find our Training Guide series to be the most successful self-study tool in the market.
