The Conscious Teacher is about all kinds of strategies and techniques educators might employ to become more effective teachers. In an accessible, conversational style, Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike. She begins with her personal story of not being able to read all through elementary school. Her early failures convinced her she was dumb. At first, she struggled, but when she still failed, she adopted an avoidance strategy that served her well until junior high. An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and, later, to applying the lessons she learned as a child to her own teaching What makes The Conscious Teacher unique are the inspirational lessons that are unlike what most teachers get in their teacher-education courses or student teaching. Ms. Nichols Poulos points out, for example, that from the very first day, it is important that students learn they will be treated with dignity and respect no matter what. And especially helpful are the steps Ms. Nichols Poulos employs to set up a behavior management plan that works. She explains the strategic steps she takes before school starts—how essential it is to get to know each student before they walk into class on that first day. She also illustrates how setting up classroom routines helps students know what to expect and how to make the best use of every minute. And she emphasizes the importance of the parent-student-teacher team and includes many examples of how to communicate with—and involve—parents, even those who may be difficult. Foundational to her program are reading and writing. Among other things, she lays out the steps for students—even as early as fourth grade—to write five paragraph essays and their own student-authored books, and to research and write reports that include bibliographies. When she differentiated curriculum to support all students' needs, she found their learning accelerated. All teachers will appreciate her ideas about how to teach the basics of math, as well as advanced math concepts. And her ideas for teaching the arts are inspirational, as she describes in detail how her fourth graders performed Shakespeare's Hamlet, Macbeth, King Lear, Julius Caesar, and A Midsummer Night's Dream. She also shows how to integrate social studies with literature and writing. Her experiences taught her that young students are much more capable than many people realize. The Conscious Teacher is an indispensable guide for all new teachers. Many of the ideas Ms. Nichols Poulos provides will also be an eye-opener for parents and experienced teachers as well. The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling.

Presenting cutting-edge studies from various countries into the theoretical and practical issues surrounding the literacy acquisition of at-risk children, this volume focuses specifically on the utility of technology in supporting and advancing literacy among the relevant populations. These include a range of at-risk groups such as those with learning disabilities, low socioeconomic status, and minority ethnicity. Arguing that literacy is a key requirement for integration into any modern society, the book outlines new ways in which educators and researchers can overcome the difficulties faced by children in these at-risk groups. It also reflects the rapid development of technology in this field, which in turn necessitates the accumulation of fresh research evidence.

How closely do your students read their writing? What are the implications for those who do and those who don't? During her work in classrooms, literacy coach Paula Bourque noticed that students who read their own writing closely are engaged in their work, write fluently, are able to produce lengthy drafts, and incorporate teaching points from mini-lessons into the day's writing. In this comprehensive book, Paula shows you that no matter what structures or lessons you use in your writing classroom, the strategies in *Close Writing* will help you make these better by creating student writers who are more aware of what effective writing looks like, who care about what they write, and who take ownership and responsibility for their growth as writers. Paula argues that a key element in close writing is learning to look and looking to learn by closely reading our own writing. Instead of focusing on the mechanics of their writing, she encourages students to read their words for understanding, clarity, and the effect they will have on an audience. She urges them to recognize their habits and their approaches to writing and to build upon them. *Close Writing* is based on research and methods that are reliable and valid best practices, but it will not prescribe lessons or structures. It gives you a peek inside classrooms where teachers just like you are working with budding authors just like yours. Paula also provides considerations for ELL writers, as well as a section of interviews with authors. She shares an extensive reference/resource guide, and a companion website with students' work samples, reproducibles and templates, and videos of classroom writing lessons round out this must-have resource.

This book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education. The authors put to work these theories in the context of an elementary school classroom, examining literacy-based activities that occur as students participate with materials in a multimedia writers' studio. Focusing on literacy processes, the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra-actions with human and nonhuman materials. Because these theories emphasize the unplanned, nonlinear aspects of literacy, the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models. *Go Be a Writer!* reveals that when educators appreciate the value of unscripted intra-actions they allow for more authentic learning.
