For example, consumers buy more long-term care insurance than they need because their advisors are forbidden to show them alternative or supplemental strategies. They buy one large life policy when best-practice analysis usually would find need for two smaller, distinctive types. They get recommendations for annuity, insurance, and investment replacement, but how can they be certain the answers they get are unbiased? Colleges and universities throughout the world plan library orientations for first years or specific audiences such as transfer or international students. These events can vary greatly in shape and form depending on the size, resources and staff of the institution, orientation schedule, and whether it is mandatory for students. Some institutions plan day-long events, elaborate games, or scavenger hunts; some offer drop in sessions or library tours; others offer an online orientation. Planning Academic Library Orientations gathers case studies from around the world covering a wide variety of approaches as a guide to those revamping or creating new library orientations. Chapters are organized

into the following thematic sections: Games; Marketing & Promotion; Partnerships; Targeting Specific Audiences; Technology; and Tours, and are cross-referenced if they touch on additional themes. Each chapter includes institutional information so readers can decide which type of orientation is appropriate for their own institution and see what resources are required. This title was first published in 2003: The advent of the Labour government in 1997 provoked major change in the political landscape of the UK. Priorities changed and different themes moved to the top of the agenda such as local democracy, community, transparency, sustainability and co-ordinated or 'joined-up' thinking. Many of the new priorities, such as community empowerment, involved a reappraisal of the purpose and procedures of planning, while others changed the legislative and institutional frame within which planning operated. This indispensable volume traces and analyzes the implications for planning created by this political shift. Presenting an overview of the general debates on contemporary UK planning, the book proceeds to identify four major areas as key themes for planning in the third millennium. These are: the new

institutional context; ensuring social inclusion and participation; promoting sustainability; and the debate over building at higher densities on Brownfield sites. Illustrated with in-depth case studies, the book provides a timely and important examination of the current state of planning in the UK and suggests best-case scenarios for the future.

Planning Regional Futures is an intellectual call to engage planners to critically explore what planning is, and should be, in how cities and regions are planned. This is in a context where planning is seen to face powerful challenges – professionally, intellectually and practically – in ways arguably not seen before: planning is no longer solely the domain of professional planners but opened-up to a diverse group of actors; the link between the study of cities and regions, which traditionally had a disciplinary home in planning schools and the like, steadily eroded as research increasingly takes place in interdisciplinary research institutes; the advent of real-time modelling posing fundamental challenges for the type of long-term perspective that planning has traditionally afforded; ‘regional planning’ and its mixed record of achievement; and, the link between ‘region’ and ‘planning’ becoming decoupled as alternative regional (and other spatial) approaches to planning have emerged. This book takes up the intellectual and practical challenge of planning regional futures, moving beyond the narrow confines of existing debate and providing a forum for debating what planning is, and should be, for in how we plan cities and regions. The chapters in this book were originally published as a special issue of *Regional Studies*.

I'm living the dream in my fancy-pants world, and I've got the Instagram feed to prove it. Who am I kidding? I'm literally holding it together with one more cup of coffee, yesterday's dry shampoo, and a prayer. So I finally said enough. Enough of me. I'm bidding farewell to chasing emptiness and exchanging it for more of Jesus. If we agree with Paul in Acts 20:24 that our lives are worth nothing unless we use them for finishing the work of telling others the Good News - where are we in our quest to get busy for Jesus? In our world of hashtags, hair color, and having it all together, chances are we aren't accomplishing much. Enough of Me is an 8-week Bible study for women focused on what God's Word has to say about the tug-of-war between our flesh and our mission. The study explores the barriers that stand between where we are today and where God wants to use us to finish His work. Do you have a nagging in your heart for more purpose? Are you right smack dab in the middle of a tug-of-war between your flesh and your mission? Often we want to live out the purpose and mission God has for us, but we're too distracted, exhausted, and empty. Maybe it's time to say enough to the excuses, anxiety, and interruptions that get in our way. Could it be we're so busy chasing emptiness and playing the people-pleasing game, that we can't find time to live on mission? It's time to take a deep breath and do some inventory. Let's dig in and see what God's Word has to say about this tug-of-war between our flesh and our mission. Let's figure out ways to quit chasing emptiness and take bold steps of obedience. Let's discover how we can glorify God and steer people to Jesus in our cubicles, at our dinner tables, in our mom-groups, and with people we encounter every day. What would happen if we said Enough of Me . . . more Jesus.
